# Chair's Preface

The Northern Ireland Ambulance Service (NIAS) is a wonderful organisation which is staffed by dedicated individuals who serve the community. I have been humbled to watch as colleagues have delivered ambulance services despite continuing challenges resulting from the Covid pandemic and other barriers created by an uncertain financial landscape.

Since taking up post in June 2018, I have witnessed the many positive changes which have taken place in NIAS and have been privileged to join with colleagues as we took decisions which contributed to this. As I step down in April 2023, I am proud to have served on a Board alongside professionals who are focused on patient care and who seek to mitigate the impact which service challenges have on staff. Thank you to everyone who has supported NIAS during my term.

I am also grateful to have worked alongside dedicated colleagues right across the organisation who are solution focused and who are determined to find paths through difficult situations to provide a necessary service. Thank you to frontline, support and managerial colleagues, who remain focused on the patient and who seek to collaborate with others to find improved ways of delivering health and social care to the public.

Over the past year, working together has seen further developments, and I am excited for colleagues in terms of the career opportunities which now exist. I have watched with interest as some newly introduced roles to NIAS, such as pharmacy and safeguarding, are improving service delivery. It is testament to the leadership demonstrated throughout the organisation, up to and including the Chief Executive, which has ensured NIAS continues to evolve in the best interests of patients and staff.

As I step down, I welcome the incoming Chair, Michele Larmour, and wish her all the very best as she begins her NIAS journey. My final word as NIAS Chair is to encourage you to remain focused on the patient, and to ask you to look out for each other. We are living and working in challenging times but the focus on patients and their families will, I believe, result in the continued delivery of services for everyone's benefit.

Mrs. Nicole Lappin NIAS Chair March 2023

# Performance Report Performance Overview

The purpose of the performance overview is to present the Chief Executive's perspective on the Trust's performance over the period 2022-23. It also provides a brief summary of the Trust: including its purpose and activities; our vision, values and goals; and services that we provide.

#### Chief Executive Overview of Performance

This Report marks the end of my fifth year as NIAS Chief Executive. It is a privilege to lead

such a resilient, dedicated and effective organisation. I am tremendously proud of the team and want to take this opportunity to acknowledge the immense effort and sacrifice of our staff. This year we celebrate innovation and achievement at a time of significant pressure. When I reflect back on the year, there is no doubt it has been another extremely difficult one given the many pressures and challenges for both staff and ultimately our patients. However, I am proud of the way in which all of our staff have cared for our community, sought opportunities to work in partnership across the health system, looked after each other, and continue to innovate and transform NIAS into a modern dynamic service at the heart of the health and social care system.

This year we celebrate the many achievements of our staff with a 'Year in Honours and Awards'. Staff have been recognised locally, nationally and even received Royal recognition throughout the year! I was proud to attend graduation ceremonies of the second and third cohorts of students who were conferred with Foundation Degrees in Science in Paramedic Practice. This year also saw the fourth cohort of students complete the Foundation Degree which brings to an end over 30 years of Paramedics being trained by NIAS, with all future Paramedic education in Northern Ireland taking place through the BSc course at Ulster University. I want to thank and pay tribute to everyone who has facilitated the education of so many professional staff during those years who continue to service the community so well.

In any caring organisation, staff health and wellbeing is crucially important and this year our team strengthened our peer support process and encouraged each other to talk. Staff across stations participated in #TimeToTalk and we launched the Crisis Line for staff. The wellbeing of our staff has been a top priority for me since joining the Trust and I will continue to do whatever I can to ensure staff receive the support they need, so they can in turn support the patients we serve.

We continue to work in partnership with other agencies to innovate and increase the reach and effectiveness of NIAS. I am proud of the way in which our services continue to innovate and develop, and of how the role NIAS plays in the wider HSC transformation agenda is increasingly recognised.

We celebrated the launch of our first bespoke children's ambulance service in partnership with Children's Heartbeat Trust. Northern Ireland now has a dedicated ambulance that children can use to travel to and from specialist treatments.

We also launched a new service which will help meet the needs of frequent callers to NIAS. Through INTERACT, our Complex Case Team will work closely with the British Red Cross to put plans in place to provide appropriate support to those individuals who contact our service frequently but for whom an ambulance is not the most appropriate response, by enabling onward referral to the right services to ultimately improve their wellbeing.

We increased the reach of our Community First Responders scheme with new volunteers recruited in some of our most isolated rural areas in Northern Ireland. They provide a valuable first line of support to those communities and I am delighted to have them as part of our team.

During the year we established a Volunteer Car Scheme forum for our valued Volunteer Car Drivers. The forum's aim is to increase our interaction with volunteers ensuring we are providing the right level of support through training, equipment and governance. I would like to thank all the committed volunteers who freely give of their time to provide much needed support to our service and valuable care in their local communities.

We have increased our capability in planning, data intelligence and digital capabilities, building stronger support structures for our frontline staff.

We also continued to work in partnership with the National Ambulance Service (NAS) in the Republic of Ireland, and we were pleased to be able to offer specialist support to the terrible tragedy in Creeslough. Our colleagues in NAS are only too willing to support NIAS when asked to do so, and when the call came our teams acted with great professionalism allied with the care, compassion and dignity that the small community in Creeslough needed.

Their response on that day is what our staff train for, in the hope that they would never have to experience the scenes that they faced. I am proud of how our staff rose to the challenges faced.

As we all know, this year has been one of the most challenging on record for NIAS.

At many points along the year we lost up to 28% of our 'on the road' capacity due to delayed handovers at Emergency Departments (ED's) across the province. These delays impact not only on the quality and timeliness of the care our patients can expect to receive, but also places increasing pressure on staff providing that care in a less than ideal environment. We met with colleagues across Health and Social Care in an Unscheduled Care Summit in November 2022 to develop and agree new actions to jointly address this challenge. We still have more to do, but I am optimistic that there is commitment right across Health and Social Care to continue to address this challenge which is a symptom of pressures across the system. From our perspective, NIAS is committed to playing our part in developing an

effective integrated urgent and emergency care service, including through the continued development of Appropriate Care Pathways, where conveyance to ED is no longer the default position.

Industrial action in the latter part of the year had the potential to cause significant disruption to services, however managers and unions worked together effectively to ensure that services continued where possible for patients experiencing life threatening emergencies.

As a senior team we do not underestimate the level of planning, organisation and negotiation this entailed and we thank staff for their dedication to ensure patients were not adversely affected. We also recognise the right of staff to take industrial action and want to see them appropriately remunerated for the incredible work they do.

The lack of a functioning Executive in Northern Ireland has affected future planning for our service, creating uncertainty around financial and resource allocations. We will continue to work to mitigate as best we can any adverse impact of the forecasted financial pressures. But there is no doubt the financial position is going to present a new set of challenges and it is important we all continue to identify and implement actions we can take to further improve the efficiency and productivity of our service.

Looking forward, I am optimistic that there are strong opportunities to enable NIAS to achieve our mission of consistently showing compassion, professionalism and respect to the patients we care for. The ambition of creating an Integrated Care System (ICS) for Northern Ireland grows ever closer and I am confident that NIAS can play a central role in planning and delivering services in an integrated way for our community as part of a modernised health service in Northern Ireland.

This annual report provides only a snapshot of the services our dedicated and skilled staff have delivered throughout the year. I am tremendously proud of the role each and every member of staff has played in delivering a quality service to the community, in one of the most challenging times for health services across the UK. I look forward to continuing to work with you all and with the support of my senior team, to deliver further improvements in the year ahead for the community we serve.

# A Year in Awards

## **April 2022**

NIAS Staff Recognition Awards celebrated the tireless work of the Northern Ireland Ambulance Service staff today featuring the award winning music duo 'Band 5 and 6'.

# **May 2022**

NIAS Chair Nicole Lappin, was delighted to have an inperson catch up with Eddie Murphy, the most worthy of recipients of the Chair's Award at the virtual awards ceremony. Nicole thanked Eddie for many years of dedicated service and congratulated him on the award.

## **June 2022**

More Royal recognition for past and present employees in the form of retired paramedic Abe Agnew from Larne awarded a BEM for services to the environment and community; Area Manager Sean Mullen awarded an MBE for services to NIAS; and Craig Wilson Altnagelvin, awarded the Queen's Ambulance Medal.

Abe Agnew

Sean Mullen

Craig Wilson

June also saw the celebration of National Healthcare Estates and Facilities Day when we recognised the contribution of all our Domestic, Vehicle Cleaning, Porters and Estates staff without whom our service cannot operate.

## **July 2022**

Congratulations to Jacqueline O'Neill and Barry Costello who were recognised at College of Paramedics (CoP) Honours and Competitive Awards 2022. Jacqueline's award was in the Companionship category and Barry received the Dr John Hinds Scholarship Award.

## September 2022

Caitlin Mullan was awarded Exceptional Emergency Operations Control (EOC) Member at the National Ambulance Leadership Forum. Well deserved recognition for the exceptional work our Control Room staff do in such challenging circumstances.

### October 2022

Congratulations to Jacqueline O Neill who was awarded the title of Companion of the College of Paramedics.

## **November 2022**

It was great to see so many NIAS finalists at the 2022 Advancing Healthcare Awards - recognition for the incredible work being done across the service. Congratulations to Dayna Doherty for winning a Rising Star Award.

## December 2022

Congratulations to James O'Callaghan and Paul McCluskey who successfully passed their aeromedical and aviation exams after a rigorous four month training schedule. Great job.

Congratulations to the Complex Cases Team won the World Health Organisation (WHO) Belfast Healthy Cities Healthy Champion Organisation category.

# January 2023

Gary Alexander Health & Safety Advisor (Risk Management Team) achieved his Diploma in Occupational Health and Safety Practice in January 2023. qualification is the highest-level competence-based Health and Safety qualification in the UK and Ireland. This is a significant achievement as National Examination Board in Occupational Safety and Health (NEBOSH) programmes are very challenging (comprising both examinations and coursework) and trying to study along with the day job is tough in the normal working environment, never mind emergency care! It truly is fantastic that Gary has taken the time to both empower himself and bring benefits to the organisation. Well done Gary.

NIAS was recognised as an Accredited Centre of Excellence in January 2023 by the International Academy of Emergency Dispatch. This provides an increased level of reassurance that NIAS Emergency Ambulance Control (EAC) are providing the best possible care for the patients we serve.

# **A Year in Pictures**

# **May 2022**

A group of staff from NIAS control raised almost £1,300 at the Belfast Marathon in support of our colleagues in the Helicopter Emergency Medical Service (HEMS). Well done!

## **June 2022**

31 paramedics left the hall at the in the Academic Procession having officially graduated with their foundation degrees.

# **July 2022**

Partnership working in action - Colleagues from Ulster University and St John's Ambulance assisted NIAS both in the control room and on the road on 12th July.

# September 2022 Michael Bloomfield and Sean Mullen at

Michael Bloomfield and Sean Mullen at Westminster Abbey representing NIAS at the State Funeral for Her Majesty Queen Elizabeth II.

The second cohort of BSc Paramedic students started this month at Ulster University (UU).

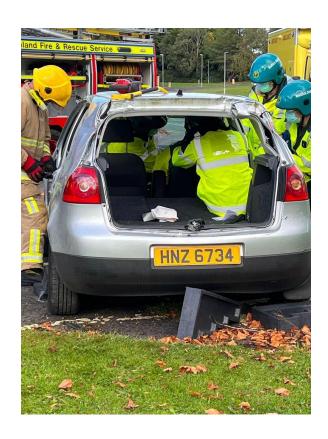

Our latest Associate Ambulance Practitioner (AAP) course continued their training at Ulster University in Coleraine. Pictured here experiencing the benefits of interagency working with the Northern Ireland Fire and Rescue Service (NIFRS) at road traffic collisions requiring extrication.

## October 2022

Control Room Week provided an opportunity to thank staff who work in our control rooms doing one of the most challenging roles in the ambulance service - the first point of contact for people in distress, giving professional, expert advice and clinical support.

## **November 2022**

Sky News spent a night getting a feeling for how current pressures impacted on staff and patients in Emergency Ambulance Control (EAC) and out on the road.

Chris Clarke presented an outline of service improvements required to meet the needs of patients at the Allied Health Professionals Conference.

Ambulance Staff in Crisis can now call The Ambulance Staff Crisis Phoneline 24/7 on 0300 373 0898. Sean from NIAS Peer Support & Ann Marie McStocker joined Angie & David from The Ambulance Service Charity (TASC) for the launch of this valuable service at the #EmergencyServicesMentalHealthSymposium.

#### December 2022

Twenty new Community First Responder (CFR) volunteers were trained and are now attending calls across Mid Down and Lisburn.

# January 2023

New Community First Responder (CFR) volunteers were put through their paces and went live in their respective areas. We worked with Department of Education to strengthen partnership between NIAS and schools throughout Northern Ireland through our Community of Lifesavers Education Programme.

Northern Ireland's first bespoke children's ambulance was officially launched by NIAS and Children's Heartbeat Trust. The ambulance is equipped with lights, toys and sensory equipment designed to make children as comfortable as possible during a time which can be a time of high stress, anxiety and fear.

# February 2023

Department of Health colleagues visited the Helicopter Emergency Medical Service (HEMS) base to meet the team and discuss potential future developments of the service.

NIAS Peer support made #TimeToTalk using the Association of Ambulance Chief Executive (AACE) Ambulance sector mental health continuum. Staff continue to raise awareness of NIAS Peer Support available 7 days a week and The Ambulance Service Charity (TASC) Ambulance 24/7 Crisis Line 03003730898. Keep talking & listening!

We increased the number of potential lifesavers across Northern Ireland by activating GoodSAM for ALL registered GoodSAM Responders on 7 February 2023. Could you be the lifesaver or the life saved? We want to increase everyone's chances of survival from an out of hospital cardiac arrest.

## March 2023

Our Chief Executive participated in the annual Alliance Party Conference panel discussion along with Primary Care and nursing colleagues to discuss the challenges facing Health and Social Care and the need for transformation.

# **Purpose and Activities of the Trust**

#### **Our Mission is:**

To consistently show compassion, professionalism and respect to the patients we care for.

#### **Our Values:**

We are committed to embedding the following shared HSC values in NIAS:

We work together for the best outcome for people we care for and support. We work across HSC and with other external organisations and agencies, recognising that leadership is the responsibility of all.

We commit to being the best we can be in our work, aiming to improve and develop services to achieve positive changes.
We deliver safe, high quality, compassionate care and support.

We are open and honest with each other and act with integrity and candour.

We are sensitive, caring, respectful and understanding towards those we care for and support and our colleagues. We listen carefully to others to better understand and take action to help them and ourselves.

#### **Our Goals:**

The four organisational goals set out in our Strategic Plan are that:

Our patients will feel professionally cared for; always with compassion and respect

Our staff will feel positive and proud to work for NIAS

Our stakeholders and partners will have confidence in us as a reliable provider at the centre of urgent and emergency care

Our communities will continue to value and trust us

A range of key transformation workstreams support the implementation of the NIAS Strategy and the Corporate Plan is grouped in line with these workstreams. We measure the outcomes of each of our key objectives to enable us to:

- Continuously enhance the way we are delivering care. This includes developing new roles, continuing to expand our care pathways, achieving seamless integration with the wider system, and improving our offer of non-emergency transport provision.
- Seek to increase the size of **our workforce** considerably, both frontline and the essential corporate functions that support them.
- Continue to develop the steps we are taking to engage with staff, improve their health and wellbeing, and enhance their career and personal development.
- Improve our organisational health, by embarking on a programme that will seek
  to positively change the culture we work in, engaging and empowering our staff by
  embedding collective and compassionate leadership at all levels.
- Develop a new quality and safety strategy, which will clearly define how we support staff to provide the best and most appropriate care possible. Working with colleagues in the rest of the health system, this will include measurement of the outcomes of the care we provide and patient experiences of our services, so we can continuously learn and improve.
- Focus on our **digital enablers**, upgrading out-of-date systems, increasing interoperability with the health and social care systems and embracing new technologies through a comprehensive programme of digital innovation.
- Reconfigure our infrastructure to facilitate our new clinical model, developing our estate and our fleet in line with our growing workforce and emerging technological advances.
- Improve our **communications & engagement** with our staff, patients, partner providers and our communities, ensuring their continuing involvement in shaping how we achieve our vision.

#### **About the Northern Ireland Ambulance Service HSC Trust**

The Northern Ireland Ambulance Service (NIAS) was established by the Northern Ireland Ambulance Service Health and Social Services Trust (Establishment) Order (Northern Ireland) 1995 as amended by the Health and Social Services Trusts (Establishment) (Amendment) Order (Northern Ireland) 2008 and Section 1 of the Health and Social Care (Reform) Act (Northern Ireland) 2009.

#### The principal ambulance services we provide are:

- Emergency response to patients with sudden illness and injury;
- Non-emergency patient care and transportation;
- Specialised health transport services; and
- Co-ordination of planning for major events and response to mass casualty incidents and disasters.

#### **Organisational Structure**

The provision of the above services is provided and supported by the following directorates:

- Chief Executive's Office.
- Operations Directorate.
- Finance Directorate.
- Human Resources Directorate.
- Medical Directorate.
- Quality, Safety & Improvement Directorate.
- Planning, Performance and Corporate Services Directorate.
- Clinical Response Model Programme Directorate.

# **Performance Analysis**

## **Overview of Organisational Performance**

The Northern Ireland Ambulance Service (NIAS) exists to provide high quality ambulance services which delivers the best clinical outcomes for those patients who make use of our services. We seek to do this by having in place the necessary resources in terms of staff, fleet and estates.

However, we cannot deliver this service in isolation and we are committed to participating fully in the development and delivery of responsive integrated health and social care services through collaborative working with partners throughout the Health and Social Care system. Engaging with local communities and their representatives to address issues that affect their health is also key to the future development of our services.

This annual report examines NIAS performance during 2022-23 and identifies the challenges that NIAS has faced in doing so, especially in the context of recovering from the COVID-19 pandemic. The report outlines the measures that NIAS has taken in facing these challenges and reviews the way in which we have managed our budget in the context of these challenges during the year.

#### **Operational Performance**

#### **Accident & Emergency Call Demand & Activity 2022-23**

NIAS activities were significantly impacted by the COVID-19 pandemic during 2020 and 2021. Throughout 2022-23, the Health and Social Care system continued to recover from the pandemic and activity during 2022-23 reflected this recovery. The call activity in 2022-23 has returned to the level we were experiencing before COVID-19, with 225,182 calls being

225,182 calls answered

answered by our control room in the period. These calls generated 190,825 Incidents that either required a clinician in the control room to provide advice, or a response to a scene by our ambulance crews.

There were 14,308 incidents in the year that the clinicians within our control room were able to provide clinical advice to patients and resolve their contact with the Service. 176,517 incidents reported to NIAS required the Service to deploy our crews to scene. Whilst on scene 46,022 incidents were resolved by our crews and this could have been due to our clinicians providing the necessary care to

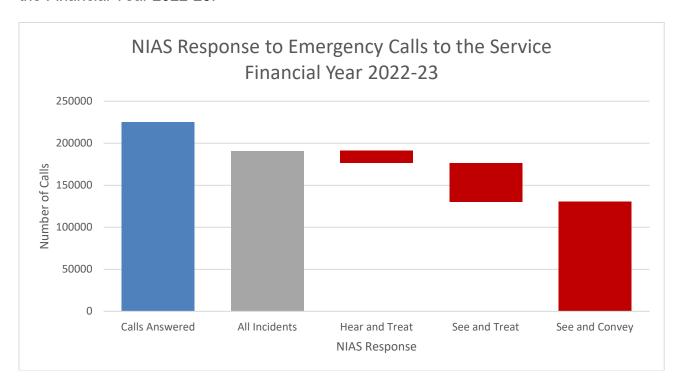

176,517 incidents

discharge the patients from our care or referring these patients to an alternative appropriate care setting within the community. This meant that 130,495 patients were conveyed by NIAS ambulance crews to a hospital setting during the Financial Year 2022-23.

The Table below, highlights these key figures from the Financial Year 2022-23:

	2022-23
Emergency Calls Answered	225,182
Emergency Incidents	190,825
Hear and Treat	14,308
See and Treat at Scene	46,022
See and Convey to Hospital	130,495

The chart below is a graphical representation of the flow of patients through our service for the Financial Year 2022-23.

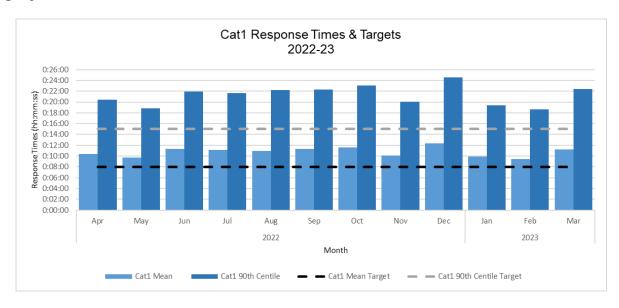

# Clinical Response Model (CRM) Performance 1 April 2022 – 31 March 2023

Ambulance response time standards, indicators and measures were introduced during November 2019 as part of the Clinical Response Model (CRM). These response time standards are monitored by the Department of Health as Ambulance Quality Indicators (in line with NHS England).

Call Type Definitions	Standard
999 Immediately life threatening	Category 1
999 Emergency – potentially serious incident	Category 2
Urgent Problem	Category 3
Less Urgent Problem	Category 4

#### **Response Times 2022-23**

#### **Category 1 Performance**

The Chart above outlines NIAS's mean and 90th percentile performance by month for all calls identified as Category 1 for the period 1 April 2022 to 31 March 2023.

The below table for the period 1 April 2022 to 31 March 2023, demonstrates NIAS response performance for each of the category calls.

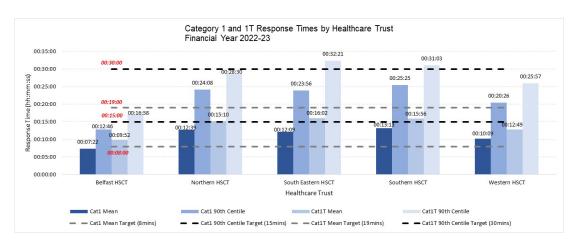

#### Clinical Response Model (CRM) Response Time Performance 2022-23

Category	Measurement	Standard	Performance	
Cat1	Mean	00:08:00	00:10:51	
Cati	90th Centile	00:15:00	00:21:29	
Cat1T*	Mean	00:19:00	00:13:40	
Catti	90th Centile	00:30:00	00:27:29	
Cat2	Mean	00:18:00	00:36:59	
Catz	90th Centile	00:40:00	01:20:26	
Cat3	90th Centile	02:00:00	03:53:18	
Cat4	90th Centile	03:00:00	06:22:14	

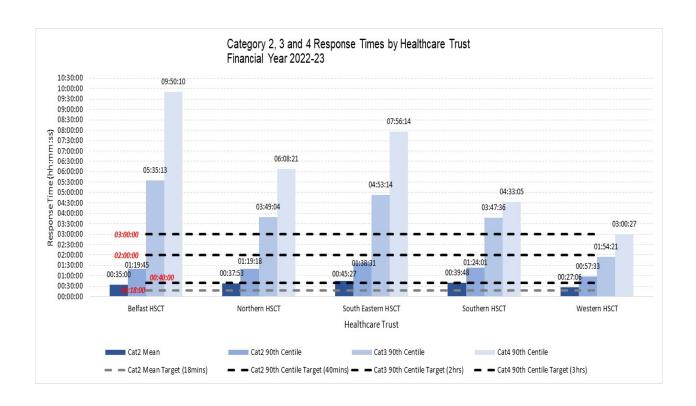

<sup>\*</sup>Category 1T refers to an A&E conveyance resource capable of transporting a patient to hospital. The Category does not have a formal standard but the performance above will be monitored and published by NIAS.

NIAS acknowledges that many changes are required to achieve the performance standards through the introduction of the CRM model. The outstanding challenges include the requirement for additional staff resources in frontline and support functions, the structure and skill mix of our staff coupled with response vehicle types and operational dispatch systems and protocols.

The table and chart below show the response times for each category of calls per divisional area for April 2022 to March 2023.

		Trust				
Category	Metric	Belfast HSCT	Northern HSCT	South Eastern HSCT	Southern HSCT	Western HSCT
	Mean	00:07:22	00:12:39	00:12:09	00:13:13	00:10:09

	90th Centile Target (3hrs)	03:00:00	03:00:00	03:00:00	03:00:00	03:00:00

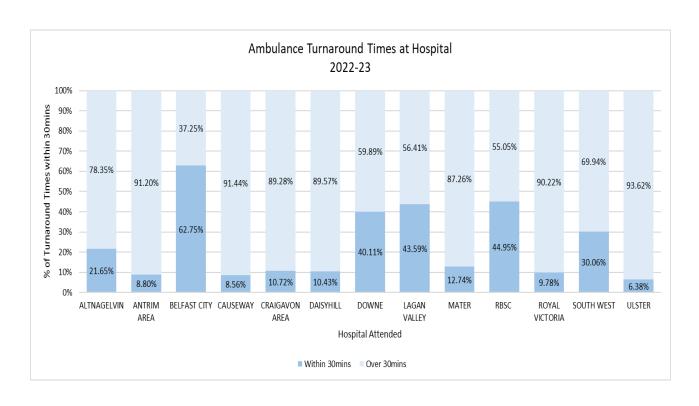

The Trust has continued throughout 2022-23 to address numerous issues through internal improvement plans and working groups. However, the modelling undertaken by Operational Research in Health (ORH) Limited, based on the CRM standards implemented in NIAS in November 2019 confirmed that performance standards could not be achieved by the Trust with the resources currently available and additional investment is required to deliver the new response time measures on a consistent basis.

#### **Hospital Turnaround Times 2022-23**

In 2022-23, only 14% of all ambulance arriving at hospitals achieved the 30 minute turnaround standard. Of the 130,495 emergency arrivals to Acute Emergency Departments across Northern Ireland, 112,599 had a turnaround time of over 30 minutes. This equates to 103,795 total operational hours lost, the equivalent of 22% of our operational capacity being tied up in Hospital turnaround delays.

22% operational capacity lost

Turnaround Delays	2022-23
Total Number of Turnaround Times Reported at Acute Hospitals	130,495
Total Number of Turnaround Times in Excess of 30 minutes	112,599
% of Turnaround Times in Excess of 30 minutes	86.29%
Total Operational Hours Lost to Turnaround Times in Excess of 30 minutes	103,795
Average Operational Hours Lost to Turnaround Times Delays in Excess of 30 minutes (per day)	284

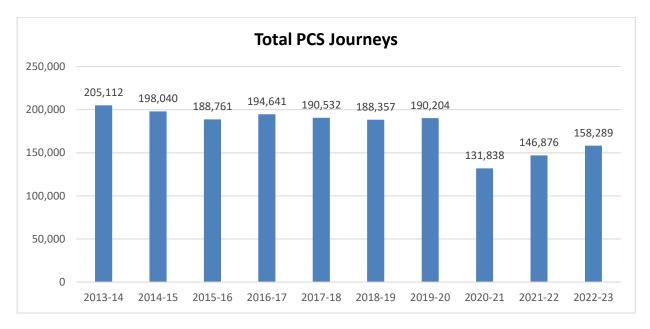

#### **Patient Care Service 2022-23**

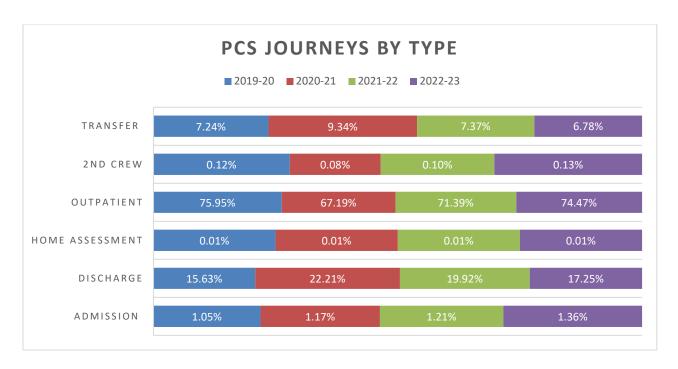

The Patient Care Service (PCS) is known as non-emergency patient transport service, (NEPTS) in other parts of the UK. It is a service highly valued by our patients and is an important part of our role as an ambulance service. Health and Social Care Trusts across Northern Ireland rely on NIAS PCS to bring patients to and from hospital or clinics, who would otherwise find healthcare very difficult to access.

In 2022-23, 158,289 journeys took place to support the transportation of non-emergency routine admissions, discharges, outpatient appointments and transfers. This is an increase in journey numbers of 7.8% (11,413) compared to 2021-22, reflecting the increasing return of hospital services to pre pandemic levels across the HSC.

158,289 non-emergency journeys

During the COVID-19 pandemic, and in response to the pressures our emergency resources experienced, NIAS took the decision to reduce our response to low acuity outpatient clinics by transferring resources to support the high acuity, urgent and emergency workload. This approach continued throughout 2022-23 whilst awaiting guidance from the Department of Health on social distancing restrictions in clinical settings. However, during 2022-23, HSC Trusts continued with increases in the volume of outpatient activity and we therefore experienced a greater demand for transportation to life sustaining and other routine outpatient clinics.

Following the Internal Audit Review, and in line with the recommendations contained in previous internal business reviews of the PCS function, a comprehensive improvement programme was established in February 2022. The PCS Improvement Programme was developed around 8 improvement themes which, once implemented, will drive performance improvement across the PCS service.

During 2022-23 the PCS Improvement Programme has:

- Developed PCS-specific Key Performance Indicators (KPIs) to be used for performance management. PCS performance is a priority to ensure appropriate assurance at all levels.
- Introduced the KPIs to independent sector ambulance providers who are performance monitored and managed via quarterly meetings.
- Developed a PCS Dashboard available via electronic portal to managers to enable proactive performance management of the non-emergency services. The portal also includes the ability to forecast demand up to 6 weeks in advance.
- Successfully piloted a new approach in relation to Dispatch Guidance in the nonemergency control room to support a more effective and efficient use of resources whilst meeting the increasing demand for non-emergency transport. These new procedures will in turn enable greater productivity and utilisation of the resources available.
- Identified and is currently in the process implementing a Web-Based Booking system through an electronic portal to be used by the booking agents across Healthcare Trusts, providing more accurate information to the planning and scheduling teams in NIAS as well as reducing the reliance on call taking.
- Engaged with Healthcare Trusts and Primary Care representatives with the aspiration of establishing a Regional PCS Forum.
- Developed performance monitoring tools such as Heatmaps to identify further improvements in the alignment of resources to demand for non-emergency services by time of day and location.

- Engaged with our voluntary drivers across the Voluntary Care Service (VCS) and developed an improvement plan to enhance the quality of the PCS service that we deliver to our patients.
- Agreed and issued new Dispatch Guidance for the Emergency Control room when using non-emergency resources for A&E Support.

## **Emergency Ambulance Control (EAC)**

As a regional Ambulance service, NIAS operates one Emergency Ambulance Control Centre in Belfast. Every time we receive a 999 call from a member of the public or partner organisation, our call handlers or Emergency Medical Dispatchers (EMD) will use advanced bespoke software systems to assess 999 calls based on the clinical or medical information provided relating to a patient or incident. This system is known as the Advanced Medical Priority and Dispatch (AMPDS) and is used internationally and widely used by other UK ambulance services.

In August 2022, an Intelligent Routing Platform (IRP) was implemented in conjunction with the BT Emergency Operator to allow for 999 calls that are experiencing a delay in call answer by an Ambulance Service to automatically be redirected to another Ambulance Service be answered, processed and electronically sent to the appropriate Ambulance Service Control Room for ambulance dispatch. This provides additional resilience to NIAS during times of high demand and also ensures that 999 callers are provided with appropriate clinical advice and support without undue delays.

When a 999 call has been triaged, a response category and timeframe based on the Trust's Clinical Response Model (CRM) is assigned to each call. The Clinical Response Model is designed to identify patients in greatest clinical need as quickly as possible after a 999 call has been answered and then target the nearest and most appropriate ambulance resource to respond. This process ensures that all calls are prioritised and responded to on the basis of clinical need. Our systems also allow EAC staff to provide those making 999 calls with pre-arrival medical advice on dealing with a patient or incident in advance of an ambulance arriving at scene.

2022-23 was another challenging year within Emergency Ambulance Control. The volume of 999 calls being received remains at high levels. There was a slight decrease of 1.6% in the volume of 999 calls in comparison with the previous year. High 999 call demand is linked to duplicate calls following delayed responses and high abstraction rates during July, August and December 2022 were the biggest challenges within EAC in maintaining call answer performance and minimising delays.

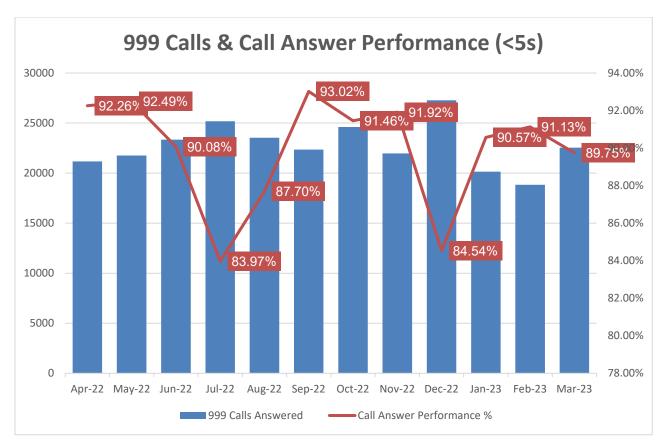

For the year 2022-23, a total of 1,999 calls were recorded as Abandoned 999 calls on the Primary 999 Line and EAC recorded 76,901 duplicate calls.

#### **EAC Call Answer Performance**

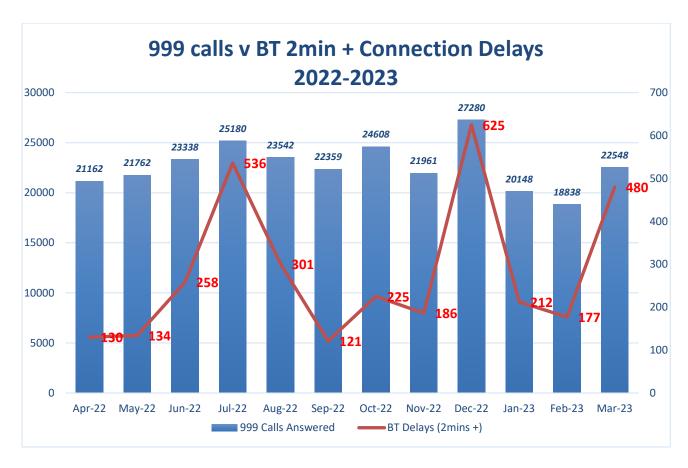

Emergency Ambulance Control aims to answer 90% of 999 calls within 5 seconds of the call being placed to NIAS by the BT Emergency Operator. From April 2022 to March 2023, 89.5% of 999 calls were answered within 5 secs.

The chart below illustrates the monthly 999 call demand and associated calls answer performance.

89.5% of calls answered within 5 seconds

The Trust also measures the number of 2 minute plus connection delays notified by the BT Emergency Operator to call answer within EAC. The chart overleaf shows the number of 2 minute plus delays by month.

#### **Other EAC Developments**

In April 2022 a full refurbishment of the Emergency Ambulance Control Centre was completed, modernising the operating environment, providing additional work stations and ergonomic desks whilst adjusting the layout to enable a more collaborative working environment.

Within EAC a priority is to stabilise the workforce and a number of recruitment campaigns have either been completed or are under way, these include:

- Emergency Medical Dispatcher EMD.
- Clinical Support Paramedic / Nurse x 2.
- Duty Performance Manager.
- Rostering and logistics.
- EMD Supervisor.
- Quality Assurance Auditor.
- Control Training and Quality Assurance Officer.

#### **EAC Compliance Standards**

One of the main objectives of Emergency Ambulance Control for 2022-23 was to improve the standard of care provided to patients over the phone before the ambulance arrives.

In early 2022 it was identified through 999 call internal quality assurance processes that our biggest learning trend was the accuracy of the final coding and response assigned to our patients.

NIAS began a project to increase the support and learning provided to Emergency Medical Dispatchers

(EMD's) within EAC by investing in the audit team to increase audits completed and improve the quality and volume of feedback provided. Face to face feedback was increased again post COVID-19 and Continuous Dispatch Education re-commenced.

By August 2022 NIAS had improved final coding accuracy by 2%, and by February 2023, 99.3% of patients were receiving the most appropriate care in the response they were assigned. NIAS overall compliance also improved and only 4% of emergency calls fell into the non-compliance bracket.

99.3% of patients receiving the most appropriate care

This improvement led to NIAS being recognised as an Accredited Centre of Excellence in January 2023 by the International Academy of Emergency Dispatch. This provides an increased level of

reassurance that NIAS EAC are providing the best possible care for the patients we serve.

# **Non-Emergency Ambulance Control**

We began 2022-23 continuing to operate under the COVID-19 pandemic restriction however as the year progressed we returned to the pre-pandemic operating model where social distancing guidelines were relaxed, allowing us to convey more patients, when suitable, in a single journey. During the financial year, we completed 158,067 journeys which is an increase of 11.2% on the previous year. These journeys where conveyed using NIAS and Independence Ambulance Service (IAS) resources along with taxis and voluntary car drivers.

158,067 journeys completed

Over the period a Voluntary Car Service (VCS) Forum has been established with a view to enhancing our proposition to voluntary drivers. The main purpose of this is to strengthen our relationship with the volunteers by increasing engagement to ensure they feel valued for the contribution they make to the patients and NIAS.

Non-Emergency Ambulance Control (NEAC) has seen a lot of development throughout 2022-23 in terms of the contribution to the PCS Improvement Plan and the installation of the new telephony solution.

NEAC where tasked with reviewing and implementing the dispatch model with a view to increasing productivity and utilisation of our resources. As part of the process, in October 2022 NEAC, in conjunction with our Ambulance Care Assistant (ACA) colleagues, undertook a 'trial' exercise in the Belfast and South Eastern Divisions. The results were very positive and as a result we moved to implementation in all Divisions on 4 April 2023.

Following the installation of the new telephony solution, NEAC went 'live' on 11 March 2023. Prior to that all staff underwent extensive training which enabled a fluid transition from one system to the other. The new system gives us the flexibility to manage skill sets locally resulting in an increase in call taking performance.

NEAC has also undergone a refurbishment with new sit/stand desks installed along with repainting and carpeting. This will provide the team with a modern, fit-for-purpose control room where they can work comfortably and safely.

International Control Week took place between 24 and 30 October 2022. This was marked with a serious of events providing an opportunity to celebrate and draw attention to work carried out by our staff 365 days per year. Events included visit by members of the senior management team, peer-to-peer recognition, novelty games, lunches and prizes.

## **Clinical Improvement Plan**

NIAS has developed a clinical improvement plan to outline a tangible clinical road map to 2026. This will define the direction, workload for the developing new posts and team within the organisation. This aligns the clinical elements from the NIAS Strategy to Transform 2020-2026 and other identified areas of clinical development:

- There have been multiple new appointments to the clinical team in the past 12 months.
   These posts are essential to develop and deliver improvements and projects in multiples areas.
- Over the past 12 months there has been a sizable ongoing project to review clinical education in NIAS. There has been good initial progress, although further progress has been challenging due to lack of resources to support the transitional team.
- There has been ongoing development of different areas of equipment including a
  bespoke response bag finalised for roll out across NIAS in 2023-24, the removal of
  micro-vent ventilators from clinical practice and the removal of intubation from
  Paramedic clinical practice.
- Airway management is a contentious issue in pre hospital care. There is a changing landscape of practice across the UK. To ensure NIAS had a defined position for this and improved governance, a position statement and clinical guidance was introduced in 2021-22. This position has undergone continual review and a decision was made to remove the practice of intubation from NIAS in November 2022. A further review of equipment provision for airway management is ongoing.

- Aligning NIAS to all UK Ambulance Trusts, we have appointed a lead pharmacist. Key developments this year include the re-tagging of Paramedic packs programme to increase efficiency, patient group directives developed for multiple NIAS medications, development and introduction of new medications for HEMS and the introduction of an advanced Paramedics Critical Care medication package.
- As a key part of the clinical improvement plan, improving outcomes for our sickest and most injured patients is key. A number of initial steps have been developed including the establishment of a cardiac arrest survival group, base line of cardiac arrest performance captured and the scoping of how linked patient outcome data could be achieved.
- The measurement of clinical practice is key to the development of all aspects of clinical practice. In the past year we have developed a clinical measurement outline framework, established focused data development groups, developed initial dashboards for pathways and we are working on development of further clinical dashboards.
- Developing our own evidence base and NIAS having a Research & Development (R&D) footprint is a key part of the development of the profession. Key steps this year include appointing a R&D Manager, NIAS representation at the National Ambulance Research Steering Group (NARSG), the first NIAS R&D Strategy (2022-2025) has been drafted and presented to senior management and seven NIAS staff are being funded to undertake the online course 'An introduction to research for Paramedics' with Monash University, Australia.
- The Advanced Paramedic Critical Care programme has been launched in collaboration with the NIAS Helicopter Emergency Medical Service (HEMS) team. The team are developing through the post graduate education programme which will take two years to complete. This will see the team work as part of the HEMS team, responding to the most ill and injured patients across the region. The HEMS team have been fortunate enough to recruit two qualified Advanced Critical Care Paramedics. This has allowed for the year 3-4 benefits to be realised in year 1 of the programme. From June 2023, we aim to provide an Advanced Paramedic in Critical Care practicing independently in the greater Belfast area. This initial launch will allow us to test the concept and plan how we grow this Advanced Practice workforce.
- 5% off all 999 patients are patients who have the need to call 999 on a regular basis. At times these patients do not have acute medical issues and have complex needs which are challenging to meet through the standard ambulance response. The established NIAS complex case team manages this workload to meet with this patients and support them through multi-disciplinary teams to find them the care that they need. This support reduces the need for them to call 999 and allows NIAS to most effectively utilise their emergency resource.
- Developing the approach to professional practice is key for all aspects of the profession. Key steps taken this year include the appointment of a Head of Professional Standards, the development of Professional Standards Group, a

professional standards programme of work defined and the development of the scope of practice.

 In line with the College of Paramedic framework and the Northern Ireland Allied Health Professional (AHP) Advanced Practice Framework, NIAS is developing its career framework. Outputs this year include the appointment of Consultant Paramedics, the appointment of Advanced Paramedics in Critical Care, the appointment of a Research and Development Manager, the pending recruitment of Research Paramedic posts and developing a plan for the introduction of Advanced Paramedics in Urgent Care.

## **Community Resuscitation**

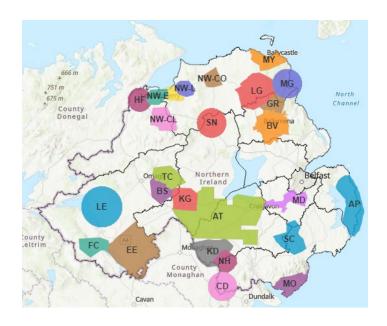

## **Community First Responders**

Our family of Community First Responder (CFR) Volunteers continues to grow across Northern Ireland. Currently there are over 360 CFR volunteers across 22 schemes. Four new area schemes have been established and trained – Glenravel, Moyle (Ballycastle area), Mid Down and Lisburn and Florence Court. The demand for new CFRs, within existing schemes that wish to

360 First Responder Volunteers

expand or new schemes to be established, are limited by capacity and resource within the Community Resuscitation Team. There are a number of areas awaiting training throughout the coming year.

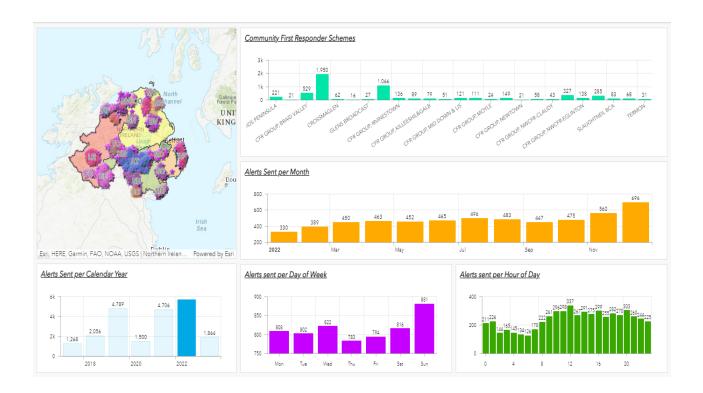

Abbrev	CFR Scheme
AP	Ards Peninsula
AT	Armagh & Tyrone
BS	Beragh & Six Mile Cross
BV	Briad Valley
CD	Crossmaglen & District
EE	Erne East
MG	Glens (Previously Mid Glens)
GR	Glenravel
HF	Heart of Foyle
KD	Keady
KG	Kileeshil & Galbally
LG	Loughiel & Dunloy
LE	Lower Erne (Includes Florence Court
MD	Mid Down & Lisburn
МО	Mournes
MY	Moyle
NH	Newtown Hamilton
NW	North West
SN	Slaughtneil
SC	SlieveCroob
TC	Termon & Carrickmore

In the past year training has been provided for 438 volunteers, 118 of which were new CFRs, within both new and existing schemes.

2022 saw the highest number of annual alerts – 5,706, this is an average of 475 alerts per month which the CFR volunteers try to attend. Their response is complementary to that of NIAS but with time playing a critical role in patient outcome, every second counts. Their arrival is advantageous to the patient and their families and friends.

**5,706** CFR alerts

#### **Automated External Defibrillators**

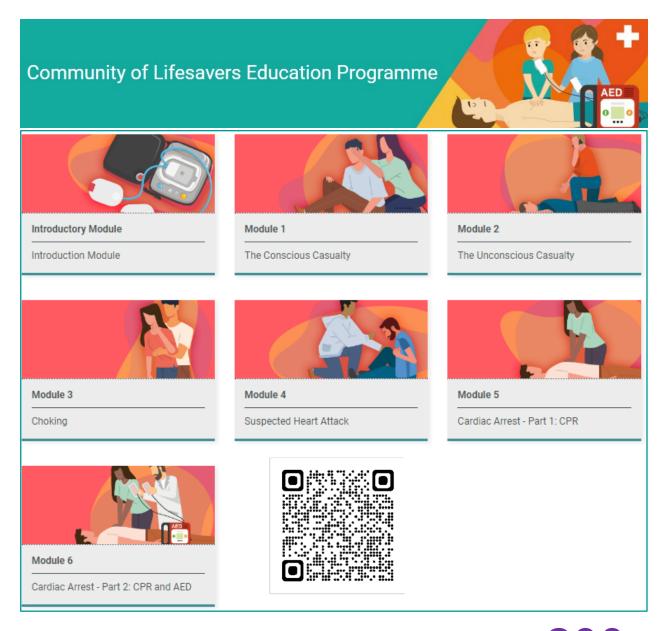

There are now over 2,700 Automated External Defibrillators (AEDs) registered with NIAS on the Circuit National defibrillator database. There has been significant work carried out, with over 50% of our Community AEDs having an information tag attached. This will enable a bystander to return the AED to its permanent location if brought to the scene of an out of hospital cardiac arrest. The tagging process is enabling NIAS to audit Community AEDs in relation to their location

2,700 AED's

and accuracy of information provided when the AEDs are registered. This information provided from the audit enabled us to shape key messages which were used in our first ever defibrillator campaign in October 2022 called 'Shoctober'. During the campaign, which ran over four weeks, over 120 new defibrillators were registered and the key messages shared with all our partners across statutory and community/voluntary organisations.

#### **Community of Lifesaver Education Programme**

In April 2022, a partnership was established with the Department of Education, Council for the Curriculum, Examinations & Assessments and the Education Authority to progress and develop resources for post primary and special needs settings. This online resource would go hand in hand with Lifesaver Ambassador training provided by the Community Resuscitation Team.

All six modules of the core programme have been developed and additional optional modules are being finalised as well as a mobile phone App for pupils to use to ensure their skills and knowledge remain current following their training. Since launch of the programme in January 2023 over 200 teachers have received Lifesaver Ambassador training.

200 Lifesaver Ambassador teachers

Northern Ireland has over 4,000 members of the public who have a minimum of Basic Life Support training and have registered to be a GoodSAM responder. These GoodSAM Responders were activated on 7 February 2023.

4,000
GoodSAM responders

## **Complex Case Team**

Evidence shows that 5% off all 999 patients are patients who have the need to call 999 on a regular basis. At times these patients do not have acute medical issues and have complex needs which are challenging to meet through the standard ambulance response. A frequent caller is defined as 'someone who calls ambulance service 5 times in 1 month or 12 times in 3

13,204 calls from 'frequent' callers

months'. NIAS received 13,204 calls from service users who meet these criteria in 2022-23.

The NIAS complex case team manages this workload to meet with patients who call frequently and support them through multi-disciplinary teams to find them the care that they need. This support reduces the need for them to call 999 and allows NIAS to most effectively utilise their emergency resource. Key steps taken this year:

- Appointment of complex case manager
- Publication in the journal of paramedic practice
- Developing continually refined data activity dashboard
- Developing partnership with British Red Cross to support complex patients in the community

Evaluation of frequent callers programme demonstrates the potential to impact on demand. For patients included in the pilot, there has been:

 63% overall reduction in demand 6 months post intervention for this cohort of patients

■ 60% reduction in calls only

• 63% reduction in ambulance responses

■ **73**% reduction in ED admissions

# **Co-production (incorporating PCE and PPI)**

In Caring today, planning for tomorrow – Our Strategy to Transform: 2020 – 2026, NIAS commits to developing its Patient Client Experience (PCE) and Personal and Public Involvement (PPI) processes and opportunities into a more comprehensive and cohesive Co-production model. Over the last 12 months we have developed and supported a range

of initiatives that enable those with lived experiences of our services to share their stories and drive sustainable and measurable service improvement.

The Trust continues to support the embedding of Care Opinion into the culture and practice of Health and Social Care in Northern Ireland and, during this 12 month period, 221 stories were published via the website. This represents a 30% increase on the figure for the previous financial year and by 31 March 2023, these stories were viewed 9,046 times.

221 stories published

On Thursday 9 June 2022, the Co-production team, in collaboration with the Public Health Agency (PHA), launched a 10,000 More Voices project, which sought to:

- Understand the lived experience of people who engage with NIAS during an urgent or emergency presentation.
- Explore experience in relation to the pathways available through NIAS.
- Identify good practice which should be enabled across the whole system.
- Seek areas for improvement, embedding the principles of coproduction and informing actions which adopt quality improvement methodology.

The project closed on Friday 31 March 2023 with 141 submissions. Partners are currently analysing the data to identify key messages and actions to be integrated into service improvement plans.

NIAS has also created a range of opportunities for front-line staff and external partners to influence service transformation. These include:

- Conducting a public consultation on the principles and practice of introducing body worn video cameras for staff.
- Evaluating the Patient Care Services' Perfect Day, during which changes to the way in which our scheduled non-emergency journeys are allocated were piloted.
- Co-producing our Quality and Safety Strategy with partners including Dementia NI's Empowerment and Support Group, the members of Age North Down and Ards (AGENDA) and Cedar Foundation's Regional User Forum.
- Working in partnership with 2 bereavement charities to co-design information literature for families that have experienced a sudden and expected death at home.
- Establishing a Research Public Involvement Committee to ensure the voice of services users, carers and members of the public are heard at all stages of the research cycle.

From 1 April 2022 to 31 March 2023, 332 individuals have been involved in the planning, delivery and evaluation of our services.

We also continue to build the capacity of staff to lead 332

service users involved in planning, delivery, and evaluation of services

and facilitate co-production activities with a further 127 individuals completing Engage and Involve mandatory training and another nine completing internal PPI training.

With the reinstatement of regional monitoring processes during this financial year, NIAS continues to address the PHA's recommendations as outlined in the PPI Action Plan, with considerable progress being made under each of the five standards of leadership, governance, opportunities and support for involvement, knowledge and skills and measuring outcomes.

#### Infection Prevention & Control

#### **NIAS IPC Service**

The Infection Prevention and Control (IPC) Service within NIAS was formally commenced in November 2019. The team consists of a Band 6 IPC Practitioner and a Band 7 Senior IPC Practitioner and an IPC Lead Nurse will commence in 2023. Through investment in IT solutions, the IPC Service has developed to be a responsive and flexible service with capacity for 7 day per week cover, including public holidays.

## **Key Service achievements April 2022 to March 2023 (Non-COVID)**

The NIAS Infection and Prevention Control Team (IPCT) has worked during this period to ensure that the service achievements of the team are aligned to the NIAS Strategy to Transform (2020-2026) – Caring today, planning for tomorrow. Work streams were planned in relation to the seven priority areas for transformation:

- **Delivering Care:** IPCT have ensured delivery of a high quality, evidence-based IPC service in line with agreed key performance indicators (KPIs)
- Our Workforce: The IPCT has and will continue to develop an IPC workforce fit to deliver a high quality, evidence-based IPC service for NIAS
- **Organisational Development:** The IPCT have contributed to QSI Directorate development and the NIAS 'Strategy to Transform 2020-2026'
- Quality Improvement: IPCT have begun to build QI capacity within own service and are utilising QI methodology when undertaking service improvement projects
- **Digital Enablers:** The IPCT has developed the NIAS IPC service offer by utilising digital enablers
- Our Infrastructure: IPCT will ensure that the team is properly constituted, adequately funded and has appropriate governance arrangements in place
- Communication and Engagement: IPC has increased awareness of, profile of and access to IPCT

# **Key Service achievements April 2022 to March 2023 (COVID)**

During April 2022 to March 2023, the Trust's Quality, Safety and Improvement (QSI) Directorate continued to provide expert IPC guidance, support and advice to the organisation, to the region and nationally.

The NIAS IPCT worked with various internal and external stakeholders to provide service, support and advice related to COVID-19 during this time. Some groups have been stood down during this time period as the COVID demands changed.

The NIAS IPCT have led on and contributed to work streams arising from various groups such as the regional Personal Protective Equipment (PPE) subgroup, the regional PPE supply chain cell, the regional IPC group, the Healthcare Acquired Infection (HCAI) and COVID-19 working group and the National Ambulance Service IPC Group (NASIPCG). The IPCT has contributed to, and supported with, guidelines and resource development nationally through NASIPCG and regionally through the IPC cell and HCAI and COVID-19 working group. The IPCT has continued to develop and cascade communications in relation to COVID-19 for use within NIAS, for example in relation to the early return to work process for staff with COVID-19 or for those who are close contacts of cases of COVID-19.

The NIAS IPCT has provided leadership and input into the management of all COVID-19 outbreaks across the organisation, into the management of staff with COVID-19 and into the management of close contacts of COVID-19.

During this time the NIAS IPCT have worked closely with the NIAS Environmental and Vehicle Cleanliness team and Operational teams to ensure that all NIAS Vehicles, Equipment and facilities are effectively and properly decontaminated.

The NIAS IPCT has been responsible for developing and ensuring delivery across the Organisation of:

- COVID-19 Testing Services
- Contact Tracing Services
- COVID-19 Vaccination programme

COVID-19 guidance was removed by the PHA and replaced with Respiratory guidance supported by the IPC Northern Ireland Manual in March 2023. The NIAS IPCT have been involved in provided update education and guidance to all NIAS staff to ensure the organisation moves safely to a service that delivers a risk assessed approach to PPE following new guidance on de-escalation of COVID-19 policies.

The NIAS IPCT have provided communication to staff, assisted with the update of risk assessments and utilised as many face to face discussions with staff regarding the changes as able.

The NIAS IPCT are proud of their achievements in this period and are looking forward to the challenges that 2023-24 will undoubtedly bring.

#### Serious Adverse Incidents

The Trust is dedicated to improving processes which identify any areas of learning & improvement within the service in order to continually grow and develop. The Serious Adverse Incident (SAI) process is an extremely vital practice which enables us to capture, identify, address and share learning and can help to reduce risk and improve our service.

During the 2022-23 financial year, the Trust reported forty Serious Adverse Incidents (SAIs) to the Strategic Planning and Performance Group (SPPG), which was an increase of fifteen (from twenty five) compared to the 2021-22 financial year. 98% related to unexpected serious risks with the remaining 2% related to serious injury to, or unexpected/unexplained death of, a service user. This increase can be attributed in part to an improved understanding of SAI criteria and the procedures for reporting of SAIs, achieved through increased training and focus in this important area. It is also attributed in part to the ongoing pressures within the service such as extended Emergency Department (ED) turnaround times, delayed ambulance response times and ongoing resourcing issues.

The Trust recognises any delays in the completion of the SAI review process is difficult for service users, carers and families of service users as well as the impact on staff. Significant delays in SAI reviews concluding creates a risk that important learning may not be identified and acted on appropriately or in a timely manner. The Trust weekly Rapid Review Group (RRG) is attended by Directors, Assistant Directors and Senior Managers from relevant Directorates across the Trust and continues to monitor and assess the review of SAIs to maximise the potential for identifying and sharing learning as quickly as possible. This supports learning being appropriately escalated, assurance provided on action, supports disseminated early learning and minimises delays.

The Trust acknowledges that our service users, and their families, have a right to expect openness and honesty in the assessment of their care and the Trust is committed to providing candour in relation to SAI's. It is Trust policy that, when a SAI has been reported, the review officer should involve the service user/family/carer at the earliest opportunity and this has been an area of renewed focus throughout the year. Improvements against the KPI in this area have been noted in the last quarter of the year with 100% achieved.

A regional policy on 'Being Open' has been adopted for use in the Trust and was approved in November 2021. The organisation is committed to improving the safety and quality of the care we deliver to the public. This policy expresses this commitment to provide open and honest communication between staff and a service user (and/or their family and carers) when they have suffered harm as a result of their treatment.

Trust Directors have a responsibility to ensure that learning from SAIs occurring within their areas of responsibility is communicated and applied. The recent implementation of Directorate dashboards on the Trust Datix system has improved and simplified this process and has shown a marked improvement in the implementation of SAI recommendations. The SAI team have also been working to evidence completed recommendations for assurance of implementation with 57% already achieved.

SAI training is currently provided to all staff involved in the review of SAIs. A two day SAI Masterclass was provided to all staff involved in the review of SAIs in 2021. This has been supplemented this year with a Trust internal SAI training programme attended by twelve Divisional managers which focussed on Trust specific requirements. A further one day training session is planned for April 2023 with a further sixteen Divisional managers scheduled to attend.

## Service User Feedback Team (SUFT) Overview

NIAS recognises the importance of feedback received from our patients, patient's relatives, carers, advocates and other service users as a driver for learning and continuous improvement. The SUFT's role is to ensure feedback received is managed appropriately and within the timeframe set by Department of Health.

## **Complaints, Compliments and Enquiries Received**

		Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Total

#### Facts & Figures

In the year 2022-2023:

- 208 complaints were received (22% decrease on previous year). This represents a complaint rate of 0.06% of all (349,112) emergency and non-emergency ambulance attendances.
- 99% of complaints were acknowledged within 2 working days (2% increase on previous year).
- 277 complaints were closed (5% increase on previous year)
- 36% of complaints were responded to within 20 working days (19% decrease on previous year).
- The top three issues of complaint were Transport, Late or Non-Arrival/Journey Time, Staff Attitude/Behaviour and Quality of Treatment & Care.
- 406 compliments were received (8% increase on previous year).

We welcome complaints so that we can learn lessons and improve our services. Some of our notable quality improvements include:

#### **Emergency Ambulance Control**

- Role of the Mental Health Street Triage Team (MATT) in the South Eastern and Belfast HSC Trust areas provided to the clinical hub and Duty Control Managers.
- Data error from Land and Property Services rectified to ensure the Gazetteer (the geographical directory used in ambulance control systems) is accurate.
- System fault rectified and defibrillator range standardised for all community defibrillators.
- Learning letter to ensure all key information is recorded and shared with crews to assist with their response.
- Microphone mufflers sourced for Emergency Ambulance Control (EAC) call taker headsets to reduce background noise heard by callers.
- Learning shared to ensure operational staff are updated when a call originates as a Healthcare Professional (HCP) call.

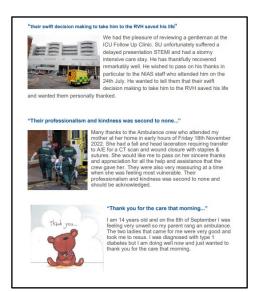

#### **Accident & Emergency Operations**

- Medicines memo reinforcing the NIAS Policy and Procedures for the Management of Medicines.
- Obstetric learning article.
- Vital signs article regarding assessment of patients with learning difficulties.

#### **Patient Care Service**

- Learning for independent ambulance service provider regarding the safe handling of patients' medication.
- Ensuring restraints for securing items in the back of Patient Care Service (PCS) vehicles are present in all vehicles regionally.
- Independent ambulance service provider's social media policy updated.
- Reminder to independent providers regarding performance requirements.

The positive feedback received from compliments also helps us further enhance our performance, the patient experience and the quality of services we provide. Compliments are shared with the staff they relate to and this year we have introduced a weekly bulletin on the compliments received for all NIAS staff to be able to hear the positive feedback the organisation receives.

In addition to this the team have also provided drop in training sessions for Station Officers, reviewed and

updated the Complaints Policy and procedures, developed the Complaints Procedure for Independent Ambulance Providers who contract with NIAS and engaged with the National Ambulance Service Patient Experience Group (NASPEG) to facilitate sharing and learning through concerns, complaints & compliments on a national level.

## **Quality Improvement**

In the past year the Quality, Safety and Improvement (QSI) leads have represented the Trust at local, regional and national groups across the wider Health and Social Care (HSC) and Ambulance Service networks. As part of the regional Health and Social Care Quality Improvement Hub, there has been an opportunity to present our Falls Improvement project work as part of the 'Timely Access to Safe Care' collaborative.

Working in collaboration with our colleagues in the other HSC trusts to mitigate the risk of harm to patients resulted in the development of a regional procedure to standardise the pathway for the escalation of the deterioration in a patient's clinical condition to Emergency Department (ED) staff.

A series of visits to EDs throughout the year provided opportunities to engage with staff to seek their feedback on new initiatives, explore their ideas for improvement and to identify what matters to them. This has informed the development of QSI initiatives. We have valued their input and feedback and will continue to provide opportunities for future sessions.

We continue to support staff through QI programmes which introduce the methodology and applications of QI and how it can be integrated across all areas of work to improve outcomes for patients and staff in an evidence based and measurable way.

Seven staff were enrolled on the Quality4U programme, formerly the Safety, Quality and Experience (SQE), with a range of exciting improvement projects being established including

Standardisation of Paediatric Response Bags, Improving Vehicle Maintenance Schedules, FIT testing, Falls Response, Body Worn Cameras and Appropriate Care Pathways.

A further two staff have went on to a level three qualification with the Scottish Improvement Leaders programme. This builds upon existing knowledge and skills to allow graduates to lead projects for improvement.

A programme of mentoring and support has been established for these programmes and our ambition is to establish regular QI clinics where any member of staff can come to discuss improvement ideas or become involved in quality and safety projects.

## **Transformation and Improvement Programmes**

Work has continued during 2022-23 on the delivery of Caring today, planning for tomorrow – Our Strategy to Transform: 2020-26.

This is an ambitious transformation strategy that sets out how we can address our current challenges, and how investment in our services will enable us to transform and bring tangible benefits to patients, the HSC system, our workforce and the communities we serve over the coming decade.

Under a governance structure led by the Strategic Improvement Group (SIG) the Strategic Transformation Portfolio is being delivered via a series of Transformation and Improvement Programmes involving elements of change and innovation across the organisation. The current Transformation/Improvement Programmes are:

#### **Strategic Review of Clinical Education**

This programme has been established to provide a comprehensive review of how clinical education, supervision and support can best prepare our staff to meet the current and evolving needs of our patients. With the aim of providing a consistent, high quality clinical care in the pre-hospital environment. Following the implementation of a new management structure for the Regional Ambulance Clinical Training Centre (RACTC), the improvement plan is being refocused to best facilitate implementation of the remaining workstreams via this new structure.

#### **REACH**

The REACH programme is mandated to drive forward the technologies that will better connect our clinicians, connect our patients, supporting quality and safe patient care through the implementation and use of ePCR (electronic Patient Care Records) and access for clinicians to NIECR (Northern Ireland Electronic Care Records).

The Development of an Electronic Patient Care Record (ePCR) is part of REACH, to date over 700 Emergency Ambulance staff have received training in this and 10 of the 14 Acute Hospitals are now equipped to receive ePCRs.

700 +
staff trained in REACH
10
hospitals can receive ePCR's

This programme is at an advanced stage with a few challenges remaining to facilitate its full implementation:

- Rolling out the ePCRs capacity to all 14 acute hospitals.
- To continue to maximise the use of ePCR amongst our staff.
- Improving significantly the creation of ePCRs on all emergency callouts.
- The use of MobiMed software for alternative care pathways other than conveyance to hospital. This work stream is developing with software upgrades expected for testing early in 2023-24.

#### **Human Resources and Organisational Development**

The aim of this Programme is to transform the HR & OD Directorate that delivers proactively and responsively to assist the Trust in delivering on its strategic objectives. The programme is currently working to a four year improvement plan that will reach key milestones during 2023-24. Key priorities within the plan include a focus on Staff Recognition and Leadership Development, modernising HR systems and delivery of a Health and Wellbeing Strategy and Culture Improvement programme.

#### Telephony Integrated Command and Control System (ICCS) Replacement

Delivered as part of the REACH Programme this project will replace this core technology to enable NIAS to continue to fulfil its statutory responsibilities in providing an emergency response service.

Telephony system is in the implementation phase which consists of staff training and a phased "going live". The NEAC (Non-Emergency Ambulance Control) went live with the new system in March 2023 with further roll-out milestones planned for early 2023-24.

#### **CAD Replacement**

The CAD (Computer Aided Dispatch) Replacement Project has the objective of ensuring a continuation of and smooth transition to new CAD system. The associated Business Case received approval from the Department of Health (DoH) late in 2022/23 and focus of the Project has now switched to progressing through the formal procurement processes with PALs.

#### **Patient Care Service (PCS)**

The early focus in this programme relating to Patient Care Services (non-emergency services) has been on ensuring the data was available to properly assess the demands and performance of the service and then devise potential changes to better address the needs and challenges facing the Service. The agreement of a set of Key Performance Indicators (KPIs) gave the baseline for objective evaluation of the service and identified where the ongoing focus for improvement needs to be directed.

Key to this planning stage was a trial implementation of some new planning procedures in Non Emergency Ambulance Control (NEAC) in October 2022, in an effort to improve our overall PCS performance in terms of our utilisation and productivity levels and ultimately to improve the quality of service delivered to our patients. This became known as "Perfect Day".

Evaluation of this trial which was conducted in the Belfast and South Eastern Trust areas indicated how some changes to how the booked Journeys where allocated to the PCS crews had a positive impact on:

- The number of patients that got to their appointments on time.
- The number of journeys completed by PCS.
- The length of time that patients waited in hospital to make their return journey.
- Patient satisfaction with the service they received on the day.

Moving on to the implementation phase, these new changes to how the Service operates are being rolled out on a permanent basis across the province from April 2023. Implementation of other aspects of the Improvement Plan will follow early in 2023-24.

Overall the NIAS Transformation Programme will continue to evolve and new programmes and projects will be added to the programme where required. The Transformation Team will continue to provide the support and resource to help NIAS realise its corporate ambitions as outlined in the Corporate Plan "Caring for Today Planning for Tomorrow - Strategy to Transform 2020-2026".

## **Information Governance Compliance**

In NIAS, information governance is the framework of legislation and best practice guidance associated to the UK General Data Protection Regulation (UKGDPR)/Data Protection Act 2018, the Freedom of Information Act 2000, Access to Health Records (NI) Order 1993 and the duty of confidentiality that regulates the manner and way in which we collect, obtain, handle, use, share and disclose information.

The Trust recognises that information is required every day across the Trust to discharge our services and understands that we hold high levels of personal information. The Trust uses this information in many ways:

- To respond effectively to emergencies.
- To ensure that non-emergency patients are taken to hospital appointments.
- To ensure continuity of care for patients we are treating.
- To support clinical research.
- To support emergency planning.

We also understand that we need a defined structure for handling personal information in a confidential and secure manner to appropriate ethical and quality standards. This includes ensuring that information risks are managed in a robust way across the Trust. This is why we train staff in information governance areas, appoint specific roles across Directorates to support this, develop Privacy Notices, consider privacy impacts/risks at early stages of service change and ensure that a suite of policies and procedures exist that fully outline accountability and responsibilities.

The Trust participates in a regional forum for Governance in Health and Social Care (HSC) organisations to meet on a regular basis known as the Information Governance Network (IG Network). Its purpose is to meet the challenges of Governance in a shared and co-ordinated

way, to disseminate learning and to provide focus for discussion of Information Governance matters. The group will promote best practice standards in Information Governance.

We hold information on patients, clients, suppliers, other Trusts, Coroner Service for NI, the Police Service of Northern Ireland, the Police Ombudsman, Solicitors, Coroners, and other stakeholders, as well as our staff. The Trust uses this information in an appropriate manner to provide assurance on the level of care and service provision we deliver to our patients and for planning and business continuity. Good quality information forms the basis of high quality care and we understand the importance of this.

The Trust works with the Information Commissioner's Office (ICO) to resolve any complaints received about how the Trust handles data. In accordance with legislative requirements data breaches have to be reported within 72 hours to the ICO. NIAS as data controllers continue to collaborate with HSC colleagues regarding any incidents that the Trust is alerted to and that have the potential for risk or any impact on staff, patients, information or services at NIAS.

Cyber Security remains a high priority for NIAS as the threat from hostile actions are increasing in number and becoming more sophisticated in their approach. The Trust places the utmost importance on the security and protection of data and information in order to ensure that confidential patient information is protected and that the network and applications are available to users. We continue to work in partnership with the other HSCNI organisations through the Regional Cyber Security Program Board to identify agreed areas for improvement and to prioritise resources to address these.

NIAS continue to work with Internal Audit to test compliance with the National Cyber Security Centre (NCSC) Ten Steps to Cyber Security. NIAS continues to focus on developing the capability to manage network security. Since the outbreak of COVID 19 the capacity for concurrent users working from home has increased significantly with the amount nearly tripled. Extra Licenses, Key fobs and Server Capacity to support this was made available; and policies concerning User Password Requirements/Duration have been reviewed in line with best practice and NCSC guidelines.

The challenge for NIAS and the HSC as a whole is to be prepared to minimise the impact of any cyber-attack and to ensure access to data is only available to authorised individuals and is controlled and monitored to maintain safety and confidentiality.

#### **Workforce**

## **Supporting Our Staff**

During 2022-23 the Trust undertook engagement with staff around the development of a Health and Wellbeing Strategy and culture programme. The focus of this was to understand what was important to staff. This informed the related work during the year on Health and Wellbeing and Leadership Development.

#### **Leadership Development**

The Trust engaged HSC Leadership Centre to deliver a first cohort of a bespoke Leadership Development programme. 13 People undertook this programme which will be evaluated to inform the Trust's onward approach to Leadership Development within the organisation.

#### Health and Wellbeing 2022-23

The NIAS Health & Wellbeing Strategy comes at a time when we are emerging from a global pandemic, with rising health inequalities and health challenges, with restricted resources and budgets and depleted workforces. Caring for our employees has never been more critical in delivering effective services.

Central to the NIAS Healthy People, Healthy Place wellbeing strategy is the aim to deliver support services to employees with a focus on trauma prevention and support, with consideration for promoting psychological and physical wellbeing, and ensuring that services are available to provide support at times of psychological distress and mental health difficulties.

The aims of the strategy are to create and embed a culture of health and wellbeing in the organisation, maintain and develop psychological, emotional and social health, improve mental health outcomes and maintain and develop physical health. One of the key elements that emerged from colleague listening events was the importance of prevention of harm and ill-health and the promotion of health and access to services.

#### Aim 1-Create and embed a culture of health and wellbeing in the organisation

Promoting compassionate approaches to caring for colleagues is as central to the health and wellbeing and culture programme as it is to patient care. The Compassionate Peer Relationships (CPR) programme developed and delivered by Dr Sarah Meekin developed capacity for the approach among line managers. This was developed further through a leadership programme with the Leadership Centre that included workplace coaching and a focus on compassionate leadership. The concept of a compassionate approach to the workplace brings compassion into every grade and domain in the workplace so that regardless of grade or seniority, compassionate leadership is everyone's business.

NIAS continues to collaborate with partners across health to improve health outcomes for HSC staff as part of the Regional Workforce Wellbeing Network and the HSC Healthier Workplaces Network. Access to ambulance service specific support and resources are part of the Regional HSC staff wellbeing resource website launched this year. The healthier workplace network continues to support access to resources for all HSC staff such as the recent financial wellbeing webinar.

NIAS worked with colleagues in the Western Health and Social Care trust to host Dr Deborah Lee to share her expertise and experience of using a compassionate approach to improve staff wellbeing and patient outcomes. Over 600 colleagues across HSC registered for the webinar showing the interest in Dr Lee's research and practice at Berkshire Healthcare NHS Trust and the positive impact the approach has had over four years. Participants on the webinar heard how a compassionate approach has helped, practical solutions and staff burn out

600
colleagues discussed compassionate approaches to staff wellbeing and burn out

and what the challenges and enables are for embedding the approach.

With a focus on support across the work span, this year saw the first in a series of information events to explore the formation of an association of retired personnel. Retired colleagues shared ideas about what an association could do to support staff coming up to retirement and retired staff.

Aim 2-Maintain and develop psychological, emotional and social health, improving mental health outcomes

Some of the known risk factors associated with working in emergency services includes increased risk of suicide, in particular male paramedics. Sadly, NIAS staff often are often exposed to suicide as well as bereaved families at the scene during their careers. Responding can have a direct impact on the mental health and well-being of everyone involved.

Staff confirm the outcome of extensive research that found responders can feel anxious about how to respond. NIAS staff welcomed Responding To Suicide (RTS) training supported by the Public Health Agency. The training is evidence and practice-based, and informed by the lived-experience of both emergency service personnel and those bereaved by suicide. It provides guidance for staff on how to respond to suicide more effectively, which can be applied in a practical sense.

Seventeen colleagues gained training to deliver suicide prevention 'SafeTALK' and they have delivered the training to almost 100 colleagues in the first year of the programme to increase the number of NIAS staff who are suicide alert.

100 SafeTALK trained staff

ASIST suicide intervention training supports participants to recognise when someone may have thoughts of suicide and how to work with them to create a plan that will support their immediate safety. The NIAS training team commissioned an ASIST train the trainer course to increase organisational capacity to develop intervention skills and knowledge though delivery of ASIST.

234 staff engaged in #timetotalk As part of the 2023 Time to talk day the Wellbeing and Peer Support team & volunteers visited stations and A&E to talk and listen to colleagues about mental health using the Ambulance Mental Health Continuum. The teams visited Coleraine, Newry and Craigavon, Enniskillen, Ulster, Royal and Antrim A&E, Altnagelvin and NEAC and headquarters

and EAC. Of the 234 colleagues who engaged with the Mental Health Continuum to explore how they were doing, 10% shared that they were thriving, 54 % were surviving, 31% struggling and

5% were in crisis. The day was also an opportunity to promote the recently launched Ambulance Staff Charity Crisis line and raise awareness of NIAS support.

In the past year we have contributed to the resilience of the NIAS Peer Support service by training 18 colleagues on Critical Incident Stress Management (CISM) support. The aim is to have colleagues trained across every division and Emergency Ambulance control to support peers following a critical incident. We continue to work towards NIAS being a trauma informed organisation that supports staff, volunteers, retirees and friends and family of colleagues.

#### Aim 3-Maintain and develop physical health

Support hubs continued operation across the trust sites to enable staff to have some time to rehydrate, rest and re-energise. In summer 2022, twenty-seven NIAS colleagues undertook a virtual Couch to 5K programme supported by the NIAS wellbeing team and a coach from Athletics NI. Almost one third of participants completed a 5K at the end of the programme with others continuing training towards the goal. Participants reported increases in both physical and psychological health because of taking part in the training programme.

In October 2022, the Public Health Dietitians group surveyed NIAS staff on aspects of nutrition. The most requested topic was nutrition for shift working. The team developed and delivered a practical workshop with lots of tips and small changes that can improve health. The Menopause café series this year also focused on nutrition, deficiencies to address in menopause, adrenal support, foods that help when working shifts and what foods help to support the transition. We also hosted an information event on NIAS on the physical, psychological, emotional and social impact of menopause.

Horticulture therapy programme at Blossoms at Larne Lough continues to benefit colleagues who attend both physically and emotionally. This year, thirty-four staff attended three eight week courses designed to develop skills in horticulture and encourage improved mental health. The comment from one participant sums it up - 'This course has taught me so much about myself, my health and my surroundings'. This year Blossoms opened their garden to facilitate team work and welcomed teams from emergency ambulance control. The programme supported the teams to develop knowledge and 'grow' their appreciation of the impact of the environment away from the busy control room.

In 2022-23, supporting staff experiencing, or at risk of experiencing, issues such as moral distress or emotional and physical burnout was a priority. Whilst efforts to support staff to maintain or develop physical and psychological health remain high priorities the year ahead will see a renewed focus on organisational factors. As we grow our understanding of workplace health and the impact of the pandemic on people and our system future interventions and support will consider the influence of teams, leaders and managers and the impact of organisational culture on health and wellbeing outcomes.

## **Clinical Education and Training**

Despite widespread healthcare and ambulance service pressures in 2022-23, the clinical education team continued to deliver high quality, engaging and valuable education and divisional clinical support, as outlined by the examples below. The Regional Ambulance Clinical Training Centre (RACTC) began to deliver more face-to-face clinical education as COVID-19 restrictions began to ease, which was welcomed by both tutors and students alike, and divisional education teams were able to deliver more face-to-face CPD opportunities.

**Associate Ambulance Practitioner (AAP):** In April and May 2022, students completed their emergency driving qualification. A further cohort of students began in May 2022 and twenty-one individuals were successful in completing the academic aspect of their programme by October 2022 and continuing to their practice placement element within division.

**Paramedic:** The final cohort of the Foundation Degree programme in partnership with Ulster University was completed with thirty-six successful students completing the FdSc programme and gaining entry to the Health and Care Professions Council register. A twelve month programme of support and clinical supervision was developed to empower these individuals to develop their practice and demonstrate their transition from 'novice' to 'expert'.

**Newly Qualified Paramedic (NQP):** In line with national principles, NIAS devised and delivered a structured programme to integrate and support NQPs into ambulance service workplace. In total 9 NQPs joined NIAS, all at various stages on their NQP journey in 2022-23.

**Qualified Induction:** During September & December 2022 and January 2023 orientation and local induction programmes for nineteen externally qualified paramedics were delivered.

**Continuing Clinical Education (CCE):** With the introduction of the new REACH digital devices in 2021-22 the education team continued to deliver the CCE training days across 2022-23 with a further 149 staff updated. One final Ambulance Care Assistant (ACA) CCE day was also provided, ensuring that all ACA staff had the opportunity to participate in this education day.

As part of a wider programme of improvement, the education team, in collaboration with NIAS clinical service improvement leads, community resuscitation team and research lead, developed the syllabus for an 'Out of Hospital Cardiac Arrest Masterclass'. This was delivered to thirty-six of the key clinical educators in NIAS and will continue to be delivered to all patient facing staff over the next ten months as part of CCE.

**Continual Professional Development (CPD):** Several CPD events were delivered throughout the year 2022-23. CPD events, in collaboration with HSC Trusts, focussed on learning and developing knowledge of existing patient care pathways that NIAS clinicians can directly refer patients to, for example, Regional Hospital at Home teams. The impact of these CPD events were demonstrated in the increasing number of referrals made by NIAS clinicians on these specific care pathways and the number of patients accessing appropriate and timely care, who may have otherwise presented at the emergency department.

Education team development was also a focus of 2022-23 with four clinical training officers completing their emergency driving instruction qualification (DERADI).

There were a number of 'Moving People Train the Trainer' courses provided with a total of twenty-four of the education team and four individuals from the other departments successfully completing this qualification. In addition, update training for existing Moving People Instructors were provided with a total of thirteen education team staff completing this.

Two 'Conflict resolution Train the Trainer' courses were provided and a total of ten from the education team successfully completed these.

Equipment related 'Train the Trainer' courses were provided ensuring that a further twenty-six members of the education team were able to provide expert instruction in these areas.

In conjunction with the Health and Well Being team, three clinical support officers completed the Applied Suicide Intervention Skills Training (ASIST) train the trainer course.

## **Management of Sickness Absence**

Absence owing to sickness has continued to increase presenting daily challenges to maintain service capacity at optimum levels and mitigate risks to operational cover and the ability to respond in a timely manner.

In 2022-2023 the cumulative absence for the Trust was 12.30 %. It is also acknowledged that sickness absence levels remain higher than average than across the HSC and NHS Trusts, with NIAS at the highest levels. The percentage of short term to long term sickness absence remains 20% and 80% respectively.

NIAS recognised that although this concern has existed for a number of years, COVID-19 did impact on absence levels. However, since 1 October 2022, all Covid-related illness are recorded as any other sickness absence by all HSC organisations and paid in accordance with the Agenda for Change Occupational Sick Pay arrangements. This has helped NIAS understand the true impact of sickness absence for the first time in two years.

In September 2022, the Senior Management Team decided to tailor its approach to this issue and established a Maximising Attendance programme of work for one year (subject to a one-year review). This has resulted in a comprehensive redesign of management processes and Human Resource (HR) support. The Programme also expects improved accountability systems via line management processes. The Operations Directorate is where challenges to capacity are experienced most acutely, and this Directorate was prioritised from January to March 2023.

It is accepted that it will take time for managers to become accustomed to the new ways of working. The last quarter of 2022-23 focused on learning about the new skills, a revised format of HR support, clarity about accountability and leadership skills. The HR Maximising Attendance Team developed and introduced a bespoke system of case prioritisation and management to ensure that managers know how to focus their time on inputs that will have maximum impact and how they will be accountable for the outcomes.

The work also depends on setting health and wellbeing at the core of all interventions and the strategic approach. It is known that the level of stress and potential for trauma is high and predictable in any ambulance service and mental health as a cause of absence in NIAS has increased. The work of managers is intended to change from procedural inputs in isolation to a more purposeful and holistic approach.

As 2022-23 ended, operational managers had completed workshops on the new approach. It will take time, practice and challenge to embed the new systems and give confidence in applying them. It has been important to retain the Attendance Adviser role who provide support in Divisions by their presence and accessibility to line managers and vice versa.

In addition to looking at the individual reasons for absence and application of related management processes the following key initiatives will be within the scope of the project:

- Leadership responsibilities and accountability across the Trust in relation to maximising attendance.
- Robust Redeployment processes for staff who are no longer able to undertake their role due to health.
- Specific focused initiatives related to the highest reasons for absence, for example mental health support and intervention.
- Review of information related to the wider causation factors within the wider working environment context that have the potential to impact on absence figures.
- Review of best practice across ambulance, emergency services and other sectors.
- Focus on extant arrangements related to occupational health provision.

## **Violence & Aggression**

Unfortunately, incidents of violence and aggression against NIAS staff continue to increase. In 2021, The Management of Aggression Working Group (reporting to the Health and Safety Committee) developed a Violence Prevention and Reduction Strategy which will ensure that victims are central to the process and that there is adequate support for those engaging with the criminal justice system. There are a number of workstreams under the Strategy, including the implementation of Body Worn Video Cameras for operational staff at higher risk of violence and aggression. With regards to Body Worn Cameras, the Trust carried out the following:

- Regional and national benchmarking.
- Development of a business case.
- Data Protection Privacy Impact Screening and Assessment.
- Rural Needs Assessment and Equality Screening.
- Two full public consultations (including significant Trade Union engagement, staff engagement and public meetings). Easy Read Documentation made available.
- Engagement with Digital Health and Care Northern Ireland (DHCNI).
- Engagement with the Department of Legal Services.
- Engaged with Human Rights Commission and Information Commissioner Office.
- Engaged with Health Committee.
- Full review of internal assurance and governance arrangements.
- Development of Policy, Procedures and Training Package.
- Development of Job Description and appointment of Violence Reduction Lead (first role of its kind in HSC in Northern Ireland).
- Pilot at one ambulance station, followed by deployment at five further stations, followed by regional roll out.

NIAS is now supporting other HSC Trusts scope their requirements with regards to Body Worn Video.

How?

Reduce incidents of violence and aggression towards our staff By raising awareness and improving corporate arrangements

Because violence and aggression is not part of the job!

# **Corporate Challenges**

# **Financial Resources and Performance**

#### **Revenue Resources**

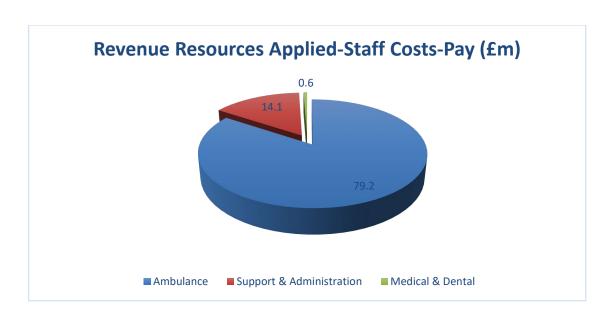

The Strategic Planning and Performance Group (SPPG, formerly The Health and Social Care Board - HSCB) provide the majority of the revenue resources available to the Trust through the Service and Budget Agreement. This sets the service activity and outcomes to be delivered within the Revenue Resource Limit that is made available to meet the Health and Social Care needs of the population. The total revenue resources available to the Trust for the last six years are shown below.

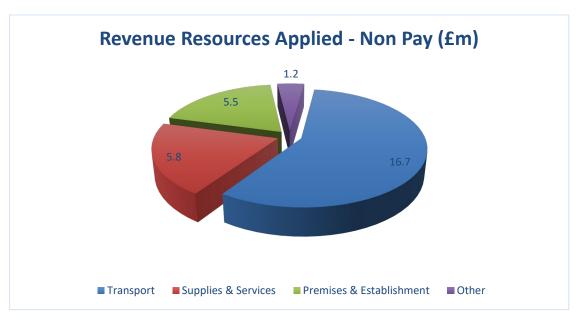

The resources available each year can vary due to a number of factors, for example supported developments, support for unavoidable costs pressures and the level of cash releasing efficiency savings required. This increase is due to a number of supported developments, for example continued investment in the implementation of a foundation degree programme for Paramedics and training of significant numbers of Associate Ambulance Practitioners (Emergency Medical Technicians) and Ambulance Care Assistants. This year also included significant additional allocations to support the response to COVID-19.

## **Revenue Expenditure**

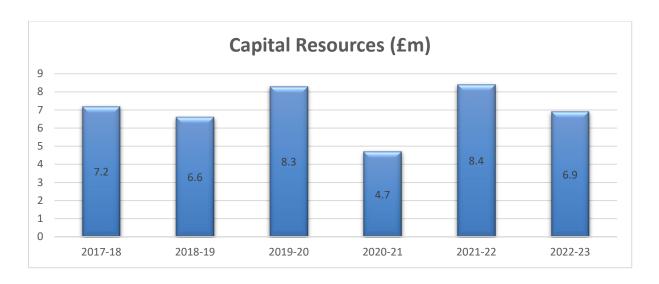

These resources are applied to provide the full range of services provided by NIAS. £93.9m (76%) of total expenditure in the Ambulance Service is on staff costs and the vast majority of this expenditure is on front line Ambulance Service provision. Non pay expenditure of £29.2m (24%) is largely made up of the costs of Voluntary and Private Ambulance Services, running the ambulance fleet, clinical and non-clinical services and supplies and premises and establishment costs. The breakdown of expenditure between these areas in 2022-23 is shown overleaf.

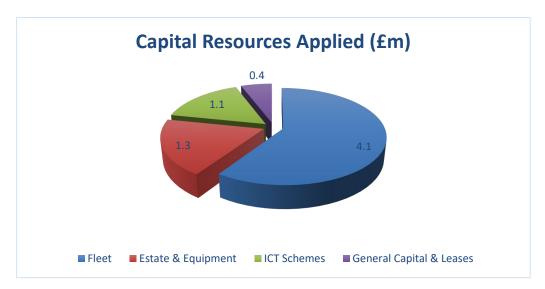

# **Capital Resources**

The Department of Health (DoH) provide capital resources to the Trust through the Capital Resource Limit. This is based upon a number of factors, including overall resources available and the prioritisation of schemes across all Health and Social Care bodies. The total capital allocations made to the Trust for the last six years are shown overleaf.

## **Capital Expenditure**

These resources are applied broadly across the areas of Fleet, Estate, General Capital and IT and Information Communications and Technology. A breakdown of the £6.9m expenditure in 2022-23 between these areas is shown below. Trust was able to continue significant improvements to fleet, the ambulance estate and ICT infrastructure.

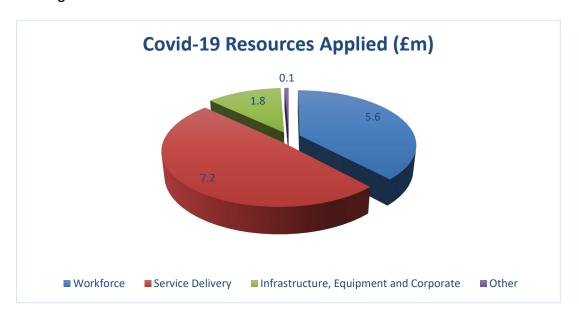

# **Covid-19 Expenditure**

The Northern Ireland Executive and the Department of Health have undertaken major programmes of work to respond to the COVID-19 pandemic. The Trust worked collaboratively with multi-agency partners throughout the period of the pandemic to put in place a range of measures in order to protect the health of the people of Northern Ireland, to protect staff in the context of the COVID-19 emergency, to ensure that local services were maintained as far as possible and that enhanced arrangements were in place during this major event.

There was extensive engagement with other HSC organisations and SPPG/DoH in planning to meet the response to Covid-19 and identify all additional expenditure related to the response.

Included in the revenue resources outlined above is significant revenue financial support from SPPG/DoH totaling £14.7m specifically for the response to Covid-19. This was applied across a range of areas shown below.

Workforce included additional staff costs for ongoing ambulance provision, overtime, food for staff and also vehicle cleaning. Service delivery related to the additional provision of Voluntary and Private Ambulance Services. Infrastructure, Equipment and Corporate includes additional estates related costs, personal protective equipment and cleaning of premises, vehicles and equipment. Other costs are largely increased costs in relation to enhanced payments to staff agreed as part of the Regional Covid Rapid Response Payment Scheme.

In addition to these specific Covid-19 resources, much of the efforts and resources of the Trust were focused on the response to the pandemic. Where normal services could not be provided, these resources both physical and financial were redeployed to support the Covid-19 response. The Trust also benefitted from support, donations and gifts from charities, suppliers and the public during the year.

The impact of Covid-19 remained a significant pressure in this financial year and will remain an issue in 2023-24 and beyond. The response could not have been provided without the support of SPPG/DoH, colleagues across the Health and Social Care system, staff, volunteers, charities, suppliers, patients and the public.

The Trust did not incur any significant additional costs in respect of the EU Exit.

# **Prompt Payment of Invoices**

The Trust is required to pay non-Health and Social Care trade creditors in accordance with the Better Payments Practice Code and Government Accounting Rules. From 1 April 2015,

the scope of the prompt payment compliance measurement increased to take account of all categories of supplier payments made by Trusts, with the only exception being payments made to other organisations within the broader HSCNI.

The target is to pay 95% of invoices within 30 calendar days of receipt of a valid invoice, or the goods and services, whichever is the latter. A further regional target to pay 70% of invoices within 10 working days (14 calendar days) is also in place. The Trust has implemented and maintained a range of plans to improve and maintain performance in this area, which has resulted in sustained improvements over recent years. This year NIAS was again able to achieve both the 70% and 95% targets. The Trust will continue with efforts to maintain this level of performance in 2023-24.

	2022-23		2021-22	
	Number	Value	Number	Value
		£000s		£000s
Total bills paid	30,652	66,625	33,978	66,079
Total bills paid within 30 days	29,623	64,214	33,034	64,512
% of bills paid within 30 days	96.6%	96.4%	97.2%	97.6%
Total bills paid within 10 days	23,166	52,709	28,162	55,235
% of bills paid within 10 days	75.6%	79.1%	82.9%	83.6%

The Trust paid no compensation or interest as a result of payments being paid late during the financial year (2020: £nil).

# **Long Term Expenditure Trends and Plans**

In common with the rest of the Public Sector and with the Health and Social Care system, 2022-23 has been another year of significant challenge. The Trust has delivered against a range of statutory and regulatory financial duties during the year. Overall, expenditure levels were over £131 million (including non-cash items – see Note 3 of the Annual Accounts). This was against a backdrop of financial savings. Cumulative savings of £2.6m million were required from NIAS for the 2022-23 financial year. This savings target was achieved through a range of non-recurrent measures and support from SPPG. The Trust will continue to work with all stakeholders to achieve required savings while maintaining safe and effective care to patients.

With the support of the DoH and SPPG, the Trust also delivered a significant programme of training as well as the Trust's continued response to COVID-19. Overall, the Trust delivered a small surplus of £110k, made up of an operational surplus of £24k and receipts from the sale of assets of £86k. 2022-23 is the first year that the sale of assets, consisting of end of life vehicles, has been included in the overall surplus position.

The Trust also benefited from £6.814 million of capital resources. This included the replacement of ambulance vehicles and investment in estate and information and communications technology that is more and more an integral part of modern healthcare delivery. Cumulative capital expenditure for the year was £6.812m, which represents an underspend of £2k.

Looking ahead, the Trust faces a range of financial pressures. The introduction and

consolidation of a range of developments, for example the introduction of the new Clinical Response Model (CRM), will continue to have financial implications for the Trust. There will be ongoing requirements to deliver cash releasing efficiency savings in 2023-24 and additionally, some resources provided non-recurrently during 2022-23 will need to be reviewed in 2023-24. Levels of capital investment will also need to be maintained in order to maintain fleet, estate and technology to appropriate standards. The financial impact of COVID-19 will continue to be an issue beyond the current year.

The Trust is grateful for the support of the DoH and SPPG in securing the levels of investment in the ambulance service in 2022-23 and previous years. The Trust will continue to work with all HSC partners to build on this and continue to provide safe, effective and quality care within available resources.

NIAS, in common with other HSC Trusts, draws down cash directly from the DoH to cover both revenue and capital expenditure. Cash deposits held by the Trusts are minimal and any interest earned is repaid to the DoH. As such, there are no effects of interest costs on outturn and no potential impact of interest rate changes.

#### **Accounts Direction**

NIAS accounts have been prepared in a form determined by the Department of Health based on guidance from the Department of Finance Financial Reporting Manual (FReM) and in accordance with the requirements of Article 90(2)(a) of the Health and Personal Social Services (Northern Ireland) Order 1972 No 1265 (NI 14) as amended by Article 6 of the Audit and Accountability (Northern Ireland) Order 2003.

# **Accounting Policies**

The accounting policies follow International Financial Reporting Standards to the extent that it is meaningful and appropriate to HSC Trusts. Where a choice of accounting policy is permitted, the accounting policy which has been judged to be most appropriate to the particular circumstances of the HSC Trust for the purpose of giving a true and fair view has been selected. The HSC Trust's accounting policies have been applied consistently in dealing with items considered material in relation to the accounts. There have been no significant changes to accounting policies in the year.

# **Anti-Bribery and Anti-Corruption**

The Trust has an Anti-Bribery Policy in place, which sets out the Trust's position on bribery and context for ensuring that all Trust activities are carried out in an honest and ethical environment. The Trust is committed to maintaining an anti-bribery culture and will adopt a zero-tolerance approach to bribery and corruption where it is discovered.

## **Sustainability Report**

This Sustainability Report highlights the various areas managed within the remit of Fleet and Estate Services to ensure that NIAS HSC Trust operates a safe, efficient and reliable service.

The Trust is also very conscious of the continuing changes in statutory environmental guidelines and eco-friendly vehicle and other technologies coupled with the advanced prehospital procedures to be accommodated within the service delivery model.

NIAS is committed to reviewing the current sustainability aims of the Fleet, Estate, Digital and Workforce Strategies to ensure they are fit for purpose and suitably resourced to operate efficiently and effectively in line with other UK ambulance services - for the years ahead. The Trust is also part of the DoH Sustainable Development Working Group that is developing plans to meet the statutory duty under the Northern Ireland Climate Change Acct 2022 and the development of a Climate Action Plan for Northern Ireland.

#### **Fleet**

#### **Next Generation of Fleet**

The Trust continues its commitment to reducing the environmental impact of its vehicle fleet through the procurement of Zero and Low emission vehicles and where such vehicles are not currently available the Trust continues to use proven technologies to reduce fuel usage in-line with the Trust's Fleet Strategy 2020–2025. This is only possible with substantial capital investment in the vehicle fleet that NIAS continues to benefit from due to its five year fleet replacement programme.

#### **Low & Zero Emission Vehicles**

The Trust continues to renew its fleet where possible with low or zero emission vehicles. From 2021, NIAS has only purchased low or zero emission cars. This is a total of thirty-one vehicles and is only possible with a fit for purpose vehicle charging infrastructure. Through NIAS Estates, fourteen fast vehicle charging points have been commissioned and positioned throughout the NIAS estate.

31
low and zero
emission
vehicles

#### **Accident & Emergency Ambulances**

Currently there are no suitable low or Zero emission type vehicles available for the role that this type of vehicle performs. Because of this, NIAS has installed additional technology to reduce the use of diesel fuel. There are two main systems used.

**Solar** - Fitment of high efficiency mono crystal solar panels to all Accident & Emergency (A&E) and also Northern Ireland Specialist Transport and Retrieval (NISTAR) ambulances. This project started in 2019 and it is expected that all A&E and NISTAR ambulances will be fitted with solar panels by March 2024. The Solar panels recharge the vehicles four on board batteries reducing the power requirement from the ambulance station based electrical charging systems and reducing the requirements of the vehicle engines own battery recharging system increasing the vehicles miles per gallon.

**Eco Run -** This system manages excessive engine idling by constantly measuring vehicle data and automatically switching off the vehicle engine when the conditions are within predetermined tolerances. The vehicle will automatically restart the engine once these tolerances are exceeded. Since introduction the vehicles fitted with ECO Run are showing a 4.8% reduction in fuel usage due to excessive idling.

The below table shows the main vehicle types used by the Trust and where NIAS are currently reducing its environmental impact:

Vehicle Types	Zero Emission Vehicles	Low Emission Vehicles	Eco Run or Start Stop	High Efficiency Solar Panel
A&E Ambulances	0%	0%	41%	80%
NISTAR Ambulances	0%	0%	60%	60%
PCS Ambulances	0%	0%	0%	0%
Response Cars	14%	22%	32%	36%
Support vehicles	20%	0%	0%	0%

#### What's next?

The Trust continues to adapt to the clinical needs of our service users and implement the Department of Health's 'Health and Wellbeing 2026: Delivering Together'. To do this NIAS must innovate and continue to progress the next generation of vehicles to ensure:

- The Trust has the correct type and number of vehicles fit for the environment our clinicians will work in.
- Our fleet aligns with current and future legislation including:
  - The Department of Transport Strategy "The Road to Zero" will see the sale of new diesel or petrol vehicles banned in the UK from 2030.
  - The Northern Ireland Climate Change Bill 2022.
  - o Delivering a net zero NHS.
- Embrace change utilising greener technologies to reduce our carbon footprint across all our fleet.

NIAS continues to be an active member of the National Ambulance Strategic Fleet Group and is involved in advancing the use of Electric and Hydrogen vehicles within the ambulance sector and progressing improved charging infrastructure, including the use of rapid charging facilities.

#### **Estates**

#### **Environmental Impact**

In line with the Sustainable Development Strategy 2016-2020, the Trust has undertaken joint procurement processes along with the five other local HSC Trusts and administered through the Business Services Organisation (BSO) Procurement and Logistics Service (PaLS), in relation to the supply and delivery of electricity and natural gas utilities.

NIAS actively participates in this energy Contract Adjudication Group (CAG) and the new contract came on line in April 2021 due to it being delayed by COVID-19. Through this CAG, NIAS uses Horizon Energy Group to buy all their energy and by hedging against the unusual volatility of gas prices, have offset a large percentage of the increased costs of energy experienced by commercial companies. This has been particularly challenging over recent weeks due to the uncertainty over the energy market as a result of the war in Ukraine.

This CAG with representation from each of the six HSC Trusts, incorporates a range of objectives including:

- Demonstrating corporate social responsibility (carbon off-setting).
- 100% renewable energy supply.
- Ensuring reliable affordable energy provision and reducing the carbon footprint.
- Working in partnership to mitigate the effects of climate change on the environment by implementing HSC environmental and sustainability policy to increase recycling and reduce carbon footprint and use of water and energy.

NIAS specific examples of this include:

- Energy Efficient LED lighting installed throughout Bridge End Ambulance Station during recent refurbishment.
- Energy Efficient LED lighting installed throughout Castlederg Ambulance Station during recent refurbishment.
- Energy Efficient LED lighting installed in the RATC Training Rooms and Offices in the NIAS HQ Building during recent refurbishment.
- Energy Efficient LED lighting installed to new Kitchen Restroom garage conversion at Dungannon Ambulance Station.
- New Energy Efficient LED light fittings and energy efficient water heaters installed as part of the sluice project in Coleraine, Antrim New Modular, Armagh, and Ardoyne Ambulance Station.
- New Energy Efficient replacement boilers installed at Omagh, Downpatrick & Newcastle,
- New controller installed at Omagh allowing heating to be operated more efficiently to save energy & fuel.

- Installation of new energy efficient modular Ambulance Station building fully compliant to current Building Regulations at Downpatrick Station, including Energy Efficient LED lighting.
- New Energy Efficient LED external lights installed at Craigavon HQ.
- Installation of a further three new Electric Vehicle charging points at Omagh, Foyle and HQ for new fleet electric cars.
- The Trust continue to replace any defective light fittings needing repair across the Estate with new energy efficient LED light fittings.
- Continuous energy savings with the use of Biomass Boilers in Ballymena and Enniskillen Ambulance Stations.

#### **Responsible Waste Management**

Similar to the utilities services contracts, the packaging, clinical waste and general waste management contracts are collaboratively administered through BSO PaLS along with the other HSC Trusts.

The focus of the Trust's waste management initiatives is to try to reduce the volume of waste produced within the Trust and to maximise recycling and recovery opportunities through our waste management contractors at their material recovery depots.

Methods of waste recovery used are as follows.

#### **Energy from Waste (Incineration)**

Waste is incinerated producing residues of bottom ash and lime of approximately 10% of the original volume of waste. The resulting residue is classed as recycled materials and are collected by approved contractors for reuse. The steam and heat produced by the process can be used to generate electricity or is used in local heating schemes.

#### **Alternative Treatment**

The waste is shredded and moved through a Heat Disinfection Unit (HDU) which disinfects the waste. Once cool, this shredded disinfected waste is compacted, baled and used as an alternative fuel source/solid recovered fuel (SRF).

#### **General Waste Streams**

According to data received from NIAS' General Waste Management contractor, "RiverRidge", in 2022-2023, there were 152,208 Kilograms (152.2 Tonnes) of waste collected from NIAS premises.

This waste was made up from 2 distinct waste streams:

- General Waste (101,528 Kilograms or 101.5 Tonnes) and
- Dry Mixed Recyclables (50,680 Kilograms or 50.7 Tonnes)

Of the General Waste Stream 29.97% (30,428.4 Kilograms or 30.4 Tonnes) was recycled.

The remaining 70.03% (71,099.6 Kilograms or 71.1 Tonnes) was recovered. 100%, i.e., all 50,680 Kilograms or 50.7 Tonnes of the Dry Mixed Recyclables, were recycled.

This means that 0% of the general waste streams produced by NIAS went to landfill, with 53.29% (81,108.4 Kilograms or 81.1 Tonnes) recycled and the remaining 46.71% (71,099.6 Kilograms or 71.1 Tonnes) recovered.

#### **Clinical & Special Waste**

According to data received from the regional HSC Clinical Waste Management contractor, "Stericycle", in 2022-2023, there were 37,085 Kilograms (37.1 Tonnes) of clinical waste collected from NIAS premises. None of this waste was sent to landfill, as Clinical waste is disposed of in two different ways, depending on the nature of it, as detailed above.

Of the combined total of 189,293.75 Kilograms or 189.8 Tonnes of the total Waste generated by NIAS, 100% of it was either recycled or recovered, with 0% ending up in landfill

## **Principal Risks and Uncertainties**

The Trust continues to manage the principal risks relating to corporate performance in line with our risk management policies, strategy and governance structures. NIAS complies with Department of Health guidance and assurance processes regarding the identification and management of risk.

During the financial year 2022-23, the Trust further refined its governance framework to further increase capacity within the committee structure to enhance the identification and management of risk. This development is still in progress and has been carefully planned to ensure that the NIAS Trust Board and the effectiveness of the Committee structure is amplified. The current arrangement provides assurance through the Audit and Risk Assurance Committee; the Safety, Quality, Patient Experience and Performance Committee and the People, Finance and Organisational Development Committee with subsequent reporting to the NIAS Trust Board.

The Trust's Board Assurance Framework template has been reviewed and continues to reflect levels of assurance linked to the delivery of the NIAS strategic objectives. The Trust continues to develop compliance measures to ensure that appropriate risk management processes are adopted at all

The Trust is committed to the further development of a culture where people are encouraged to challenge and expect to be challenged about how and why they do things in the interest of their patients, staff, the Trust and the public. The Trust is committed to the proportionate management of risk that ensures the Trust discharges its duty of care to our patients, staff and those who may be affected by our activities. The Trust makes every effort to comply with the regional Serious Adverse Incident Reporting and Follow-up Procedures and the Risk Manager participates in regional reviews as Trust Governance Lead. NIAS continues to support the other HSC Trusts in relation to the investigation and reporting of their Serious Adverse Incidents; currently these are reported to Safety, Quality, Patient Experience and Performance Committee as a standing agenda item as inter-Trust and interface incidents.

The Senior Management Team continues to focus on ensuring all risks are identified at an early stage and appropriately reflected within the Corporate Risk Register which the NIAS Trust Board continue to monitor. See Internal Governance Divergences within the Governance Statement (pages 86 to 110).

Mr Michael Bloomfield Chief Executive

Date: 22 June 2023

# **Accountability Report**

## **Overview**

The purpose of the Accountability Report is to meet key accountability requirements to the Northern Ireland Assembly. The report contains three sections:

- the Governance Report;
- the Remuneration and Staff Report; and
- the Accountability and Audit Report.

The purpose of the Governance Report is to explain the composition and organisation of the Trust's governance structures and how these support the achievement of the Trust's objectives.

The Remuneration and Staff Report sets out the Trust's remuneration policy for directors, reports on how that policy has been implemented and sets out the amounts awarded to directors. In addition, the report provides details on overall staff numbers, composition and associated costs.

The Accountability and Audit Report brings together some key financial accountability documents within the annual accounts. This report includes:

- a statement of compliance with regularity of expenditure guidance;
- a statement of losses and special payments recognised in the year; and
- the external auditor's certificate and audit opinion on the financial statements.

# **Corporate Governance Report**

## **Directors Report**

The role of the Trust Board is to consider the key strategic and managerial issues facing the Trust in carrying out its statutory and other functions.

The Trust Board normally meets bi-monthly in venues across Northern Ireland with arrangements for public meetings published in the local press and the Trust website to encourage public attendance. However, in 2022-23, to ensure governance and assurance duties could be maintained and performed safely and regularly, whilst the organisation managed unprecedented operational challenges, virtual meetings were introduced to support the Trust Board duties.

Within our current governance structure configuration, Non-Executive Directors form the membership of the four Trust Board Committees: the Remuneration Committee, the Audit and Risk Assurance Committee, the Safety, Quality, Patient Experience and Performance Committee and the People, Finance and Organisational Development Committee.

Whist the authority and duties within each committee are embedding, after a transition period, each committee's broad remit is outlined below:

- The Remuneration Committee provides advice and assurance to the Trust Board about appropriate remuneration and terms of service for the Chief Executive and other Senior Executives:
- The Audit and Risk Assurance Committee provides assurance of effective internal financial controls including the management of principle and associated risks;
- The Safety, Quality, Patient Experience and Performance Committee provides assurance that adequate systems and processes are in place for the delivery of high quality patient care that is safe, effective and patient focused; and
- The People, Finance and Organisational Development Committee provides assurance that all issues relating to Human Resources and Finance are effectively managed and regularly reviewed.

#### **Interests Held by Board Members**

A declaration of board members interests has been completed and is available at <a href="https://www.nias.hscni.net">www.nias.hscni.net</a> or on request from the Chief Executive's Office, Northern Ireland Ambulance Service, Knockbracken Healthcare Park, Saintfield Road, Belfast, BT8 8SG.

#### **Personal Data Related Incidents**

The Trust is not aware of any reportable data breaches or any significant personal data related incidents in 2022-23.

#### Statement of Disclosure to Auditors

The executive and senior management of the Trust, along with the Director of Finance have the responsibility for the preparation of the annual report and accounts. They have provided the auditors with the relevant information and documents required for the completion of the audit. The responsibility for the audit of the Trust rests with the Northern Ireland Audit Office (NIAO).

All directors have confirmed that, to the best of their knowledge, there is no relevant audit information of which the Trust's auditors are unaware. They have confirmed that they have taken all steps as directors in order to make themselves aware of any relevant audit information and to ensure that auditors are aware of that information.

#### Fees Paid to Northern Ireland Audit Office

The notional cost of the audit for the year ending 31 March 2023 which pertained solely to the audit of the accounts is £33,650 made up as follows, public funds £31,300 and Charitable Trust Funds £2,350. In addition, during the year the Trust received services from the NIAO to the value of £1,314 in respect of the National Fraud Initiative 2022-23 exercise. No other audit or non-audit services were provided by NIAO to the Trust during the financial year.

# STATEMENT OF ACCOUNTING OFFICER RESPONSIBILITIES

Under the Health and Personal Social Services (Northern Ireland) Order 1972 (as amended by Article 6 of the Audit and Accountability (Northern Ireland) Order 2003), the Department of Health has directed the Northern Ireland Ambulance Service HSC Trust to prepare for each financial year a statement of accounts in the form and on the basis set out in the Accounts Direction. The financial statements are prepared on an accruals basis and must provide a true and fair view of the state of affairs of the Northern Ireland Ambulance Service HSC Trust, of its income and expenditure, Statement of Financial Position and cash flows for the financial year.

In preparing the financial statements the Accounting Officer is required to comply with the requirements of the Government Financial Reporting Manual and in particular to:

- Observe the Accounts Direction issued by the Department of Health including relevant accounting and disclosure requirements, and apply suitable accounting policies on a consistent basis;
- Make judgements and estimates on a reasonable basis;
- State whether applicable accounting standards as set out in Government Financial Reporting Manual have been followed, and disclose and explain any material departures in the financial statements;
- Prepare the financial statements on the going concern basis; and
- Confirm that the Annual Report and Accounts as a whole is fair, balanced and understandable and take personal responsibility for the Annual Report and Accounts and the judgements required for determining that it is fair, balanced and understandable.

The Permanent Secretary of the Department of Health as Principal Accounting Officer for Health and Social Care Resources in Northern Ireland has designated Mr Michael Bloomfield of the Northern Ireland Ambulance Service HSC Trust as the Accounting Officer for the HSC Body. The responsibilities of an Accounting Officer, including responsibility for the regularity and propriety of the public finances for which the Accounting Officer is answerable, for keeping proper records and for safeguarding the HSC Body's assets, are set out in the formal letter of appointment of the Accounting Officer issued by the Department of Health, Chapter 3 of Managing Public Money Northern Ireland (MPMNI) and the HM Treasury Handbook: Regularity and Propriety.

As the Accounting Officer, I have taken all the steps that I ought to have taken to make myself aware of any relevant audit information and to establish that the auditors are aware of that information. So far as I am aware, there is no relevant audit information of which the auditors are unaware.

## **Non-Executive Directors' Report**

The Non-Executive Directors' (NED) Report for 2021-22 focussed on the COVID-19 pandemic and this year NIAS was still heavily impacted by the pandemic. There have been sustained periods of REAP 4, which classifies operational pressures as 'Extreme', throughout the year. Any NED report must start by acknowledging again the hard work done by NIAS staff. Our compliments and thanks go to all of the team who have done such a great job during this difficult time.

Despite this, NIAS has been refocussing on the return to business as usual which has been a standing agenda item for the Audit and Risk Assurance Committee (ARAC). Practically, what this means is that NIAS is now able to again focus on the many non COVID-19 issues facing NIAS and what can be done to create a positive impact.

From the NEDs' perspective, leading every issue impacting NIAS is the impact of ambulances being held at hospitals due to delayed handovers. This impact was felt as 22% of lost operational capacity throughout the year.

The NEDs have kept focus on this issue and NIAS Senior Management Team (SMT) has responded by doing everything possible to address an issue which all acknowledge is not really in their ability to remedy. These actions include development of additional care pathways and see and treat models.

It is a frustration for NEDs that this issue is continuing and, while we thank everyone for their efforts, we call on all stakeholders in this process to make real progress to improve this problem in the following year.

Other issues of particular focus for NEDs include:

- Sickness levels in NIAS remain high at 12.3% which is above normal for ambulance services. The SMT established a Maximising Attendance programme of work for one year to address continuing levels of sickness, and NEDs will be monitoring this issue moving forward.
- 2. As noted, ongoing focus on achieving business as usual for post-pandemic operations. This is currently being monitored by the Human Resources Directorate and reports will be reviewed on this issue in the upcoming year.
- 3. Internal Audit reviewed the implementation of accepted outstanding priority one and priority two Internal Audit recommendations, where the implementation date has passed, at mid-year and again at year-end. At year-end, 142 (80%) out of the outstanding 178 recommendations examined were fully implemented, a further 35 (19%) were partially implemented and 1 (1%) was not yet implemented. Whilst Limited assurance in respect of the Patient Care Service in 2022-23 was provided, significant improvements have been made to enhance the control environment from the previous unacceptable assurance audit in 2019--20.
- 4. NIAS is continuing with implementation of RQIA Safeguarding Quality Improvement Plan with the appointment of a Safeguarding Facilitator post and is in discussions with the DoH/SPPG in relation to strengthening safeguarding arrangements within the Trust. The Trust also participated in a peer review exercise facilitated through

- the National Ambulance Safeguarding Group. There will be additional focus on the actions required to address this key issue in following years.
- 5. The Clinical Response Model business case was re-submitted to the Department of Health in February 2023. The focus of the business case is to deliver a clinical response model that will adjust NIAS' capacity to meet the demand and deliver CRM response times, subject to approval and affordability.
- 6. One of the issues facing NIAS has been a small management team for the work required. This is slowly being addressed with an expanded management team including appointments during 2022-23 of the Director of Finance, Procurement Fleet and Estate, and Director of Human Resources and Organisational Development. From a NEDs' perspective, this is welcome as it allows for better succession planning as well as the ability to deal with some of the improvements and changes required.
- 7. As Chair of the Trust's Audit and Risk Assurance Committee, I carried out a review of best practice of the functioning of the Committee against recognised standards set by the Healthcare Financial Management Association, the ARAC Committee Effectiveness Checklist and the Audit and Risk Assurance Handbook (NI) 2018. This review highlighted a number of improvements which have been implemented. The Committee continues to be supported by an Independent Financial Adviser from the HSC Leadership Centre and their contribution has been invaluable. Likewise, the Trust's Safety, Quality, Patient Experience and Performance Committee has benefited from the expertise of a Senior Clinical Adviser who has assisted members in their oversight of clinical matters.
- 8. An expanded committee structure has resulted in considerable focus by NEDs on committee interaction and governance in order to ensure that nothing "fell between the cracks." I am pleased that the Risk Manager has been focussed on monitoring this process to ensure effective operations.

These are a highlight of the matters that have held the attention of NEDs and, again, we thank the entire NIAS family for the dedication and work to make the ambulance service effective as well as to have continued improvements.

William Abraham April 2023

### **Governance Statement 2022-23**

#### 1. Introduction and Scope of Responsibility

The Board of the Northern Ireland Ambulance Service HSC Trust (NIAS) is accountable for internal control. As Accounting Officer and Chief Executive of the Trust, I have responsibility for maintaining a sound system of internal governance that supports the achievement of the organisation's policies, aims and objectives, whilst safeguarding the public funds and assets for which I am responsible in accordance with the responsibilities assigned to me by the Department of Health (DoH). In essence, the role of Accounting Officer is to see that the Trust carries out the following functions in a way that ensures the proper stewardship of public money and assets:

- To enter into and fulfil Service Level Agreements with Health and Social Care Commissioners;
- To meet statutory financial duties; and
- To maintain and develop relationships with patients, the local community, Commissioners, other HSC bodies and suppliers.

The Trust is directly accountable to the DoH for the performance of these functions. The Trust works in partnership with the DoH, the Strategic Planning and Performance Group (SPPG) (formerly the Health and Social Care Board (HSCB)), the Public Health

Group (SPPG) (formerly the Health and Social Care Board (HSCB)), the Public Health Agency (PHA) and also works closely with other partner organisations such as other Health and Social Care (HSC) Trusts and the Regulation and Quality Improvement Authority (RQIA), through the establishment of and representation on various working groups, all with a view to improving the quality, safety, effectiveness and efficiency of services. These arrangements continue to be reviewed and updated in response to changes in the structure of Health and Social Care across Northern Ireland.

#### 2. Compliance with Corporate Governance Best Practice

The Board of NIAS applies the principles of good practice in Corporate Governance and continues to strengthen its governance arrangements. The Board of NIAS does this by undertaking continuous assessment of its compliance with Corporate Governance best practice and applying such principles and processes where applicable.

The Trust Board is engaged in an ongoing process of self-assessment against the Board Governance Self-Assessment Tool issued by DoH. The assessment covers four key areas: Board composition and commitment; Board evaluation, development and learning; Board insight and foresight; and Board engagement and involvement.

The Trust Board have been engaged in an exercise to enhance the corporate governance framework by creating additional capacity to provide a robust system of internal governance that supports the achievement of the organisation's policies, aims and objectives.

#### 3. Governance Framework

The Board exercises strategic control over the operation of the organisation through a system of corporate governance which includes:

- A schedule of matters reserved for Board decisions;
- A Scheme of Delegation, which delegates decision making authority within set parameters to the Chief Executive and other officers; and
- Standing Orders and Standing Financial Instructions, including the establishment of an Audit and Risk Assurance Committee, a Safety, Quality, Patient Experience and Performance Committee, a People, Finance and Organisational Development Committee and a Remuneration Committee.

The Audit and Risk Assurance Committee is chaired by a Non-Executive Director and membership is comprised only of Non-Executive Directors. The Audit and Risk Assurance Committee meets not less than three times per year in line with its Terms of Reference and during the year met on seven occasions. Its primary role is to independently contribute to the Trust Board's overall process for ensuring that an effective internal financial control and risk management system is maintained.

The Audit and Risk Assurance Committee completes the National Audit Office Audit Committee Self-Assessment Checklist on an annual basis as part of the assessment of its effectiveness and an action plan was developed to address any areas for improvement identified. No significant performance related issues were identified during this review. Additionally, each year the Chair of the Audit and Risk Assurance Committee provides the Trust Board with an Audit and Risk Assurance Committee Annual Report. The Committee fulfilled the requirements of its terms of reference during 2022-23.

The Safety, Quality, Patient Experience and Performance Committee is chaired by a Non-Executive Director and membership is comprised only of Non-Executive Directors. The Safety, Quality, Patient Experience and Performance Committee met on four occasions during the year. The terms of reference of the Committee require it to meet not less than three times a year. The Committee fulfilled the requirements of its terms of reference during 2022-23.

The People, Finance and Organisation Development Committee is chaired by a Non-Executive Director and membership is comprised only of Non-Executive Directors. The People, Finance and Organisation Development Committee met on four occasions during the year. The terms of reference of the Committee require it to meet not less than three times a year. The Committee fulfilled the requirements of its terms of reference during 2022-23.

The Remuneration Committee is chaired by the Chair of the Trust Board and membership is comprised of Non-Executive Directors only. The Remuneration Committee met on three occasions during the year. The Remuneration Committee's primary role is to advise the Board about appropriate remuneration and terms of service for the Chief Executive and Executive Directors employed by the Trust. The Remuneration Committee fulfilled the requirements of its terms of reference during 2022-23.

Though membership of all of these committees is comprised only of Non Executive Directors, other Directors would routinely attend meetings, for example the Director of Finance would routinely attend Audit & Risk Assurance Committee and the Director of Quality, Safety and Improvement would routinely attend the Safety, Quality, Patient Experience and Performance Committee. The Chief Executive, other Directors, Assistant Directors and senior managers with responsibility Committee related functions are also invited to attend as appropriate. Other attendees at Committee meetings, for example Internal and External Audit, also attend meetings either routinely or by specific invitation.

The Trust Board and Committee Record of Attendance is shown on page 81 of the Accountability Report. During the year, the appraisal processes in place did not identify any significant performance related issues of members of Trust Board or Committees. The Chair has ongoing discussions with each of the Non-Executive Directors in terms of their contribution to their respective committees and to give them an opportunity to highlight any specific concerns or issues.

The Board and its Committees returned to face-to-face meetings, when possible, in June 2022.

#### 4. Business Planning and Risk Management

Business planning and risk management is at the heart of governance arrangements to ensure that statutory obligations and Ministerial priorities are properly reflected in the management of business at all levels within NIAS.

The Board identifies the strategic and corporate aims, objectives and risks and monitors the achievement of these in the public interest. It has established a framework of prudent and effective controls to manage these risks, underpinned by a recently reviewed assurance framework. Decisions are taken by the Board within a framework of good governance to build a successful organisation, which is always striving to achieve excellence.

#### **Business Planning**

The Trust's Delivery Plan and Corporate Plan highlight the organisation's plans for the incoming year in line with the stated purpose, mission and vision of the organisation, aligned to the relevant principles and values, which direct action consistent with Ministerial priorities. The NIAS Trust Delivery Plan, which is subject to approval by the SPPG, takes account of available resources and outlines Trust priorities in terms of actions and activity to secure objectives for the year.

In line with Department of Health direction, in June 2020, the Trust Delivery Plan approval process for all organisations was suspended due to the impact from COVID-19. NIAS was asked to submit its corporate plan to ensure actions were consistent with Ministerial priorities.

Subsequently in March 2021, a further direction from the Department of Health outlined a review and roll forward approach of 2020-21 plans with no formal Departmental approval process other than sharing revised plans for information. This process has continued and will revert to the requirement for formal Departmental approval in 2023-24.

During 2022-23, the Trust sought to continue to implement the key enablers from the new strategy 'Caring today, planning for tomorrow - Our Strategy to Transform: 2020-2026. This is closely aligned to the Department of Health's "Health and Wellbeing 2026 – Delivering Together" document. Our strategy highlights the value of working as an integrated HSC system alongside a range of partners in local authorities, other agencies and the voluntary sector with the emphasis on person-centred care, ill-health prevention, social wellbeing and providing more diagnostics, treatment and care in the community and home settings. Despite the impact of the pandemic, NIAS were able to implement significant key actions to provide that foundation on which to build the resilience and transformation agenda required to meet the ambition of our plans. This has been coupled with an agenda to support the HSC in the stabilisation of services impacted by the COVID-19 and the subsequent rebuilding and re-configuration of that supporting structure.

During 2022-23, NIAS has been actively engaged with other ambulance services across the UK and Ireland in the development of plans to support the embedding best practice such as business continuity and emergency planning and how NIAS can further improve the service we provide to the public, and support the wider HSC sector.

#### **Risk Management**

The Trust Board transitioned risk responsibilities to the Audit and Risk Assurance Committee in October 2021. The Audit and Risk Assurance Committee is a committee of the Board and is responsible for ensuring that an effective internal financial control and risk management system is maintained.

The Corporate Risk Register and governance arrangements for risk assurance are standing items at each Committee meeting. The Trust's Director of Planning, Performance and Corporate Services has been given delegated responsibility for the oversight of risk management and is supported in this regard by a Risk Manager.

The Trust Board continues to review the arrangements in place with reference to best practice and DoH guidance in order to strengthen the arrangements for Risk Management. The Trust Board refers to the corporate risk management policy and strategy which specifies ways in which risk can be identified; the means of identification include, although not exclusively, incident reporting, Serious Adverse Incident (SAI) reporting, complaints management, risk assessment, horizon-scanning at Trust Board level, claims management, assurance, benchmarking and consultation with staff and service users. The strategy also places upon all Trust employees the responsibility to be aware of and to report any and all risks to which they or the Trust are exposed.

The strategy also contains the process by which identified risks are recorded on the Risk Register. Each significant risk will be assessed individually when deciding whether it is within the Trust's risk appetite (tolerable), or whether additional controls (terminate, treat or transfer) are required. The following risk appetite principles are applied:

- Appetite for risks relating to patient safety and employee health and safety is very low, with controls required to reduce the risks so far as is reasonably practicable;
- Appetite for risks relating to regulatory compliance, fraud, and information governance is also low, requiring appropriate risk controls;

- Appetite for risks to non-critical functions and services is higher, whilst taking into account any potential impact on any strategic/business objectives; and
- Approach to risk management is designed to encourage and promote innovation and continual progress, and not to stifle or hinder growth and development, and NIAS appetite for risks to its strategic and/or directorate objectives should reflect this.

Each risk is evaluated and, if necessary, re-evaluated in line with the regional guidance and best practice. This takes into account the likelihood and potential impact on the Trust's service users, employees, environment, reputation and resources. This evaluation then prompts the development of individual risk treatment plans against which progress is monitored through the Trust's Risk Register. The risk management processes have been in place throughout the whole financial year and up to the date of approval of the annual report and accounts.

Corporate Risks are those that impact on the organisation as a whole, or which cannot be resolved immediately or adequately reduced by treatment at a local level. They are recorded on the Corporate Risk Register, which is reviewed on a monthly basis by the Senior Management Team (SMT). New risks escalated to the Corporate Risk Register in 2022-23 include: Independent Ambulance Sector – Medicines Administration; Medicines Asset Management & Governance; Derogation List – NIAS specific approach to National Response Standards; Financial Stability – Achieving Financial Balance 2022-23; Hospital Turnaround Times; Expiration of cleaning service contract; BSc (Hons) Paramedic Students from Ulster University During Practice Placement.

Directorate Risks are those which have an impact on the particular Directorate and which can be reduced to an acceptable level by treatment at a directorate level. These are recorded on the Directorate Risk Register and are the responsibility of the Trust's line management. Directorate Risk Register updates are forwarded to the relevant Directors for distribution and review at a directorate level on a regular basis. The Trust has further developed the mechanisms for the review of Directorate Risk Registers by ensuring they are formally reviewed by the Audit and Risk Assurance Committee as necessary.

In accordance with the Statutory Mandatory Training Policy, risk management training must be completed every three years. The Trust risk management e-learning package was completely refreshed in 2019 and is now incorporated with governance training in the induction provided to all new staff. The Risk Manager co-ordinates and adopts best practice with the HSC Trusts.

#### 5. Information Governance

In NIAS, information governance is the framework of legislation and best practice guidance associated to the UK General Data Protection Regulation (UKGDPR)/Data Protection Act 2018, the Freedom of Information Act 2000, Access to Health Records (NI) Order 1993, Duty of Confidentiality etc. that regulates the manner and way in which we collect, obtain, handle, use, share and disclose information.

The Trust recognises that information is required every day across the Trust to discharge our services and understands that we hold high levels of personal information. The Trust uses this information in many ways:

- To respond effectively to emergencies;
- To ensure that non-emergency patients are taken to hospital appointments;
- To ensure continuity of care for patient we are treating;
- To support clinical research; and
- To support emergency planning.

We also understand that we need a defined structure for handling personal information in a confidential and secure manner to appropriate ethical and quality standards. This includes ensuring that information risks are managed in a robust way across the Trust. This is why we train staff in information governance areas, appoint specific roles across Directorates to support this, develop Privacy Notices, consider privacy impacts/risks at early stages of service change and ensure that a suite of policies and procedures exist that fully outline accountability and responsibilities.

The Trust participates in a regional forum for Governance in Health and Social Care (HSC) organisations to meet on a regular basis known as the Information Governance Network (IG Network). Its purpose is to meet the challenges of Governance in a shared and co-ordinated way, to disseminate learning and to provide focus for discussion of Information Governance matters. The group will promote best practice standards in Information Governance.

We hold information on patients, clients, suppliers, other Trusts, Coroner Service for NI, the Police Service of Northern Ireland, the Police Ombudsman, Solicitors, Coroners, and other stakeholders, as well as our staff. The Trust uses this information in an appropriate manner to provide assurance on the level of care and service provision we deliver to our patients and for planning and business continuity. Good quality information forms the basis of high quality care and we understand the importance of this.

The Trust works with the Information Commissioner's Office (ICO) to resolve any complaints received about how the Trust handles data. In accordance with legislative requirements data breaches have to be reported within 72 hours to the ICO. NIAS as data controllers continue to collaborate with HSC colleagues regarding any incidents that the Trust is alerted to and that have the potential for risk or any impact on staff, patients, information or services at NIAS.

Cyber Security remains a high priority for NIAS as the threat from hostile actions are increasing in number and becoming more sophisticated in their approach. The Trust places the utmost importance on the security and protection of data and information in order to ensure that confidential patient information is protected and that the network and applications are available to users. We continue to work in partnership with the other HSCNI organisations through the Regional Cyber Security Program Board to identify agreed areas for improvement and to prioritise resources to address these.

NIAS continue to work with Internal Audit to test compliance with the National Cyber Security Centre (NCSC) Ten Steps to Cyber Security. NIAS continues to focus on developing the capability to manage network security. Since the outbreak of COVID 19 the capacity for concurrent users working from home has increased significantly with the amount nearly tripled. Extra Licenses, Key fobs and Server Capacity to support this was made available; and policies concerning User Password Requirements/Duration have been reviewed in line with best practice and NCSC guidelines.

The challenge for NIAS and the HSC as a whole is to be prepared to minimise the impact of any cyber-attack and to ensure access to data is only available to authorised individuals and is controlled and monitored to maintain safety and confidentiality.

Assurance that information governance and data security are managed effectively is delivered through a range of internal governance forums which report to the Audit and Risk Assurance Committee. Issues are escalated to Trust Board as required. Furthermore, these areas are subjected of review by Internal Audit and other assurance functions, for example the Network and Information (NIS) Competent Authority & Enforcement Branch.

#### 6. Unscheduled Care and Winter Surge Planning

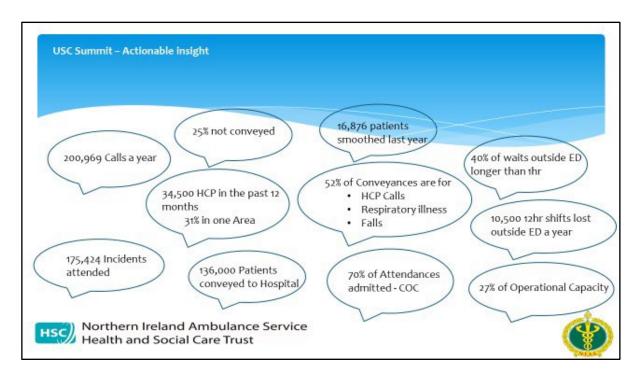

NIAS experiences significant operational challenges throughout the year due to a range of factors. The 2022-23 Winter Surge Plan focused on ongoing inter-trust focus on system wide pressures on Unscheduled Care which had a particularly strong knock-on effect on NIAS. In a statement to the Northern Ireland Assembly on 26 October 2022, the Health Minister stated:

"The health and social care system is facing another incredibly challenging winter. COVID-19 continues to circulate and we are likely to see other infections, such as winter flu, adding to pressures this winter. The ongoing cost of living crisis is also expected to impact on population health with resulting demand for Health and Social Care (HSC) services. In this difficult context, I have asked the health and social care system to comprehensively plan and prepare for what lies ahead."

The 2022-23 Winter Surge Plan therefore presented key actions agreed by NIAS in the context of inter-Trust planning, discussion and collaboration, and presented to The Strategic Planning and Performance Group (SPPG, formerly The Health and Social Care Board - HSCB) and the Department of Health (DoH) at an inter-Trust Emergency and Unscheduled Care Summit held on 9 November 2022.

The plan described the key strategic and operational actions NIAS would take during Winter 2022-23 to maintain safety, quality and performance, and contribute to the wider unscheduled care system. It was developed taking account of the experience and learning from previous winters and recent Covid-19 surge scenarios.

The winter period brings specific challenges and is a particularly busy period for the wider Health and Social Care (HSC) system, Health Care Professionals (HCP) and NIAS. Increased 999 activity, increased staff absence, handover delays at acute hospitals and reduced services in the wider health economy all affect our ability to respond to patients quickly. The figure overleaf demonstrates some of the metrics discussed at the Summit.

As the slide above shows, NIAS continued to be significantly challenged due to extensive delays in handover times at EDs across Northern Ireland. There have been a number of incidents of patients coming to harm whilst queuing in the back of an ambulance, additionally, patients have experienced harm whilst waiting on an emergency response in the community which has been delayed as a result of handover delays.

#### Context:

- Increased ambulance turnaround times at Emergency Departments depleted response capacity by an estimated 27%. With this depletion of NIAS capacity on a daily basis, the ability to respond to those patients waiting within our communities was significantly impacted.
- 40% of ambulance waits outside ED were longer than 1 hour.
- From April 2021 to date, 13 SAIs related to a delayed NIAS response out with standard in which the patient outcome has been death. Delayed handover times were a significant contributor to delayed community response.
- From January 2022 there were 19 reported patient safety incidents related to delayed hospital handovers.
- From January 2022 NIAS reported 4 incidents to Trusts in relation to patients deteriorating in the back of ambulances. Out of the 4 incidents the outcome was death for 3 patients. Two of these incidents were notified as SAIs by another Trust.

#### **Key challenges:**

- Whilst demand remained unpredictable, we focused on our ability and capacity to respond based on the staff we had available and the other available resources such as Voluntary and Private Ambulance capacity.
- Service delivery pressures arising as a consequence of normal winter ailments including seasonal flu prevalence were mitigated through the flu vaccination programme.

- Forecasting and planning workforce capacity throughout the winter months and assessing against forecasted demand.
- Factoring the need for staff to take planned annual leave especially in the Christmas and New Year period, and flexible working necessary to support childcare and caring commitments.
- We continued to ensure our staff were rested, felt supported and valued, and we ensured the workforce had resources required for winter surge period to maintain patient and staff safety in respect of spread of infection.
- We were mindful of our commitment to engagement and partnership working as we implemented our winter plan supporting emergency decisions needed to be taken rapidly in event of a significant surge with this new variant.
- We provided continued support to staff including those who have been clinically vulnerable, and people at risk of harm; providing Peer Support and other support services which continue to be important.

#### Impact of energy crisis

This year, Northern Ireland faced one of the worst energy crisis in recent history with the downturn in the global economy and impact of war in Europe. Many more households were predicted to fall deeper into fuel poverty<sup>1</sup>. Household energy bills were forecast to rise to over £4,200 per year from January 2023<sup>2</sup>.

Fuel poverty and cold homes exacerbate circulatory, respiratory and mental health problems across all age groups and drive health inequalities. It was predicted that this may well lead to increased hospital admissions and demand on GP surgeries, A&E departments and social care services.

- Cold homes reduce dexterity, which increases the risk of falls a common cause of injury, loss of independence and even death for older people<sup>3</sup>
- Older people are also particularly vulnerable to the effects of a cold winter with no heating at home. Because the heart has to work harder to keep the body warm when it's cold, cold homes increase blood pressure, causing heart attacks and stroke in adults and older people<sup>4</sup>
- Children growing up in cold, damp homes are more than twice as likely to suffer from respiratory conditions than their classmates in warm homes<sup>5</sup>
- The British Thoracic Society has indicated that rising costs in electricity from the 1st April 2022 will impact particularly on respiratory patients dependent on home mechanical ventilation, and in some cases will mean that they are unable to meet the costs of their electricity bills. These increases in costs have a disproportionate impact on patients who are dependent on electrical equipment to stay alive. Currently, there is no reimbursement or financial payments for electricity for ventilator dependent patients<sup>6</sup>.

#### Winter Surge Response

The 2022-23 plan outlined priority actions to be implemented by NIAS over the winter months. The winter surge plan's principle aim was to protect the Trust's ability to respond to patients in most clinical need and to ensure we continue to deliver our critical functions in the face of extreme pressure on the wider HSC system. It also sought collaboration across the HSC system to ensure optimum delivery against the actions listed.

<sup>&</sup>lt;sup>1</sup> In Northern Ireland, fuel poverty is defined as spending more than 10 per cent of a household's income on energy.

The NIAS Winter Surge Plan focused on 5 of the 7 key themes agreed across all Trusts<sup>7</sup>:

- Maintain safety and resilience at Emergency Departments and support Ambulance Services
- Enhance capacity and flow in our acute hospitals, ensuring timely discharge and support for people to leave hospital when clinically appropriate
- Plan for a Business Continuity response to potential industrial action and potential impacts of cost of living crisis
- Prepare for surges in Covid-19, RSV and respiratory challenges
- Protect staff health & wellbeing and patient / client experience

The table below provides an overview of key winter plan actions. This priority list was informed by actions which are ongoing in the Operations Improvement Plan and Unscheduled Care Action Plan and enabled NIAS to mitigate the most significant impact of the winter pressures and support the Unscheduled Care System in delivering safe care across the community and hospital settings.

0000 00 Winter Diemaine	Initiation / Actions		
2022-23 Winter Planning	Initiative / Actions		
Theme			
Maintain safety and resilience at	Review and enhance NIAS clinical safety plan		
Emergency Departments and	Review Category 1 release policy		
support Ambulance Services	Contribute to Regional Escalation Policy		
	Enhance Hospital Liaison Support		
Enhance capacity and flow in	Rapid Response Vehicle (RRV) Utilisation		
our acute hospitals, ensuring	West Initiative		
timely discharge and support for	Clinical Navigator		
people to leave hospital when	Develop Clinical Support Desk (CSD) through		
clinically appropriate	MDT approach		
	Increase Access to Patient Care Pathways		
Plan for a Business Continuity	Advanced Ordering of IAS A&E Support		
response to potential industrial	Services		
action and potential impacts of	Duplicate Call management/text technology		
cost of living crisis	Recruitment to stabilise area managers/SO's		
	Support to vulnerable callers impacted by		
	energy crisis/poverty.		
Prepare for surges in Covid-19,	Promotion of Vaccinations (30%)		
RSV and respiratory challenges	Electronic management of Covid-19 return to		
	work		
Protect staff health & wellbeing	Deploy alternative shift patterns		
and patient / client experience	Review of Supervisor roles within Division		
	Crew Relief team Stabilisation		
	Automation of Admin Processes		
	Deployment of Derogation list throughout Trust		

<sup>&</sup>lt;sup>7</sup> We have not included actions against two of the HSC Winter Planning Priorities against which NIAS has minimal input: 'Enhance capacity and flow in our community services'; and 'Continue to support Elective activity'

#### 7. Fraud

In line with good practice, NIAS takes a zero tolerance approach to fraud in order to protect and support our key public services. We have put in place an Anti-Fraud Policy and a Fraud Response Plan to outline our approach to tackling fraud, to define staff responsibilities and the actions to be taken in the event of suspected or perpetrated fraud, whether originating internally or externally to the organisation. Our Fraud Liaison Officer (FLO) promotes fraud awareness, co-ordinates investigations in conjunction with the BSO Counter Fraud and Probity Service and provides advice to our staff on fraud reporting arrangements. All staff are provided with mandatory fraud awareness training in support of the Anti-Fraud Policy and Fraud Response plan, which are kept under review and updated as appropriate.

#### 8. Public Stakeholder Involvement

The Trust aims to ensure that those who use our services and their representatives have an opportunity to influence and shape policy and service delivery decisions. Our Personal and Public Involvement Strategy outlines our commitment to involving key stakeholders and their representatives in the development of our services. Service user engagement and involvement is mainstreamed into key policy development processes. Personal and Public Involvement was included as part of the mandatory training programme for all staff during the year.

Significant developments have been introduced regionally in relation to a new online user feedback programme for all citizens and HSC Trusts in Northern Ireland that was led by the Department of Health. NIAS actively participated as a member of the Programme Board and implementation agenda around the new 'Care Opinion' online portal, which has been introduced in the first quarter of 2019-20 but has seen significant increase in usage since the HSC has promoted it extensively and continues to do so throughout 2022-23. The Trust continues to gather and analyse patient experience stories as part of the regional 10,000 Voices project, and to use 10,000 Voices as a learning and engagement tool; this work has further evolved in the context of the new Care Opinion online user feedback programme.

Despite the challenges of COVID-19, the Trust has engaged at each opportunity with our patient stakeholder group during 2022-23 to gain valuable feedback and direction on how we implement elements of our strategic plan, this insight collected from patients and service users range from feedback on our Fleet Strategy to their views and opinions on the introduction of Body Worn Video cameras to enhance staff safety.

The Trust takes into account the views of the public in relation to identifying and managing risks through, for example, the analysis of learning outcomes, complaints and untoward incident reports (UIRs) (including, if appropriate, contact with the service user(s) and/or other related stakeholders such as public sector partners). Risk identification, assessment and management is also considered if it arises from stakeholder feedback provided during the broader policy development processes and is then referred to the relevant NIAS department as appropriate.

#### 9. Assurance

In 2020, the Trust carried out a complete review of its assurance arrangements, developing a new Corporate Assurance Strategy. The Strategy explains what 'assurance' means, sets out the arrangements required and outlines roles and responsibilities of key staff. The Strategy is integrally linked to the Corporate Risk Management Policy and Procedures and is aligned with the Strategy to Transform and Annual Business Plans. It reflects a range of current guidance and best practice (including DoH and HM Treasury Guidance).

The NIAS Assurance Model is as follows:

#### **Key Themes**

- •Strategic objectives.
- Directorate objectives.
- Department/Unit/Team objectives as appropriate

## Board Action Plan / Implementation

- •To improve key controls, manage risks, ensure delivery of key objectives and gain assurance.
- •SMART Action Plans.
- •Agenda(s) set according to the largest gaps!

#### Reporting / Board Reporting

- •Take all of the relevant evidence together and arrive at informed conclusions.
- Clearly identify gaps.
- •Escalate issues relating to strategic objectives!

## Assurances On Controls

- Check effectiveness of controls, e.g. management checks, internal audit, RQIA.
- Evidence hased!

#### **Key Risks**

- Corporate/directorate risks.
- •Core business/key processes.
- Business Impact Analysis.
- Programmes/projects.
- Major change.
- Audit findings.
- •Incidents/complaints/claims.
- Performance.
- External organisations.
- •Media.

#### **Key Controls**

•Measures to reduce the risk e.g. physical measures, training, processes etc.

This framework is regularly updated and submitted to the Audit & Risk Assurance Committee (ARAC) and Trust Board for approval. This identifies the assurances provided to NIAS by its governance structure and highlights any gaps in assurance. This supports improvements in the level of assurance and underpins the challenge function of the Trust Board.

In terms of independent assurance, the Trust has engaged the services of a number of external organisations in this regard, including.

- Business Services Organisation (BSO) Internal Audit whose audit plans are based on key risks and systems within the organisation. As part of the 2022-23 annual audit programme, Internal Audit carried out a review of Risk Management (including management of assurances) and provided a satisfactory level of assurance.
- International Academies of Emergency Dispatch (IAED) Centre of Excellence (Emergency Ambulance Control).
- Association of Ambulance Chief Executives (AACE) Peer Reviews (safeguarding and Emergency Planning, Risk and Resilience).

The Trust endeavours to continually improve its structures and processes of assurance through assurance mapping workshops, self-assessment exercises and resultant improvement plans. The Trust Board has been engaged in an ongoing process of self-assessment using the Board Governance Self- Assessment Tool issued by DoH. Similarly the Audit & Risk Assurance Committee tests its application of good practice using a Self-Assessment checklist, issued by the National Audit Office.

The Trust also contributes to both Mid-Year and Year End Accountability Meetings with DoH and HSCB, which are designed to provide assurances on the Trust's systems of internal control.

These structures and processes and the sources of independent assurance outlined in this statement provide an appropriate and acceptable quality of assurance to Trust Board.

#### 10. Sources of Independent Assurance

NIAS obtains Independent Assurance from the following sources:

- Internal Audit;
- Business Services Organisation (BSO); and
- Regulation and Quality Improvement Authority (RQIA).

The Trust also relies on other significant assurance functions, both internal and external to the organisation, and considers the implications of any relevant findings for the governance of the organisation. These may include, but will not be limited to, any reports issued by the Comptroller and Auditor General or Public Accounts Committee, reviews by DoH commissioned bodies, the Medicines Regulatory Group and other professional and regulatory bodies with responsibility for the performance of staff or functions (e.g. Joint Royal Colleges Ambulance Liaison Committee (JRCALC), Health and Care Professions Council (HCPC), Royal Colleges and other accreditation bodies).

#### **Internal Audit**

The Trust utilises an internal audit function (commissioned from the BSO), which operates to defined standards and whose work is informed by an analysis of risk to which the Trust is exposed and annual audit plans which are based on this analysis.

The 2022-23 Internal Audit Plan was completed, with the exception of the audit of Resource & Rota Management which was agreed to be deferred to 2023-24.

The 2022-23 Internal Audit assurance work is summarised as follows:

Audit Assignment	Level of Assurance	
Finance Audits:		
Financial Review Audit	Satisfactory – Non Pay Expenditure, DACs, Legal payments and processes Limited – Payments to Staff (Trust Control)	
Stocktake	Satisfactory	
Corporate Risk Audits:		
Absence Management	Limited	
Patient Care Services	Limited	
Governance Audits:		
Performance Management	Limited Year End Update: The issues leading to this Limited assurance opinion in May 2022 have largely been addressed in the interim period up to March 2023. Satisfactory assurance is provided as at March 2023.	
Risk Management	Satisfactory	

Definition of Levels of Assurance			
Satisfactory	Overall there is a satisfactory system of governance, risk management and control. While there may be some residual risk identified, this should not significantly impact on the achievement of system objectives.		
Limited	There are significant weaknesses within the governance, risk management and control framework which, if not addressed, could lead to the system objectives not being achieved.		
Unacceptable	The system of governance, risk management and control has failed or there is a real and substantial risk that the system will fail to meet its objectives.		

In the Financial Review audit, satisfactory assurance was provided in relation to NIAS financial processes, specifically Non-Pay Expenditure, management of DACs and legal payment processes. However, Limited assurance was provided in relation to payments to staff. Two significant findings were identified and relate to: Staff in Post (SIP) reporting and validation and Unsocial Hours payments. Some other issues remain from previous audits including the reporting of expenditure against business cases, and the level of verification controls in place. A review of current processes has commenced and action will be taken to strengthen controls in these areas.

Limited assurance was provided in the Performance Management Audit. This was on the basis that performance management reporting arrangements were not sufficiently robust and a requirement to include a wider range of performance and quality indicators. All recommendations within the report have now been implemented.

Limited assurance was provided in the Absence Management Audit. A number of significant findings were identified including: The Attendance Management Policy and Procedure was not fully fit for purpose; Extension of Pay process; Case Management of long term absence; and Recording of sick leave in the Global Roster System. While limited assurance was provided it was noted that Management had recognised many of the risks and action is progressing through the co-ordination of a HR Associate appointed through the HSC Leadership Centre.

Limited assurance was provided in relation to Patient Care Services (PCS). The scope of this audit was to review substantively the implementation of recommendations made in 2019/20. While it was recognised that a number of significant improvements have been made to enhance the control environment from the previous unacceptable assurance provided in 2019/20, further work is still required to fully embed a robust system for efficient and effective delivery of PCS. The significant findings identified in this report were: Performance Management Reporting and Inefficient utilisation of PCS crews.

Management is taking action to address the audit findings identified.

Recommendations to address all control weaknesses have been considered by the Audit and Risk Assurance Committee (ARAC) and have been, or are currently being, implemented. Progress on implementation will continue to be monitored by the Senior Management Team, reviewed by Internal Audit and considered by the ARAC.

#### Follow-up on previous Recommendations

Internal Audit carried out a review of the implementation of previous internal audit recommendations at mid-year and again at year-end. Progress continues to be made and at year-end, 142 (80%) of the outstanding 178 recommendations examined were fully implemented, a further 35 (19%) were partially implemented and 1 (1%) are not yet implemented.

Management are reviewing outstanding recommendations and current processes to ensure that appropriate action is taken in order to implement. All audit recommendations have been allocated an implementation date and a responsible officer.

#### **BSO Shared Services Audits**

A number of audits (summarised below) have been conducted in BSO Shared Services, as part of the BSO Internal Audit Plan. The recommendations in these Shared Service audit reports are the responsibility of BSO management to take forward and the reports have been presented to the BSO Governance & Audit Committee. BSO management accepted all recommendations in the 2022-23 internal audit reports and are working to implement improvements.

Audit Assignment	Level of Assurance
Accounts Payable	Satisfactory
Business Services Team	Satisfactory
Payroll Service Centre (PSSC)	Satisfactory – Elementary Payroll Processes Limited – SAP / HMRC RTI Reconciliation, Historic Sickness Absence, Net & Historic Overpayments and Agenda for Change 13.9 and 14.4 (previously known as Holiday Pay)
Recruitment Shared Service Centre (RSSC)	Limited – Recruitment processes

#### **Payroll Service Centre**

Whilst the overall level of assurance provided in respect of elementary Payroll processes was Satisfactory, four Significant issues remain which are deemed to be Limited. These areas relate to: whether data transferred automatically from the payroll system reconciles with HMRC data; Net & Historic Overpayments backlog, Historic Sickness absence payments and payments to staff under Agenda for Change 13.9 and 14.4.

#### **Recruitment Shared Service Centre**

Internal Audit provided limited assurance in respect of Recruitment processes on the basis that the operating challenges that were evident in last year's Internal Audit in RSSC and the wider HSC in terms of recruitment processes, remain. The eRecruit system functionality is not sufficient to meet the needs of RSSC or their customers without the multiple additional processes, controls and workarounds that are in place to facilitate the recruitment process. In some cases, this means the same information is recorded in multiple systems/places duplicating effort and increasing the risk of errors. The system deficiencies also hinder RSSC's ability to efficiently manage and monitor recruitments and to respond to some customer queries. The impact of these significant operating challenges was evidenced in performance against KPIs.

#### Overall Opinion

Overall, for the year ended 31 March 2023, the Head of Internal Audit has provided Overall Satisfactory assurance on the adequacy and effectiveness of the NIAS framework of governance, risk management and control.

The Head of Internal Audit acknowledged good progress has been made during the year to implement outstanding audit recommendations, including those from previous Limited/Unacceptable audit reports. In addition it was highlighted that it is important to note that Limited assurance has been provided in a number of areas in 2022-23 and continued management action is required to implement internal audit recommendations.

#### Regulation and Quality Improvement Authority (RQIA)

RQIA did not carry out any inspections in the Trust during the year. It is expected that a number of inspections will take place in 2023-24.

#### 11. Review of Effectiveness of the System of Internal Governance

As Accounting Officer, I have responsibility for the review of the effectiveness of the system of internal governance. My review of the effectiveness of the system of internal governance is informed by the work of the internal auditors and the executive managers within the Trust who have responsibility for the development and maintenance of the internal control framework, and comments made by the external auditors in their management letter and other reports. I have been advised on the implications of the result of my review of the effectiveness of the system of internal control by the Trust Board, Audit Committee and Assurance Committee (subsequently the Safety and People Committees). A plan to address weaknesses and ensure continuous improvement to the system is in place.

#### **12. Internal Governance Divergences**

Update on prior year control issues which have now been resolved and are no longer considered to be control issues

#### **Payments for Overtime**

Agenda for Change (AfC) states that only staff at Pay Bands 1 to 7 are eligible for overtime payments. During the last two years, the Department of Health issued determinations to vary the terms and conditions specified in AfC to permit overtime to be paid to staff at Pay Band 8 and above. This was only during the period of additional pressures created by COVID-19, for work in connection with those pressures. This highlighted a practice in NIAS that for a number of years, and in some limited circumstances, overtime had been paid to staff at Band 8 and above. During 2021-22 and 2022-23 the Trust operated in line with the regional DoH determination around Band 8 overtime whilst developing related plans to address the legacy arrangements when this determination no longer applies. These plans have now been implemented and payments beyond terms and conditions should no longer be applied.

#### **Managed Services**

The Business Services Organisation (BSO) has a contractual relationship with a supplier providing the managed service for the HR, Payroll, Travel and Subsistence System (HRPTS) for Health and Social Care NI. A sub-contractor of this supplier provides a service incorporating servers hosted at data centres owned by this sub-contractor. The sub-contractor went into administration in late March 2022.

The matter has now been resolved with the successful sale of the sub-contractor in July 2022 and a return to business as usual.

#### **Financial Position 2022-23**

The Trust achieved a breakeven position with a small surplus of £110k, made up of an operational surplus of 24k and receipts from the sale of assets of £86k. Cumulative savings of £2.6 million were implemented through a range of non-recurrent measures. A capital programme approaching £7m was also delivered which was within the Capital Resource Limit (CRL) set by the Department of Health. The Trust received significant non-recurrent

allocations during the year, predominately as part of the response to Covid-19 and associated pressures. The impact of the pandemic continues to have a significant effect on ambulance services and resources provided non-recurrently will need to be reviewed in 2023-24.

#### **Paramedic Education and Development**

The Trust is in a transition period for paramedic education. A final cohort of paramedics completed the legacy Ulster University Foundation Degree course in December 2022. The first annual cohort of the newer BSc in paramedic science hosted by Ulster University commenced in 2021 and will graduate in 2024. Funding has also been made available for up to 10 students a year to join the BSc programme at Year 2 from the existing cohort of NIAS Emergency Medical Technicians.

Recruitment is supplemented by a rolling external recruitment programme aimed primarily at attracting both experienced HCPC-registered Paramedics from outside of Northern Ireland, and more recently a programme has been developed to also allow for recruitment and mentoring of newly-qualified paramedics (NQPs) who have more recently completed their initial training. A programme for Community/Advanced Paramedics remains in development but funding originally earmarked for this was instead diverted to the acute Trusts to support paramedic placement during training as part of the external BSc programme and funding continues to remain a risk.

The Trust has to develop plans to provide the new students with placement opportunities. The DoH Workforce Policy Directorate has agreed to support two further Placement Coordinator posts for this programme which, together with the diversion of some NIAS resources and sound planning and management of the programme of work should adequately address this risk.

# Update on prior year control issues which continue to be considered control issues

#### **Direct Award Contracts (DACs)**

The pandemic resulted in ongoing and sustained challenges to service delivery. This required a dynamic response to support staff and services and included the use of Direct Award Contracts (DACs) when it was not practical or possible to follow normal procurement and tender processes. The need to respond at pace resulted in some instances when the required administration and necessary approvals was retrospective in that goods or services had already been provided. In addition, uncertainties in relation to the impact and duration of COVID-19 pressures resulted in instances when DACs were exceeded either in terms of duration or value. Finally, the availability of staff due to service pressures, absence and redeployment during the period resulted in a number of areas where the required administration and approvals were outstanding at the end of the year.

Such instances are considered by the Audit & Risk Assurance Committee and also reported to the Department of Health. As part of the recovery from the pandemic the Trust is working to ensure that any outstanding administration is completed and that the use of DACs in

subsequent years is minimised. While the number of DAC's required has reduced, there remain a number of administrative issues that still need to be resolved.

#### **Condition of Estate**

The Northern Ireland Ambulance Service operates from a total of 55 Locations throughout Northern Ireland. From these 55 locations, NIAS operate 59 facilities including 33 Ambulance Stations, 19 Deployment Points and 7 other facilities.

Of these, NIAS own 17 facilities (less than 30% of the Estate) with the remainder owned by other bodies on other HSC Trust properties, inter-body (NIFRS / DoH retained) or through commercial leases.

The majority of the NIAS Estate is in overall poor condition, as highlighted in the Building Condition Surveys conducted by Oakleaf in 2021. These surveys feed into the Annual DoH State of the Estate Report (SOTER) with functional suitability, capacity and overall building condition issues recorded at most sites.

A planned programme of works has resulted in significant improvements in statutory compliance matters, however Capacity, Age and Building Condition remain issues across the NIAS Estate. The estimated investment required to address immediate backlog maintenance liabilities is £1.7m. The Trust is working to deliver a revised Clinical Response Model (CRM) which includes the provision of a safe, fit for purpose estate to support the workforce. This is a significant programme of work that will require investment over a number of years. The Trust will work with DoH to implement the Clinical Response Model and deliver the associated improvements in Estate.

#### **Business Services Transformation Programme and Shared Services**

The Business Services Transformation Programme (BSTP) replaced aged Finance and Human Resources systems and the programme also introduced HSC wide Shared Services for all HSC organisations in Northern Ireland.

Internal Audit carry out a range of audits of shared services areas each year and a number of issues have been identified (see Section 10 BSO Shared Service Audits above).

The Trust continues to work with BSO Shared Services to make improvements and to realise the expected benefits of the new systems and structures.

#### **Hospital Turnaround Times**

As a consequence of COVID-19, the Health and Social Care system has continued to experience unprecedented and ongoing pressures. NIAS has continued to experience a significant increase in the turnaround times at hospitals which is largely due to delays in the patient handover process at Emergency Departments. It has been recognised locally and nationally that handover delays for ambulance services result in increased risk to patients and the community due to increased response times.

In the period 1 April 2022 to 31 March 2023, NIAS lost a total of 103,000 operational hours waiting outside Emergency Departments. This equates to losing 22% of operational capacity throughout the year.

This significant reduction in daily operational capacity presents a significant risk to patients having to wait longer for an ambulance response within the community, as the resources are tied up trying to get patients into Emergency Departments.

#### **Response Performance**

Demand for ambulance services is projected to increase year on year. Increasing the Pre-Triage sieve capture rate, which is an early identification of Category 1 life- threatening calls, to 60% improves the allocation time therefore can improve response times.

In the new Clinical Response Model (CRM), Category 1 calls equate to approximately 5% of calls as opposed to 30% in the previous model. The Category 1 90<sup>th</sup> percentile target is challenging in Northern Ireland, meeting this target is dependent on other standards being met within the target response times such as:

- Increasing hear & Treat rates;
- Turnaround times of 30 minutes at hospitals; and
- Increase of staffing levels within EAC and Operational front line staff.

The current standard response targets are as follows:

Category	Mean average definition	Mean standard	90 <sup>th</sup> centile standard
C1	A25 = A24 / A8	8 min	15 min
C1T (indicator *)	A28 = A27 / A9	19 min	30 min
C2	A31 = A30 / A10	18 min	40 min
С3	A34 = A33 / A11		120 min [02:00:00] HH:MM:SS
C4	A37 = A36 / A12		180 min [03:00:00] HH:MM:SS

Independent modelling identified that the required performance standards could not be achieved by the Trust with the resources currently available. A business case to obtain funding for the necessary resources was submitted to the Department of Health in December 2021. An allocation of £2.5m was made available in 2021-22 in order to progress with the resource programme, however, we have no indication of additional funding for 2023-24.

#### **Organisational Capacity**

There is recognition of the central role that NIAS and its staff have to contribute to the wider transformation agenda, in particular to manage demand within the community with less reliance on secondary care. NIAS continues to add to its directory of Appropriate Care Pathways. Advice and clinical oversight of call prioritisation is provided by the paramedic

staffed Clinical Support Desk, which now operates for extended hours. The frequent caller team has expanded and has had a very beneficial effect on unnecessary calls to the ambulance service. NIAS has introduced a Clinical Safety Plan with our Emergency Ambulance Control Centre to provide escalation actions for coping with demand and response challenges.

The Clinical Response Model business case was re-submitted to the Department of Health in February 2023. The focus of the business case is to deliver a clinical response model that will adjust NIAS' capacity to meet the demand and deliver CRM response times, subject to approval and affordability.

#### **Attendance Management**

Levels of staff absence due to sickness continued to present a challenge within NIAS during 2022-23. The cumulative level of hours lost due to sickness as at end of March 2023 was 12.3%. This represents an increase from 11.7% the previous year.

#### **Emergency Ambulance Control Telephone Contingency**

Ambulance Services can experience an occasional discrepancy between the number of incoming calls and the number of available call-takers. The Trust's current mitigation arrangements are coordinated by BT Emergency Operators under a reviewed UK Telephony Network Agreement. When calls are queuing to be answered by NIAS Emergency Ambulance Control, the BT Operators can divert them to one of our nominated Network Telephony Partners who can answer and process 999 calls on our behalf then electronically pass the resulting call details onto our Computer Aided Dispatch (CAD) system. Significant work has been undertaken by NIAS and other UK Ambulance Services to connect Ambulance Control Centres allowing for the swift electronic passing of calls to be transferred back to the appropriate Ambulance Service to allow for ambulance dispatch without further delays. This arrangement has been activated on a more regular basis due to the increase in 999 call demand across the UK.

#### **Cyber Security**

The Trust continue to participate with regional colleagues on the HSCNI Cyber Security Programme. HSCNI Cyber Security is co-ordinated regionally through the Cyber Security Programme Board with senior management representation from all six Health Care Trusts and the Business Services Organisation (BSO ITS). Cyber awareness training is being carried out via MetaCompliance across HSC to enhance the regional HSC eLearning Cyber Training along with Phishing Campaigns to test users' responses.

The Information Technology Security Group (ITSG) acts as the management group for NIAS IT security and provides oversight on risk, outstanding audit recommendations, the threat landscape and any security incidents that may impact the Trust.

#### **Patient Care Service**

NIAS operates non-emergency scheduled services alongside our Accident & Emergency activity. This workload is managed by the Patient Care Service (PCS).

The 2022-23 PCS Internal Audit (completed in February 2023) which focused primarily on the outstanding recommendations from the 2019-20 PCS Audit was largely reflective of the positive trajectory of PCS through its Improvement Programme.

Though the audit provided only Limited Assurance, it is positive that the Audit has identified progression against all of the original recommendations and that several of them have now been closed down as fully implemented. It is also pleasing that confidence was expressed by the audit team in their report that implementation of the Action Plans/Sprints associated with the PCS Improvement Plan will lead to the full implementation of all of the original audit recommendations.

This is a view shared by NIAS Management. The 2022-23 Audit has endorsed the Trust's view that significant progress has been made by PCS but that some work needs to be completed to fulfil the objectives of the Improvement Plan, to deliver a more efficient and effective high-quality, patient-focused service and by doing so deliver benefits for the patient, NIAS and across the spectrum of healthcare provision.

#### Safeguarding

The Trust has undertaken a number of measures to improve Safeguarding systems and processes within the organisation in line with the actions on the RQIA Quality Improvement Plan. There remains a number of key areas for action and improvement, including those related to continued safeguarding training and education to enhance the level of safeguarding knowledge and skills for our workforce, in particular a focus on education for staff providing direct care for vulnerable patients.

As the Trust develops key relationships with safeguarding partner agencies in Health and Social Care, criminal justice, and community voluntary sector, this engagement will increase the demands on safeguarding resources within NIAS, particularly in respect of reporting and case reviews

Building upon the need to improve the referral process, the Trust has engaged with the other five HSC Trusts in respect of welfare pathways for adults. Safeguarding specific referral pathways have been developed for the REACH software in the new handheld digital devices. The implementation of REACH will be key to progressing improved reporting with clear safeguarding and welfare pathways for patients across Northern Ireland.

# Identification of new issues in the current year and anticipated future issues

#### **Financial Position 2023-24**

While the Trust achieved a breakeven financial position in the year to 31 March 2023, it is important to note that this was achieved following the receipt of significant non-recurring funding, one off contingency measures, expenditure reductions and planned in year slippage on investment. As a result the Trust is aware of the underlying recurrent deficit position it faces, which, coupled with further in-year emergent pressures, ensure that the significant budgetary challenges continue into 2023-24. The outlook for 2023-24 is indicating the financial year's resources will also be increasingly constrained, both from a

capital and revenue perspective. In addition, there is the ongoing impact and additional expenditure that will be required in relation to COVID-19.

Given the level of the significant and ongoing financial challenges currently faced across HSC, the Trust will carry a significant recurrent and in year deficit into 2023-24. The Trust remains committed to working with the DoH in seeking to find solutions to deliver a breakeven position each year.

The Northern Ireland Budget Act 2023 was passed by Parliament and received Royal Assent on 8 February 2023 which authorised the cash and use of resources for all departments and other bodies for the full 2022-23 year, and also included a Vote on Account for the early months of the 2023-24 financial year. This will be followed by a further Budget Bill which the Secretary of State will bring to Parliament in due course, following the 2023-24 Northern Ireland Budget which he set in his Written Ministerial Statement on 27 April 2023.

The Written Ministerial Statement has enabled the Department of Health to issue opening allocations for 2023-24 which will enable essential services to continue. However, despite plans to deliver significant efficiencies, the budget allocation provided has resulted in a significant funding gap. The Department of Health and its Arm's Length Bodies are currently working on the development of further savings measures to bridge the gap. However, it is clear that, if the Department of Health does not receive significant additional funding, the implementation of high impact savings will be required, with adverse consequences for an already highly pressurised health and social care system which would be very damaging for service delivery.

#### **Emergency Planning and Preparedness**

Following an incident related to equipment safety, concerns were highlighted relating to governance and assurance arrangements within the Emergency Planning Department.

At the request of the Trust, the Association of Ambulance Chief Executives (AACE) undertook a review of the Emergency Preparedness, Resilience and Recovery functions within the Trust in 2022. This confirmed a number of gaps in existing arrangements and built on an internal draft action plan to address key areas for improvement through a number of recommendations. Work on addressing these areas is already underway under the leadership of the acting Assistant Director for Emergency Planning, and regular updates will be provided to the Trust Safety, Quality, Patient Experience and Performance Committee during the year.

#### **Effect of Unplanned Service Reconfiguration**

A number of service developments and reconfigurations in recent years have impacted on NIAS, most often through the requirement to transport patients longer distances in order to receive definitive care. Examples include the introduction of the primary Percutaneous Coronary Intervention (pPCI) network, the stroke network and the subsequent development of the regional thrombectomy service, and the introduction of the major trauma network. Only the pPCI network saw any uplift in resourcing for NIAS.

The result of these reconfigurations is that local areas, from where patients are transported to a more distant hospital (with longer journey times), may find themselves depleted of

ambulance cover for periods of time. This issue has become more significant with recent unplanned service changes such as the temporary withdrawal of emergency surgical services from Daisy Hill Hospital and the South West Acute Hospital, and the suspension of stroke services at Daisy Hill Hospital. Each of these have required bypass arrangements to be put in place or an increase in the number of transfers by ambulance.

NIAS is represented on groups considering future service reconfiguration and will continue to raise the need for adequate resourcing to be made available to mitigate against the risk which passes to NIAS with each of these changes in relation to patients in the community to whom a response is delayed if local ambulance cover is depleted.

#### Conclusion

The Trust has a rigorous system of accountability, which I can rely on as Accounting Officer to form an opinion on the probity and use of public funds, as detailed in Managing Public Money Northern Ireland (MPMNI).

Further to considering the accountability framework within the Trust and in conjunction with assurances given to me by the Head of Internal Audit, I am content that the Trust has operated a sound system of internal governance during the period 2022-23. I recognise that work is required to address issues highlighted during the year including, but not limited to, the issue identified by Internal Audit.

Mr Michael Bloomfield Chief Executive

22 June 2023

# Remuneration and Staff Report

# Remuneration Report for the Year Ended 31 March 2023

Section 421 of The Companies Act 2006, as interpreted for the public sector, requires HSC bodies to prepare a Remuneration Report containing information about directors' remuneration. The Remuneration Report summarises the remuneration policy of the Northern Ireland Ambulance Service Health and Social Care Trust and particularly its application in connection with senior managers. The report must also describe how the Trust applies principles of good corporate governance in relation to senior managers' remuneration.

Senior managers include the Chief Executive and Directors who operate at Board level and are listed on pages 112 and 113 and also on page 81 of the Directors' Report.

#### **Remuneration Committee**

The membership of the Remuneration Committee is comprised exclusively of Non-Executive Directors and the Committee is chaired by the Chair of the Trust Board. Executive Director attendance is restricted to the Chief Executive and the Director of Human Resources and Organisational Development who absent themselves at appropriate points in the meeting to prevent any issues such as an actual or perceived conflict of interest arising. Membership of and attendance at the Remuneration Committee is detailed on page 81 of the Directors' Report.

# **Remuneration Policy**

The policy on the Remuneration of Directors and Senior Managers for current and future periods is governed and administered on the basis of the DoH Departmental Directives and Circulars on HSC Senior Executive Salaries. NIAS applies the Senior Executive Performance Management Scheme as set out within Departmental Circular HSS(SM) 1/2003. The circular sets out the following requirements which are applied within the Trust:

- The Board determines the strategic and operational corporate objectives of the Trust for the year ahead taking into account the parameters established by the Department and incorporating them within the Trust Delivery Plan;
- The Chair agrees the Chief Executive's performance objectives, undertakes a review of performance and objectives, and completes a final report on the Chief Executive's performance each year;
- The Chief Executive agrees the individual performance objectives of Directors, undertakes a review of performance and objectives, and completes a final report on Director's performance each year;
- Senior Executives agree performance objectives with the Chief Executive,

- participate in reviews and take responsibility for personal development;
- Performance objectives are linked to Trust Delivery Plans and Strategic Plans. Performance objectives are clearly defined and measurable;
- Each Director's performance is reviewed by the Chief Executive on an annual basis.
  The approach adopted is based on an assessment of the Executive Director's
  contribution towards the achievement of agreed objectives aligned to the Trust's
  Strategic and Trust Delivery Plan. A similar approach is used by the Chair for the
  Chief Executive. Performance pay would be considered within the total pay limit
  determined by the DoH;
- The Remuneration Committee encourages effective appraisal of staff and scrutinises objectives for consistency, robustness and alignment with priorities. The Committee also ensures that a robust process has taken place and monitors for consistency of assessment before recommending overall banding and award for senior executives; and
- The Remuneration Committee recommendations are presented to Trust Board for consideration and approval.

HSC (SE) 1 2023 pay award 2020-21 and HSC (SE) 2 2023 pay award 2021-22 for senior executives have been issued but not paid in 2022-23. The 2022-23 pay award circular is outstanding.

#### **Service Contracts**

All Directors, except the Medical Director, in the year 2022-23 were employed on the Department of Health (NI) Senior Executive Contract. The contractual provisions applied are those detailed and contained within Circulars HSS (SM) 2/2001, for those Senior Executives appointed prior to December 2008, and HSS(SM) 3/2008 for those Senior Executives appointed in the Trust since December 2008. The Trust Medical Director is employed under a contract issued in accordance with HSC Medical Consultant Terms and Conditions of Service (Northern Ireland) 2004.

#### **Directors**

#### **Non-Executive Directors**

Mrs Nicole Lappin, Chair, appointed 1 July 2018 for a period of four years. This term of office was initially extended from 1 July 2022 to a date not later than 31 December 2022 and further extended from 1 January 2023 to a date not later than 5 April 2023.

Mr Dale Ashford, Non-Executive Director, appointed 16 April 2018 for a period of four years and reappointed 16 April 2022 to a date not later than 15 April 2026.

Mr William Abraham, Non-Executive Director, initially appointed 18 May 2015 for a period of four years and reappointed 18 May 2019 to a date not later than 17 May 2023. This was subsequently extended to a date not later than 17 August 2023.

Mr Trevor Haslett CBE, Non-Executive Director, initially appointed 18 May 2015 for a period of four years and re-appointed 18 May 2019 to a date not later than 17 May 2023. This was subsequently extended to a date not later than 17 August 2023.

Mr Jim Dennison, Non-Executive Director, appointed 1 March 2019 for a period of four years and reappointed 1 March 2023 to a date not later than 28 February 2027.

The terms and conditions applicable to Non-Executive Directors are issued by the DoH.

#### **Directors**

Mr Michael Bloomfield, Chief Executive, appointed 19 March 2018.

Mr Brian McNeill, Director of Operations, appointed 1 June 2005. Mr McNeill took up the role of Programme Director Clinical Response Model on 1 May 2019. Mr McNeill retired from the Trust on 31 January 2023.

Ms Rosie Byrne, Director of Operations, appointed 7 September 2020.

Dr Nigel Ruddell, Medical Director, appointed 1 November 2018.

Mr Paul Nicholson, Interim Director of Finance, appointed 1 July 2019. Mr Nicholson was appointed Director of Finance, Procurement, Fleet and Estates on 16 November 2022.

Ms Michelle Lemon, Interim Director of Human Resources and Corporate Services, appointed 8 January 2020. Ms Lemon was appointed as Director of Human Resources and Organisational Development on 22 September 2022.

Ms Lynne Charlton, Director of Quality, Safety & Improvement, appointed 1 November 2019.

Ms Maxine Paterson, Director of Planning, Performance and Corporate Services, appointed 5 April 2020. Ms Paterson was appointed Deputy Chief Executive on 1 March 2023.

#### **Notice Periods**

A three-month notice period is to be provided by either party except in the event of summary dismissal. There is nothing to prevent either party waiving the right to notice or from accepting payment in lieu of notice.

# **Termination Payments (Audited)**

Statutory provisions only as detailed in contract. There were no payments made to directors in respect of either compensation for loss of office or early retirement during 2022-23 (2021-22: £111k).

#### Senior Employees' Remuneration (Audited)

The salary, pension entitlements and the value of any taxable benefits in kind of the most senior members of the Trust were as follows:

		2022	-23		2021-22						
Name	Salary £000	Benefits in Kind (rounded to nearest £100)	Pensions Benefit (rounded to nearest £1,000)	Total £000	Salary £000	Benefits in Kind (rounded to nearest £100)	Benefit (rounded	Total £000			
Non-Executive Directors		,				,					
Nicole Lappin	25 - 30	200***	-	25 - 30	20 - 25	100***	-	20 - 25			
William Abraham	5 - 10	-	-	5 - 10	5 - 10	100***	-	5 - 10			
Dale Ashford	5 - 10	-	-	5 - 10	5 - 10	-	-	5 - 10			
Jim Dennison	5 - 10	-	-	5 - 10	5 - 10	-	-	5 - 10			
Trevor Haslett, CBE	5 - 10	-	-	5 - 10	5 - 10	-	-	5 - 10			
Directors **											
Michael Bloomfield	95 - 100	100***	14	110 -115	90 - 95	100***	33	125 - 130			
Rosemarie Byrne	80 - 85	-	14	90 - 95	80 - 85	-	26	105 - 110			
Lynne Charlton	75 - 80	-	12	85 - 90	70 - 75	-	25	95 - 100			
Michelle Lemon	75 - 80	-	22	95 - 100	65 - 70	-	23	85 - 90			
Brian McNeill* (to 31 Jan 2023)	80 - 85	-	16	95 - 100	75 - 80	-	8	85 - 90			
Paul Nicholson	75 - 80	-	11	85 - 90	70 - 75	-	26	100 - 105			
Roisin O'Hara (to 31 Mar 2022)	-	-	-	-	70 - 75	-	23	95 - 100			
Maxine Paterson	90 - 95	-	14	105 - 110	80 - 85	-	28	110 - 115			
Dr Nigel Ruddell	130 -135	-	55	185-190	125 -130	-	71	195 - 200			

The remuneration and pension values, detailed in the above table, relate to the period of Directorship as outlined in the Remuneration Report. The following pay award circulars are reflected in the table and were paid in 2022-23: HSC (SE) 1 2022 Senior Executive Pay Award 2018-19 and HSC (SE) 2 2022 Senior Executive Pay Award 2019-20.

HSC (SE) 1 2023 pay award 2020-21 and HSC (SE) 2 2023 pay award 2021-22 for senior executives have been issued but not paid in 2022-23. The 2022-23 pay award circular is outstanding.

The value of pension benefits accrued during the year is calculated as (the real increase in pension multiplied by 20) plus (the real increase in any lump sum) less (the contributions made by the individual). The real increases exclude increases due to inflation or any increases or decreases due to a transfer of pension rights.

The single total figure of remuneration includes salary, bonus / performance pay, benefits in kind as well as pension benefits.

<sup>\*</sup> denotes full-year equivalent salary.

<sup>\*\*</sup> The remuneration information disclosed above reflects the relevant directors' salaries on a pro-rata basis.

<sup>\*\*\*</sup> The monetary value of benefits in kind covers any benefits provided by the employer and treated by HM Revenue and Customs as a taxable emolument. These include for example, travel and cycle to work scheme.

#### Senior Employees' Pension (Audited)

		2022-23			
Name	Real Increase in Pension and Related Lump Sum at Age 60 £000s	Total Accrued Pension at Age 60 and Related Lump Sum £000s	CETV at 31/03/22 £000s	CETV at 31/03/23 £000s	Real Increase in CETV £000s
Michael Bloomfield	0-2.5 + lump sum of 0-2.5	50-55 + lump sum of 100 - 105	942	988	6
Rosemarie Byrne	0-2.5 + lump sum of 0-2.5	30-35 + lump sum of 65-70	592	625	5
Lynne Charlton	0-2.5 + lump sum of 0-2.5	25-30 + lump sum of 45-50	399	425	3
Michelle Lemon	0-2.5 + lump sum of 0-2.5	20-25 + lump sum of 35-40	337	377	4
Brian McNeill	0-2.5 + lump sum of 0-2.5	40-45 + lump sum of 115-120	933	975	12
Paul Nicholson	0-2.5 + lump sum of 0-2.5	30-35 + lump sum of 55-60	553	584	4
Roisin O'Hara	-	-	-	-	-
Maxine Paterson	0-2.5 + lump sum of 0-2.5	10-15 + lump sum of 0-5	133	154	2
Dr Nigel Ruddell	2.5-5.0 + lump sum of 2.5-5.0	40-45 + lump sum of 75-80	694	790	46

As Non-Executive Directors do not receive pensionable remuneration, there will be no entries in respect of pensions for Non-Executive Directors. In addition, no entries are provided in respect of pensions for Directors who either leave the Trust's employment or reach the applicable pensionable age during the financial year.

#### **Cash Equivalent Transfer Value**

A Cash Equivalent Transfer Value (CETV) is the actuarially assessed capital value of the pension scheme benefits accrued by a member at a particular point in time. The benefits valued are the member's accrued benefits and any contingent spouse's pension payable from the scheme. A CETV is a payment made by a pension scheme, or arrangement to secure pension benefits in another pension scheme or arrangement when the member leaves a scheme and chooses to transfer the benefits accrued in their former scheme. The pension figures shown relate to the benefits that the individual has accrued as a consequence of their total membership of the pension scheme, not just their service in a senior capacity to which the disclosure applies. The CETV figures include the value of any pension benefits in another scheme or arrangement which the individual has transferred to the HSC pension scheme. They also include any additional pension benefit accrued to the member as a result of their purchasing additional years of pension service in the scheme at their own cost. CETVs are calculated within the guidelines and framework prescribed by the Institute and Faculty of Actuaries using the guidance on discount rates for calculating unfunded public service pension contribution rates that was extant at 31 March 2023. HM Treasury published updated guidance on 27 April 2023; this guidance will be used in the calculation of 2023-24 CETV figures.

#### **Real Increase in CETV**

This reflects the increase in CETV effectively funded by the employer. It takes account of the increase in accrued pension due to inflation, contributions paid by the employee (including the value of any benefits transferred from another pension scheme or arrangement) and uses common market valuation factors for the start and end of the period.

#### **Negative Results**

In some cases, the real increase in CETV and the pension benefits accrued for the single total figure of remuneration can be negative – that is, there can be a real decrease. This is particularly likely to happen during periods of pay restraint and/or where inflation is higher than pay increases. The final salary pension of a person in employment is calculated by reference to their pay and length of service. The pension will increase from one year to the next by virtue of them having an extra year's service and by virtue of any pay rise during the year. Where there is no pay rise, the increase in pension due to extra service may not be sufficient to offset the inflation increase – that is, in real terms, the pension value can reduce, hence the negative values.

## **Fair Pay Disclosure (Audited)**

Reporting bodies are required to disclose the relationship between the remuneration of the highest paid director in their organisation and the median remuneration of the organisation's workforce.

In accordance with Circular Reference: HSC(F) 23-2013 Amendment on Disclosure of Highest Paid Director and Median Remuneration, (Hutton Fair Pay Review Disclosure) staff pay in March 2022 (excluding severance payments) should be annualised, and the salary of the highest paid Director is taken at the mid-point of the remuneration band as disclosed in the Senior Employees' Remuneration table. Total remuneration includes salary, non-consolidated performance-related pay, benefits in kind as well as severance payments. It does not include employer pension contributions and the cash equivalent transfer value of pensions.

The Hutton Review (in place since 2013) has now been superseded with the circular dated 2 February 2022 Revised Fair Pay Disclosures Implementation Guidance Circular Reference HSC(F) 06-22. The fair pay figures below have been also prepared on the basis of the requirements notified in DoH Circular HE1/22/60771 – Revised Fair Pay Disclosure Implementation Guidance.

The table below outlines this relationship:

	2022-23	2021-22
Band of Highest Paid Director Remuneration	£130k- £135k	£125k - £130k
Highest Paid Director Remuneration Band Midpoint	132,500	127,500
Highest Paid Director Remuneration Band Midpoint Percentage Change from previous	3.92%	4.08%
year Median Remuneration	C40 400	C20 447
	£42,133	£39,417
Median Pay Ratio	3.14	3.23
Average Remuneration	£41,992	£39,333
Average Remuneration Percentage Change	6.76%	5.39%
from previous year		
Range of Staff Remuneration	£5,363 - £132,500	£6,406 - £127,500

The midpoint of the remuneration band of the highest paid Director in the Northern Ireland Ambulance Service HSC Trust during the financial year was £132,500 (2022: £127,500) which was a change from the previous year of 3.92%. (2022: 4.08%) This was 3.14 times (2022: 3.23) the median remuneration of the workforce, which was £42,133 (2022: £39,417).

There was a decrease in the median ratio from 3.23 in 2021-22 to 3.14 in 2022-23. The resulting lower median earnings ratio is due a general interim 3% increase in consolidated pay at all points.

The average remuneration this financial year was £41,992 (2022: £39,333) which represented a 6.76% increase (2022: 5.39%) on the average remuneration in the last

financial year.

The range of staff remuneration this financial year was £5,363 - £132,500. (2022: £6,406 - £127,500)

Fair Pay Disclosure requirements effective last financial year, in relation to the percentage change in the highest paid director banded salary and allowances are outlined below:

	2022-23	2021-22
25th percentile salary and allowances	£30,056	£27,243
Pay Ratio – Highest paid Director: 25 <sup>th</sup> percentile	4.41	4.68
75th percentile salary and allowances	£50,735	£48,784
Pay Ratio – Highest paid Director: 75 <sup>th</sup> percentile	2.61	2.61

The remuneration band of the highest paid director in the Northern Ireland Ambulance Service HSC Trust during the financial year was £132,500 (2022: £127,500) which was 4.41 (2022: 4.68) times the 25<sup>th</sup> percentile remuneration of the workforce, which was £30,056 (2022: £27,243) and also 2.61 (2022: 2.61) times the 75<sup>th</sup> percentile remuneration of the workforce, which was £50,735. (2022: £48,784)

The lower ratios to highest earner at the 25<sup>th</sup> percentile and median are explained by the higher rate of pay progression applied at the lower to mid salary ranges.

Increases in average remuneration is largely due to the effect of pay awards.

# **Off Payroll Engagements**

There was no off-payroll engagement of a board member during the financial year (2022: nil). The total number of individuals on payroll that have been deemed 'board members' during the financial year is 11. (2022: 12)

# **Staff Report**

# **Number of Senior Staff by Band and Gender**

	Director		Non- Executive Director		Senior Staff*		Other Staff		TOTAL	
	No	As %age	No	As %age	No	As %age	No	As %age	No	As %age
Male	3	46%	4	80%	16	73%	956	64%	979	64%
Female	4	54%	1	20%	6	27%	552	36%	563	36%
Total	7		5		22		1508		1542	

<sup>\*</sup> Senior staff are considered to be those operating at Assistant Director level (Band 8b and above) and excludes those operating at Senior Manager level (Band 8a and below).

The information in the above table is taken from the Human Resources, Payroll & Travel System (HRPTS) and reflects the position of staff in post on 31 March 2023. The above figures do not include bank workers or dual employments.

## **Staff Policies Applied During 2022-23**

#### Achievements during 2022-23 in relation to the workforce included:

Delivery of a new Health and Wellbeing Strategy for the Trust.

The Trust has continued to recruit new staff, both in front line operations and to supporting Clinical and Corporate functions. The Trust continues to manage its workforce through the application of a range of HR policies and procedures and in accordance with its statutory responsibilities under equality and employment legislation and best practice.

The Trust is fully committed to meeting its statutory duties under Section 75 of the Northern Ireland Act, the Human Rights Act, the Disability Discrimination Act and the Disability Discrimination (NI) Order. All employment policies are implemented in line with the Trust's Equality of Opportunity Policy and Equality Scheme.

During 2022-23, 53 applications were received by the Trust from individuals who declared a disability and the Trust employs 64 staff (includes Bank) who declare a disability as at 31 March 2023. The Trust continues to implement its statutory responsibility to make reasonable adjustments in relation to selection, appointment and employment processes and arrangements, including making reasonable adjustments to facilitate the continued employment in relation to staff who acquire a disability during their employment. The Trust also continues to support students attending the Regional Ambulance Clinical Training Centre who declare a disability and make reasonable adjustments to both the learning environment and assessment arrangements as appropriate.

The Trust is fully committed to meeting its obligations under the Public Interest Disclosure

(Northern Ireland) Order 1998, which provides protection to NIAS employees who make a disclosure, in the public interest, about suspected malpractice/wrongdoing in the workplace.

The NIAS 'Your Right to Raise a Concern' (Whistleblowing) Policy has been developed and implemented to provide a framework under which all such concerns are managed, with a Non-Executive Director (NED) appointed to have oversight of the NIAS Whistleblowing Policy and to ensure that a culture of openness is encouraged and supported throughout the organisation.

The Trust recognises that staff who are prepared to speak up should be considered one of its most important sources of information in seeking to enhance its reputation; identify and address problems that disadvantage or endanger other people; and present opportunities for learning. Where appropriate, concerns raised are subject to investigation, normally conducted by a professional manager who is external to the Trust. Each whistleblowing concern is treated with the upmost confidence to protect the anonymity of the whistleblower. During 2022-23, a total of two Whistleblowing complaints were investigated by the Trust. Where appropriate, the Trust formally communicates with each whistleblower to inform them of investigation outcomes, actions and learning outcomes.

#### **Staff Turnover**

	2022-23	2021-22
Staff Turnover %	5.13%	4.35%

As the majority of our workforce are front line ambulance staff, the labour turnover rate is low due to a lack of opportunity for similar careers outside of the Northern Ireland Ambulance Trust. In the last financial year 57.14% of turnover was due to staff resigning from their post and the other 42.86% was made up of staff retiring or terminations of contract.

# Staff Engagement including Health and Wellbeing

Evidence shows that staff wellbeing is correlated with patient safety and patient care. In the Workforce section of the Performance Report, details are provided on the areas were NIAS has actively engaged with staff and include Health and wellbeing, peer support, physical safety, psychological support, the NIAS/UNISON health and wellbeing partnership and the Women's Development Forum.

#### Staff Costs (Audited)

		2023		Restated 2022	Restated 2021
Staff costs comprise:	Permanently employed staff £000s	Others £000s	Total £000s	Total £000s	Total £000s
Wages and salaries	69,518	4,337	73,855	69,536	65,343
Social security costs	6,866	0	6,866	7,359	7,369
Other pension costs	13,163	0	13,163	12,609	11,391
Sub-Total	89,547	4,337	93,884	89,504	84,103
Capitalised staff costs	49	96	145	393	281
Total staff costs reported in Statement of Comprehensive Net Expenditure	89,596	4,433	94,029	89,897	84,384
Less recoveries in respect of outward secondments	(10)	0	(10)	0	0
Total Net Costs	89,586	4,433	94,019	89,897	84,384

The figures for 2021-22 and 2020-21 have been restated to reflect a movement from a liability to a provision for Holiday Pay shortfall as outlined in more detail in Note 15.1 and Note 24.

Staff costs include £nil (2022: £nil and 2021: £nil) relating to the Charitable Trust Funds.

There were £145k staff costs charged to capital projects during the year. (2022: £393k and 2021: £281k)

The Trust participates in the HSC Pension Scheme. Under this multi-employer defined benefit scheme both the Trust and employees pay specified percentages of pay into the scheme and the liability to pay benefit falls to the DoH. The Trust is unable to identify its share of the underlying assets and liabilities in the scheme on a consistent and reliable basis.

As per the requirements of IAS 19, full actuarial valuations by a professionally qualified actuary are required with sufficient regularity that the amounts recognised in the financial statements do not differ materially from those determined at the reporting period date. This has been interpreted in the FReM to mean that the period between formal actuarial valuations shall be four years. However, it has been noted in HM Treasury guidance that the validation and processing of some of the Schemes' data may not be finalised until after the 2022-23 accounts are laid. Schemes are not automatically required to reflect 2022 scheme valuation data in the 2022-23 accounts. The actuary reviews the most recent actuarial valuation at the statement of financial position date and updates it to reflect current conditions. The 2016 valuation for the HSC Pension scheme updated to reflect current financial conditions and a change in financial assumption methodology will be used in 2022-23 accounts.

#### Average Number of Persons Employed (Audited)

		2023		2022	2021
The average number of whole time equivalent					
persons employed during the year was as follows:	Permanently				
	employed staff	Others	Total	Total	Total
	No.	No.	No.	No.	No.
Medical and dental	2	0	2	2	2
Nursing and midwifery	0	0	0	0	0
Professions allied to medicine	1	0	1	1	0
Ancillaries	16	63	79	90	87
Administrative & clerical	154	45	199	187	164
Ambulance staff	1,320	5	1,325	1,333	1,265
Works	0	0	0	0	0
Other professional and technical	0	0	0	0	0
Social services	0	0	0	0	0
Other	0	0	0	0	0
Total Average Number of Persons Employed Less average staff number relating to capitalised staff	1,493	113	1,606	1,613	1,518
costs Less average staff number in respect of outward	(4)	(2)	(6)	(10)	(6)
secondments	(1)	0	(1)	0	0
Total Net Average Number of Persons Employed	1,488	111	1,599	1,603	1,512

The number of persons employed include nil (2022: nil and 2021: nil) relating to the Charitable Trust Funds.

#### **Pension Liabilities**

The Trust participates in the HSC Superannuation Scheme. Under this multi-employer defined benefit scheme both the Trust and employees pay specified percentages of pay into the scheme and the liability to pay benefit falls to the Department of Health. The Trust is unable to identify its share of the underlying assets and liabilities in the scheme on a consistent and reliable basis.

Pension benefits are administered by BSO HSC Pension Service. Two schemes are in operation, HSC Pension Scheme and the HSC Pension Scheme 2015. There are two sections to the HSC Pension Scheme (1995 and 2008) which was closed with effect from 1 April 2015 except for some members entitled to continue in this Scheme through 'Protection' arrangements. On 1 April 2015 a new HSC Pension Scheme was introduced. This new scheme covers all former members of the 1995/2008 Scheme not eligible to continue in that Scheme as well as new HSC employees on or after 1 April 2015. The 2015 Scheme is a Career Average Revalued Earnings (CARE) scheme.

Discrimination identified by the courts in the way that the 2015 pension reforms were introduced must be removed by the DoH. It is expected that, in due course, eligible members with relevant service between 1 April 2015 and 31 March 2022 may be entitled to different pension benefits in relation to that period. The different pension benefits relate to the different HSC Pension Schemes i.e. 1995 Section, 2008 Section and 2015 Scheme and is not the monetary benefits received. This is known as the 'McCloud Remedy' and will impact many aspects of the HSC Pension Schemes including the scheme valuation outcomes. Further information on this will be included in the HSC Pension Scheme accounts.

The Scheme member's contributions are based on their full year whole time equivalent (WTE) pensionable pay – changes which came into effect on 01 November are reflected in the second table below.

Tier	Pensionable earnings (based on full-time pay rates)	Contribution rate (before tax relief) (gross) until 31 October 2022
1	Up to £ 15,431.99	5.0%
2	£15,432.00 to £21,477.99	5.6%
3	£21, 478.00 to £26,823.99	7.1%
4	£26,824.00 to £47,845.99	9.3%
5	£47,846.00 to £70,630.99	12.5%
6	£70,631.00 to £111,376.99	13.5%
7	£111,377.00 and over	14.5%

Tier	Pensionable earnings (based on actual salary)	Contribution rate (before tax relief) (gross) from 01 November 2022
1	£0.00 - £13,231.99	5.1%
2	£13,232.00 to £15,431.99	5.7%
3	£15,432.00 to £21,478.99	6.1%
4	£21,479.00 to £22,548.99	6.8%
5	£22,549.00 to £26,823.99	7.7%
6	£26,824.00 to £27,779.99	8.8%
7	£27,780.00 to £42,120.99	9.8%
8	£42,121.00 to £47,845.99	10.0
9	£47,846.00 to £54,763.99	11.6%
10	£54,764.00 to £70,630.99	12.5%
11	£70,631.00 and over	13.5%

A NEST (National Employment Saving Trust) Scheme is also in operation for employees who are not eligible to the HSC Pension Scheme and the HSC Pension Scheme 2015, with a member contribution rate of 5% in 2020-21.

As per the requirements of IAS 19, full actuarial valuations by a professionally qualified actuary are required at intervals not exceeding four years. The actuary reviews the most recent actuarial valuation at the statement of financial position date and updates it to reflect current conditions. The 2016 valuation for the HSC Pension scheme updated to reflect current financial conditions and a change in financial assumption methodology will be used in 2020-21 accounts, including any adjustment as a result of the 'McCloud Remedy'.

# **Expenditure on Consultancy**

The Trust spent £nil on consultancy during the financial year (2022: £nil).

#### **Sickness Absence Data**

During 2022-23, monthly and cumulative sickness absence levels were higher than figures in the same period in 2021-22.

Despite improved absence management and health & wellbeing initiatives being in place to support staff to return to work, ongoing extreme pressures within the working environment, for example increased demand, reduced frontline operational cover in a number of Divisions, staff abstractions due to COVID-19 and hospital turnaround times resulting in late finishes and missed rest breaks are undoubtedly contributing to the current higher than normal sickness absence levels.

Figures reported are for all staff (excluded Bank Staff and Non-Executive Directors) and demonstrate hours lost, with average days lost based on a standard 7.5 hour day, consistent with Regional HSC Reporting of Sickness Absence.

2022/23 Monthly Sickness Absence including Comparators to Previous Reporting Year (2022/23)												
MONTH	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar
ABSENCE TARGET (2022/23)	10.1	L2% (P	ending	DOH co	onfirmat	ion- this	is a 5%	% impro	vemen	t on 20	22 posi	tion)
Cumulative % hrs lost (21/22)	6.56%	7.41%	10.34%	12.76%	13.19%	12.48%	11.28%	11.39%	11.45%	9.86%	10.66%	11.71%
Monthly % hrs lost (21/22)	6.56%	6.97%	8.09%	9.28%	10.08%	10.48%	10.59%	10.70%	10.78%	10.69%	10.69%	10.77%

Monthly % hrs lost (S/T)	2.78%	2.03%	2.00%	1.95%	2.30%	2.71%	3.55	2.40	4.77	3.93	4.12	2.60
Monthly % hrs lost (L/T)	9.74%	9.40%	9.34%	9.20%	10.29%	10.37%	8.85	9.37	9.92	11.01	12.15	12.02
Monthly % hrs lost COVID 19	/ 31%	2 27%	3.48%	3.65%	1.47%	1%						
(Sickness and self-isolation)	4.5170	2.5770	3.40%	3.0370	1.4770	170	170					
Av. days lost (7.5 hrs) per Employee per Mth	2.18	2.29	2.45	2.29	2.31	2.38	2.53	2.42	3.14	3.14	2.70	3.28
Av.Estimated costs (£'000)	636	644	673	649	614	643	733	671	873	858	858	968
Cumulative % Hrs Lost 2022/2023:						12.3	30%					

#### Reporting of Early Retirement and Other Compensation Scheme - Exit Packages (Audited)

There were no early retirement and/or compensation exit packages in 2022-23, at a cost of £nil. (2022: £111k)

Redundancy and other departure costs are paid in accordance with the provisions of the HSC Pension Scheme Regulations and the Compensation for Premature Retirement Regulations, statutory provisions made under the Superannuation (Northern Ireland) Order 1972. Exit costs are accounted for in full in the year in which the exit package is approved and agreed and are included as operating expenses at Note 3. Where early retirements have been agreed, the additional costs are met by the employing authority and not by the HSC pension scheme. Ill-health retirement costs are met by the pension scheme.

#### **Staff Benefits**

There were no staff benefits paid in 2022-23. (2022: £nil)

Tourst Management Coasts	R	Restated	Restated	
Trust Management Costs	2023 £000s	2022 £000s	2021 £000s	
Trust management costs	9,516	8,823	7,634	
Income: RRL Income per Note 4	116,211 812	119,268 642	973	
Less interest receivable  Less adjustments under HSS (THR) 2/99	0 117,023 (1,191)	0 119,910 (1,314)	116,397	
Total Income	115,832	119,910		
% of total income	8.22%	7.36%	6.23%	

The figures for 2021-22 and 2020-21 have been restated to reflect a provision for Holiday Pay shortfall liability previously treated as an accrual in 2021-22 and 2020-21 as outlined in more detail in note 15.1 and note 24. In addition following the Review of Financial Process, the management costs for 2021-22 have been restated to exclude non cash adjustments.

The management costs have been prepared on a consistent basis from previous years and the above information is based on the Audit Commission's definition "M2" Trust management costs, as detailed in HSS (THR) 2/99. The adjustments above are exceptional items which may distort the management costs, for example, income from independent ambulance provider recharges to other Trusts and non-recurrent funding for projects undertaken.

#### Retirements due to III-health

During 2022-23 there were no early retirements from the Trust, agreed on the grounds of ill-health. (2022: 6) The estimated additional pension liabilities of these ill-health retirements will be £nil. (2022: £nil) These costs if any are borne by the HSC Pension Scheme.

# ACCOUNTABILITY AND AUDIT REPORT

# **Funding Report**

## **Regularity of Expenditure (Audited)**

The responsibilities of an Accounting Officer, including responsibility for the propriety and regularity of the public finances for which the Accounting Officer is answerable, for keeping proper records and for safeguarding the Northern Ireland Ambulance Service HSC Trust's assets, are set out in the Accountable Officer Memorandum, issued by the Department of Health.

The Chief Executive discharges these responsibilities through a governance framework that is tested regularly and on which annual independent assurances are obtained. This framework and the assurances obtained are set out in the Governance Statement for 2022-23 on pages 86 to 110.

The Comptroller and Auditor General provides an annual opinion to the Northern Ireland Assembly, which includes an opinion on regularity. The full Certificate and Report of the Comptroller and Auditor General is set out on pages 127 to 131.

# **Statement of Losses and Special Payments**

Losses and special payments are items of expenditure that the NI Assembly would not have contemplated when it agreed funding to the Trust. They are subject to special controls and procedures and require specific approval in accordance with limits set by the DoH. The limit delegated to the Trust, for approval of losses, differs depending on the type of loss but all losses and special payments, irrespective of value, require approval in line with the Trusts Scheme of Delegation. Losses over a particular threshold require approval by the DoH.

# **Losses and Special Payments (Audited)**

Losses Statement	2022-23	2021-22
Total number of losses	0	1
Total value of losses (£000)	0	31

Lancas	2022-23	2021-22

Ex-gratia pa	iyments	1	0
Extra contra	ectual	0	0
Special seve	erance payments	0	111

The Northern Ireland Ambulance Service HSC Trust did not make any individual payments for losses and special payments over £250k during the year. (2022: £nil)

# **Other Payments (Audited)**

The Northern Ireland Ambulance Service HSC Trust did not make any other payments during the year. (2022: £nil)

# Fees and Charges (Audited)

The Northern Ireland Ambulance Service HSC Trust had no income generated from fees or charges during the year. (2022: £nil)

# **Remote Contingent Liabilities (Audited)**

In addition to contingent liabilities reported within the meaning of IAS37, the Northern Ireland Ambulance Service HSC Trust also reports liabilities for which the likelihood of a transfer of economic benefit in settlement is too remote to meet the definition of a contingent liability. This is where it is not currently possible to quantify the potential impact or liabilities. See Note 19 on page 172 of the Annual Accounts for further information.

Mr M Bloomfield Chief Executive 22 June 2023

#### NORTHERN IRELAND AMBULANCE SERVICE HEALTH AND SOCIAL CARE TRUST – PUBLIC FUNDS

# THE CERTIFICATE AND REPORT OF THE COMPTROLLER AND AUDITOR GENERAL TO THE NORTHERN IRELAND ASSEMBLY

#### **Opinion on financial statements**

I certify that I have audited the financial statements of the Northern Ireland Ambulance Service Health and Social Care Trust for the year ended 31 March 2023 under the Health and Personal Social Services (Northern Ireland) Order 1972, as amended. The financial statements comprise: the Consolidated Statements of Comprehensive Net Expenditure, Financial Position, Changes in Taxpayers' Equity, Cash Flows; and the related notes including significant accounting policies.

The financial reporting framework that has been applied in their preparation is applicable law and UK adopted international accounting standards as interpreted and adapted by the Government Financial Reporting Manual.

I have also audited the information in the Accountability Report that is described in that report as having been audited.

In my opinion the financial statements:

- give a true and fair view of the state of Northern Ireland Ambulance Service Health and Social Care Trust's affairs as at 31 March 2023 and of the Northern Ireland Ambulance Service Health and Social Care Trust's net expenditure for the year then ended; and
- have been properly prepared in accordance with the Health and Personal Social Services (Northern Ireland) Order 1972, as amended and Department of Health directions issued thereunder.

#### **Opinion on regularity**

In my opinion, in all material respects the expenditure and income recorded in the financial statements have been applied to the purposes intended by the Assembly and the financial transactions recorded in the financial statements conform to the authorities which govern them.

#### **Basis for opinions**

I conducted my audit in accordance with International Standards on Auditing (ISAs) (UK), applicable law and Practice Note 10 'Audit of Financial Statements and Regularity of Public Sector Bodies in the United Kingdom'. My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of this certificate. My staff and I are independent of Northern Ireland Ambulance Service Health and Social Care Trust in accordance with the ethical requirements that are relevant to my audit of the financial statements in the UK, including the Financial Reporting Council's Ethical Standard, and have fulfilled our other ethical responsibilities in accordance with these requirements. I believe that the audit evidence obtained is sufficient and appropriate to provide a basis for my opinions.

#### Conclusions relating to going concern

In auditing the financial statements, I have concluded that Northern Ireland Ambulance Service Health and Social Care Trust's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work I have performed, I have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Northern Ireland Ambulance Service Health and Social Care Trust's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

My responsibilities and the responsibilities of the Trust and the Accounting Officer with respect to going concern are described in the relevant sections of this report.

#### Other Information

The other information comprises the information included in the annual report other than the financial statements, the parts of the Accountability Report described in that report as having been audited, and my audit certificate. The Trust and the Accounting Officer are responsible for the other information included in the annual report. My opinion on the financial statements does not cover the other information and except to the extent otherwise explicitly stated in my report, I do not express any form of assurance conclusion thereon.

My responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or my knowledge obtained in the audit, or otherwise appears to be materially misstated. If I identify such material inconsistencies or apparent material misstatements, I am required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work I have performed, I conclude that there is a material misstatement of this other information, I am required to report that fact.

I have nothing to report in this regard.

#### **Opinion on other matters**

In my opinion, based on the work undertaken in the course of the audit:

- the parts of the Accountability Report to be audited have been properly prepared in accordance with Department of Health directions made under the Health and Personal Social Services (Northern Ireland) Order 1972, as amended; and
- the information given in the Performance Report and Accountability Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

#### Matters on which I report by exception

In the light of the knowledge and understanding of the Northern Ireland Ambulance Service Health and Social Care Trust and its environment obtained in the course of the audit, I have not identified material misstatements in the Performance Report and Accountability Report. I have nothing to report in respect of the following matters which I report to you if, in my opinion:

- adequate accounting records have not been kept; or
- the financial statements and the parts of the Accountability Report to be audited are not in agreement with the accounting records; or
- certain disclosures of remuneration specified by the Government Financial Reporting Manual are not made; or
- I have not received all of the information and explanations I require for my audit; or the Governance Statement does not reflect compliance with the Department of Finance's guidance.

#### Responsibilities of the Trust and Accounting Officer for the financial statements

As explained more fully in the Statement of Accounting Officer Responsibilities, the Trust and the Accounting Officer are responsible for:

- the preparation of the financial statements in accordance with the applicable financial reporting framework and for being satisfied that they give a true and fair view;
- such internal controls as the Accounting Officer determines is necessary to enable the
  preparation of financial statements that are free from material misstatement, whether due to
  fraud of error;
- ensuring the annual report, which includes the Remunerations and Staff Report, is prepared in accordance with the applicable financial reporting framework; and
- assessing the Northern Ireland Ambulance Service Health and Social Care Trust's ability to
  continue as a going concern, disclosing, as applicable, matters related to going concern and
  using the going concern basis of accounting unless the Accounting Officer anticipates that the
  services provided by Northern Ireland Ambulance Service Health and Social Care Trust will not
  continue to be provided in the future.

#### Auditor's responsibilities for the audit of the financial statements

My responsibility is to audit, certify and report on the financial statements in accordance with the Health and Personal Social Services (Northern Ireland) Order 1972, as amended.

My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error and to issue a certificate that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

I design procedures in line with my responsibilities, outlined above, to detect material misstatements in respect of non-compliance with laws and regulation, including fraud.

#### My procedures included:

- obtaining an understanding of the legal and regulatory framework applicable to the Northern Ireland Ambulance Service Health and Social Care Trust through discussion with management and application of extensive public sector accountability knowledge. The key laws and regulations I considered included the Health and Personal Social Services (Northern Ireland)
   Order 1972, as amended and Department of Health directions issued thereunder;
- making enquires of management and those charged with governance on Northern Ireland Ambulance Service Health and Social Care Trust's compliance with laws and regulations;
- making enquiries of internal audit, management and those charged with governance as to susceptibility to irregularity and fraud, their assessment of the risk of material misstatement due to fraud and irregularity, and their knowledge of actual, suspected and alleged fraud and irregularity;
- completing risk assessment procedures to assess the susceptibility of Northern Ireland
   Ambulance Service Health and Social Care Trust's financial statements to material
   misstatement, including how fraud might occur. This included, but was not limited to, an
   engagement director led engagement team discussion on fraud to identify particular areas,
   transaction streams and business practices that may be susceptible to material misstatement
   due to fraud. As part of this discussion, I identified potential for fraud in the following areas:
   revenue recognition, expenditure recognition and posting of unusual journals;
- engagement director oversight to ensure the engagement team collectively had the appropriate competence, capabilities and skills to identify or recognise non-compliance with the applicable legal and regulatory framework throughout the audit;
- documenting and evaluating the design and implementation of internal controls in place to mitigate risk of material misstatement due to fraud and non-compliance with laws and regulations;
- designing audit procedures to address specific laws and regulations which the engagement team considered to have a direct material effect on the financial statements in terms of misstatement and irregularity, including fraud. These audit procedures included, but were not limited to, reading board and committee minutes, and agreeing financial statement disclosures to underlying supporting documentation and approvals as appropriate;
- addressing the risk of fraud as a result of management override of controls by:
  - performing analytical procedures to identify unusual or unexpected relationships or movements;
  - testing journal entries to identify potential anomalies, and inappropriate or unauthorised adjustments;
  - assessing whether judgements and other assumptions made in determining accounting estimates were indicative of potential bias; and
  - investigating significant or unusual transactions made outside of the normal course of business.

A further description of my responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website <a href="www.frc.org.uk/auditorsresponsibilities">www.frc.org.uk/auditorsresponsibilities</a>. This description forms part of my certificate.

In addition, I am required to obtain evidence sufficient to give reasonable assurance that the expenditure and income recorded in the financial statements have been applied to the purposes intended by the Assembly and the financial transactions recorded in the financial statements conform to the authorities which govern them.

#### Report

I have no observations to make on these financial statements.

<sup>\*</sup> All donated funds have been used by Northern Ireland Ambulance Service Health and Social Care Trust as intended by the benefactor. The Trust Board as corporate trustee has delegated responsibility to the Director of Finance to manage internal disbursements. The Director of Finance ensures that charitable donations received by the Trust are appropriately managed, invested, expended and controlled, in a manner that is consistent with the purposes for which they were given and with the Trust's Standing Financial Instructions, Departmental guidance and legislation. All such funds are allocated to the area specified by the benefactor and are not used for any other purpose than that intended by the benefactor.

#### Consolidated Statement of Financial Position as at 31 March 2023

This statement presents the financial position of the Trust. It comprises three main components: assets owned or controlled, liabilities owed to other bodies and equity the remaining value of the entity.

Mr M Bloomfield Chief Executive 22 June 2023

#### Consolidated Statement of Cash Flows for the year ended 31 March 2023

The Statement of Cash Flows shows the changes in cash and cash equivalents of the Trust during the reporting period. The statement shows how the Trust generates and uses cash and cash equivalents by classifying cash flows as operating, investing and financing activities. The amount of net cash flows arising from operating activities is a key indicator of service costs and the extent to which these operations are funded by way of income from the recipients of services provided by the Trust. Investing activities represent the extent to which cash inflows and outflows have been made for resources which are intended to contribute to the Trust's future public service delivery.

#### Consolidated Statement of Changes in Taxpayers' Equity for the year ended 31 March 2023

This statement shows the movement in the year on the different reserves held by the Trust, analysed into the SoCNE Reserve (which reflects a contribution from the Department of Health). The SoCNE Reserve represents the total assets less liabilities of the Trust, to the extent that the total is not represented by other reserves and financing items. The Revaluation Reserve reflects the change in asset values that have not been recognised as income or expenditure. The Charitable Fund Reserve reflects the total value of charitable donations received by the Trust which have yet to be utilised.

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

#### 1. Authority

These financial statements have been prepared in a form determined by the Department of Health based on guidance from the Department of Finance's Financial Reporting Manual (FReM) and in accordance with the requirements of Article 90(2) (a) of the Health and Personal Social Services (Northern Ireland) Order 1972 No 1265 (NI 14) as amended by Article 6 of the Audit and Accountability (Northern Ireland) Order 2003.

The accounting policies contained in the FReM apply International Financial Reporting Standardsemuner (IFRS) as adapted or interpreted for the public sector context. Where the FReM permits a choice of accounting policy, the accounting policy which is judged to be most appropriate to the particular circumstances of the Northern Ireland Ambulance Service HSC Trust (the Trust) for the purpose of giving a true and fair view has been selected. The particular policies adopted by the Trust are described below. They have been applied consistently in dealing with items considered material in relation to the accounts.

#### 1.1 Accounting Convention

These accounts have been prepared under the historical cost convention modified to account for the revaluation of property, plant and equipment, intangible assets, inventories and certain financial assets and liabilities.

#### 1.2 Currency and Rounding

These accounts are presented in pounds sterling (GBP) and rounded in thousands. (£000's)

#### 1.3 Property, Plant and Equipment

Property, plant and equipment assets comprise: Land, Buildings, Transport Equipment, Plant & Machinery, Information Technology, Furniture and Fittings, and Assets under Construction. This includes donated assets.

#### Recognition

Property, plant and equipment must be capitalised if:

- It is held for use in delivering services or for administrative purposes;
- It is probable that future economic benefits will flow to, or service potential will be supplied to, the Trust;
- It is expected to be used for more than one financial year;
- The cost of the item can be measured reliably; and
- The item has a cost of at least £5.000; or

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

- Collectively, a number of items have a cost of at least £5,000 and individually have a cost of more than £1,000, where the assets are functionally interdependent, they had broadly simultaneous purchase dates, are anticipated to have simultaneous disposal dates and are under single managerial control; or
- Items form part of the initial equipping and setting-up cost of a new building or station, irrespective of their individual or collective cost.

On initial recognition property, plant and equipment are measured at cost including any expenditure such as installation, directly attributable to bringing them into working condition. Items classified as "under construction" are recognised in the Statement of Financial Position to the extent that money has been paid or a liability has been incurred.

#### **Valuation**

All Property, Plant and Equipment are carried at fair value.

Fair value of Property is estimated as the latest professional valuation revised annually by reference to indices supplied by Land and Property Services.

Fair value for Plant and Equipment is estimated by restating the value annually by reference to indices complied by the Office of National Statistics (ONS), except for assets under construction which are carried at cost, less any impairment loss.

RICS, IFRS, IVS & HM Treasury compliant asset revaluation of land and buildings for financial reporting purposes are undertaken by Land and Property Services (LPS) at least once in every five year period. Figures are then restated annually, between revaluations, using indices provided by LPS.

The last asset revaluation was carried out on 31 January 2020 by Land and Property Services (LPS) with the next review due by 31 January 2025.

Fair values are determined as follows:

- Land and non-specialised buildings open market value for existing use;
- Specialised buildings depreciated replacement cost; and
- Properties surplus to requirements the lower of open market value less any
  material directly attributable selling costs, or book value at date of moving to
  non-current assets.

Since the last revaluation exercise was undertaken, the risks to the client's land and building portfolio as a result of ongoing impact of the COVID-19 pandemic

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

have lessened considerably. However, new global fiscal, economic and political factors have come to the fore, including persistently high inflation, rising interest rates, the cost of living and energy cost crises, increasing material costs, the fallout from the mini budget under Liz Truss and the ongoing Russia-Ukraine conflict. All have the potential to negatively impact on the local property market. However, at the present time, most sectors across the Northern Ireland property market are experiencing sufficient levels of transactional activity on which to base opinion, and this is reflected in the latest indexation figures provided for the period 2022/23. For the time being, the levels of subjectivity required to assess value have reduced and the requirement to declare Material Uncertainty within any of the client asset classifications has abated. Whilst the need for an asset revaluation prior to the next scheduled date in January 2025 cannot be ruled out, under current market conditions, it is not currently required.

#### **Modern Equivalent Asset**

DoF has adopted a standard approach to depreciated replacement cost valuations based on modern equivalent assets and, where it would meet the location requirements of the service being provided, an alternative site can be valued. LPS have included this requirement within the latest valuation.

#### **Assets Under Construction (AUC)**

Assets classified as "under construction" are recognised in the Statement of Financial Position to the extent that money has been paid or a liability has been incurred. They are carried at cost, less any impairment loss. Assets under construction are revalued and depreciation commences when they are brought into use.

#### **Short Life Assets**

Short life assets are not indexed. Short life is defined as a useful life of up to and including 5 years. Short life assets are carried at depreciated historic cost as this is not considered to be materially different from fair value and are depreciated over their useful life.

Where estimated life of fixtures and equipment exceed 5 years, suitable indices will be applied each year and depreciation will be based on indexed amount.

#### **Revaluation Reserve**

An increase arising on revaluation is taken to the revaluation reserve except when it reverses an impairment for the same asset previously recognised in expenditure, in which case it is credited to expenditure to the extent of the decrease previously charged there. A revaluation decrease is recognised as an impairment charged to

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

the revaluation reserve to the extent that there is a balance on the reserve for the asset and, thereafter, to expenditure.

#### 1.4 Depreciation

No depreciation is provided on freehold land, since land has unlimited or a very long established useful life. Items under construction are not depreciated until they are commissioned. Properties that are surplus to requirements and which meet the definition of "non-current assets held for sale" are also not depreciated.

Otherwise, depreciation is charged to write off the costs or valuation of property, plant and equipment and similarly, amortisation is applied to intangible non-current assets, less any residual value, over their estimated useful lives, in a manner that reflects the consumption of economic benefits or service potential of the assets. Assets held under finance leases are also depreciated over the lower of their estimated useful lives and the terms of the lease. The estimated useful life of an asset is the period over which the Trust expects to obtain economic benefits or service potential from the asset. Estimated useful lives and residual values are reviewed each year end, with the effect of any changes recognised on a prospective basis.

The following asset lives have been used:

Asset Type	Asset Life
Freehold Buildings	25 - 60 years
Leasehold Property	Remaining period of lease
IT Assets	3 - 10 years
Intangible Assets	3 - 10 years
Other Equipment	3 - 15 years

#### 1.5 Impairment Loss

If there has been an impairment loss due to a general change in prices, the asset is written down to its recoverable amount, with the loss charged to the revaluation reserve to the extent that there is a balance on the reserve for the asset and, thereafter, to expenditure within the Statement of Comprehensive Net Expenditure. If the impairment is due to the consumption of economic benefits the full amount of the impairment is charged to the Statement of Comprehensive Net Expenditure and an amount up to the value of the impairment in the Revaluation Reserve is transferred to the Statement of Comprehensive Net Expenditure Reserve. Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of the recoverable amount but capped at the amount that would have been determined had there been no initial impairment loss. The reversal of the impairment loss is credited firstly to the Statement of

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

Comprehensive Net Expenditure to the extent of the decrease previously charged there and thereafter to the revaluation reserve.

#### 1.6 Subsequent Expenditure

Where subsequent expenditure enhances an asset beyond its original specification, the directly attributable cost is capitalised. Where subsequent expenditure, which meets the definition of capital restores the asset to its original specification, the expenditure is capitalised and any existing carrying value of the item replaced is written-out and charged to operating expenses.

The overall useful life of the Trust's buildings takes account of the fact that different components of those buildings have different useful lives. This ensures that depreciation is charged on those assets at the same rate as if separate components had been identified and depreciated at different rates.

#### 1.7 Intangible Assets

Intangible assets includes any of the following held - software, licences, trademarks, websites, development expenditure, patents, goodwill and intangible assets under construction. Software that is integral to the operating of hardware, for example an operating system is capitalised as part of the relevant item of property, plant and equipment. Software that is not integral to the operation of hardware, for example application software, is capitalised as an intangible non-current asset.

Internally-generated assets are recognised if, and only if, all of the following have been demonstrated:

- The technical feasibility of completing the intangible asset so that it will be available for use;
- The intention to complete the intangible asset and use it;
- The ability to sell or use the intangible asset;
- How the intangible asset will generate probable future economic benefits or service potential:
- The availability of adequate technical, financial and other resources to complete the intangible asset and sell or use it; and
- The ability to measure reliably the expenditure attributable to the intangible asset during its development.

#### Recognition

Intangible assets are non-monetary assets without physical substance, which are capable of sale separately from the rest of the Trust's business or which arise from contractual or other legal rights. Intangible assets are considered to have a finite life. They are recognised only when it is probable that future

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

economic benefits will flow to, or service potential be provided to the Trust; where the cost of the asset can be measured reliably. All single items over £5,000 in value must be capitalised while intangible assets which fall within the grouped asset definition must be capitalised if their individual value is at least £1,000 each and the group is at least £5,000 in value.

The amount recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date of commencement of the intangible asset, until it is complete and ready for use.

Intangible assets acquired separately are initially recognised at fair value. Following initial recognition, intangible assets are carried at fair value by reference to an active market, and as no active market currently exists depreciated replacement cost has been used as fair value.

#### 1.8 Non-current Assets Held for Sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. In order to meet this definition IFRS 5 requires that the asset must be immediately available for sale in its current condition and that the sale is highly probable. A sale is regarded as highly probable where an active plan is in place to find a buyer for the asset and the sale is considered likely to be concluded within one year. Non-current assets held for sale are measured at the lower of their previous carrying amount and fair value, less any material directly attributable selling costs. Fair value is open market value, where one is available, including alternative uses.

Assets classified as held for sale are not depreciated.

The profit or loss arising on disposal of an asset is the difference between the sale proceeds and the carrying amount. The profit from sale of land which is a non depreciating asset is recognised within income. The profit from sale of a depreciating asset is shown as a reduced expense. The loss from sale of land or from any depreciating assets is shown within operating expenses. On disposal, the balance for the asset on the revaluation reserve is transferred to the Statement of Comprehensive Net Expenditure Reserve.

Property, plant or equipment that is to be scrapped or demolished does not qualify for recognition as held for sale. Instead, it is retained as an operational asset and its economic life is adjusted. The asset is de-recognised when it is scrapped or demolished.

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

#### 1.9 Inventories

Inventories are valued at the lower of cost and net realisable value and are included exclusive of VAT. This is considered to be a reasonable approximation to fair value due to the high turnover of stocks.

#### 1.10 Income

Income is classified between Revenue from Contracts and Other Operating Income as assessed necessary in line with organisational activity, under the requirements of IFRS 15 and as applicable to the public sector. Judgement is exercised in order to determine whether the five essential criteria within the scope of IFRS 15 are met in order to define income as a contract. Income relates directly to the activities of the Trust and is recognised when, and to the extent that a performance obligation is satisfied in a manner that depicts the transfer to the customer of the goods or services promised. Where the criteria to determine whether a contract is in existence is not met, income is classified as Other Operating Income within the Statement of Comprehensive Net Expenditure and is recognised when the right to receive payment is established.

Income is stated net of VAT.

#### **Grant in Aid**

Funding received from other entities, including the Department and the Health and Social Care Board are accounted for as grant in aid and are reflected through the Statement of Comprehensive Net Expenditure Reserve.

#### 1.11 Investments

The Trust does not have any investments.

The Charitable Trust Funds are invested on behalf of the Trust by the NIHPSS Common Investment Fund (see Note 1.26) and have been consolidated.

#### 1.12 Research and Development Expenditure

Research and development (R&D) expenditure is expensed in the year it is incurred in accordance with IAS 38. Following the introduction of the 2010 European System of Accounts (ESA10), from 2016-17 there has been a change in the budgeting treatment (a change from the revenue budget to the capital budget) of research and development (R&D) expenditure. As a result, additional disclosures are included in the notes to the accounts.

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

#### 1.13 Other Expenses

Other operating expenses for goods or services are recognised when, and to the extent that, they have been received. They are measured at the fair value of the consideration payable.

#### 1.14 Cash and Cash Equivalents

Cash is cash in hand and deposits with any financial institution repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in 3 months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

#### 1.15 Leases

Under IFRS 16 Leased Assets which the Trust has use/control over and which it does not necessarily legally own are to be recognised as a "Right-Of-Use" (ROU) asset. There are only two exceptions:

- short term assets with a life of up to one year; and
- low value assets with a value equal to or below the Department's threshold limit which is currently £5,000.

#### Short term leases

Short term leases are defined as having a lease term of 12 months or less. Any lease with a purchase option cannot qualify as a short term lease. The lessee must not exercise an option to extend the lease beyond 12 months. No liability should be recognised in respect of short-term leases, and neither should the underlying asset be capitalised. Lease agreements which contain a purchase option cannot qualify as short-term. Examples of short term leases are software leases, specialised equipment, hire cars and some property leases.

#### Low value assets

An asset is considered "low value" if its value, when new, is less than the capitalisation threshold. The application of the exemption is independent of considerations of materiality. The low value assessment is performed on the underlying asset, which is the value of that underlying asset when new. Examples of low value assets are tablet and personal computers, small items of office furniture and telephones.

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

#### Separating lease and service components

Some contracts may contain both a lease element and a service element. DoH bodies can, at their own discretion, choose to combine lease and non-lease components of contracts, and account for the entire contract as a lease. If a contract contains both lease and service components IFRS 16 provides guidance on how to separate those components. If a lessee separates lease and service components, it should capitalise amounts related to the lease components and expense elements relating to the service elements. However, IFRS 16 also provides an option for lessees to combine lease and service components and account for them as a single lease. This option should help DoH bodies where it is time consuming or difficult to separate these components.

#### The Trust as Lessee

The ROU asset lease liability will initially be measured at the present value of the unavoidable future lease payments. The future lease payments should include any amounts for:

- Indexation;
- Amounts payable for residual value;
- Purchase price options;
- Payment of penalties for terminating the lease;
- Any initial direct costs; and
- Costs relating to restoration of the asset at the end of the lease.

The lease liability is discounted using the rate implicit in the lease.

Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate on interest on the remaining balance of the liability. Finance charges are recognised in calculating the Trust's surplus/deficit.

The difference between the carrying amount and the lease liability on transition is recognised as an adjustment to taxpayers equity. After transition the difference is recognised as income in accordance with IAS 20.

#### Subsequent measurement

After the commencement date (the date that the lessor makes the underlying asset available for use by the lessee) a lessee shall measure the liability by:

- Increasing the carrying amount to reflect interest;
- Reducing the carrying amount to reflect lease payments made; and

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

 Re-measuring the carrying amount to reflect any reassessments or lease modifications, or to reflect revised in substance fixed lease payments.

There is a need to reassess the lease liability in the future if there is:

- A change in lease term;
- Change in assessment of purchase option;
- Change in amounts expected to be payable under a residual value guarantee; or
- Change in future payments resulting from change in index or rate.

Subsequent measurement of the ROU asset is measured in same way as other property, plant and equipment. Asset valuations should be measured at either "fair value" or "current value in existing use".

### **Depreciation**

Assets under a finance lease or ROU lease are depreciated over the shorter of the lease term and its useful life, unless there is a reasonable certainty the lessee will obtain ownership of the asset by the end of the lease term in which case it should be depreciated over its useful life.

The depreciation policy is that for other depreciable assets that are owned by the entity.

Leased assets under construction must also be depreciated.

### The Trust as Lessor

Amounts due from lessees under finance leases are recorded as receivables at the amount of the Trust's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Trust's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

The Trust will classify subleases as follows:

- If the head lease is short term (up to 1 year), the sublease is classified as an operating lease;
- Otherwise, the sublease is classified with reference to the right-of-use asset arising from the head lease, rather than with reference to the underlying asset.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

# 1.16 Private Finance Initiative (PFI) Transactions

The Northern Ireland Ambulance Service HSC Trust has had no PFI transactions during the year.

### 1.17 Financial Instruments

A financial instrument is defined as any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

The Trust has financial instruments in the form of trade receivables and payables and cash and cash equivalents.

### **Financial Assets**

Financial assets are recognised on the Statement of Financial Position when the Trust becomes party to the financial instrument contract or, in the case of trade receivables, when the goods or services have been delivered. Financial assets are derecognised when the contractual rights have expired or the asset has been transferred.

Financial assets are initially recognised at fair value. IFRS 9 requires consideration of the expected credit loss model on financial assets. The measurement of the loss allowance depends upon the HSC Body's assessment at the end of each reporting period as to whether the financial instrument's credit risk has increased significantly since initial recognition, based on reasonable and supportable information that is available, without undue cost or effort to obtain. The amount of expected credit loss recognised is measured on the basis of the probability weighted present value of anticipated cash shortfalls over the life of the instrument, where judged necessary.

Financial assets are classified into the following categories:

- Financial assets at fair value through Statement of Comprehensive Net Expenditure;
- Held to maturity investments;
- Available for sale financial assets; and
- Loans and receivables.

The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

### **Financial Liabilities**

Financial liabilities are recognised on the Statement of Financial Position when the Trust becomes party to the contractual provisions of the financial instrument or, in the case of trade payables, when the goods or services have been received. Financial liabilities are de-recognised when the liability has been discharged, that is, the liability has been paid or has expired.

Financial liabilities are initially recognised at fair value.

### **Financial Risk Management**

IFRS 7 requires disclosure of the role that financial instruments have had during the period in creating or changing the risks a body faces in undertaking its activities. Because of the relationships with HSC Commissioners, and the manner in which they are funded, financial instruments play a more limited role within the Trust in creating risk than would apply to a non-public sector body of a similar size, therefore the Trust is not exposed to the degree of financial risk faced by business entities.

The Trust has limited powers to borrow or invest surplus funds and financial assets and liabilities are generated by day-to-day operational activities rather than being held to change the risks facing its activities. Therefore, the Trust is exposed to little credit, liquidity or market risk.

### **Currency Risk**

The Trust is principally a domestic organisation with the great majority of transactions, assets and liabilities being in the UK and Sterling based. The Trust has no overseas operations. The Trust therefore has low exposure to currency rate fluctuations.

#### **Interest Rate Risk**

The Trust has limited powers to borrow or invest and therefore has low exposure to interest rate fluctuations.

### **Credit Risk**

Because the majority of the Trust's income comes from contracts with other public sector bodies, the Trust has low exposure to credit risk.

### **Liquidity Risk**

Since the Trust receives the majority of its funding through its principal Commissioner, which is voted through the Assembly, it is therefore not, exposed to significant liquidity risks.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

### 1.18 Provisions

In accordance with IAS 37, provisions are recognised when the Trust has a present legal or constructive obligation as a result of a past event, it is probable that the Trust will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the expenditure required to settle the obligation at the end of the reporting period, taking into account the risks and uncertainties.

Where a provision is measured using the cash flows estimated to settle the obligation, its carrying amount is the present value of those cash flows using DoF issued discount rates as at 31 March 2023 of:

Rate	Time period	Real rate
	Short term (0 – 5 years)	3.27%
Naminal	Medium term (6 – 10 years)	3.20%
Nominal	Long term (11 - 40 years)	3.51%
	Very long term (41+ years)	3.00%
	Year 1	7.4%
Inflationary	Year 2	0.6%
_	Into perpetuity	2.0%

Note that PES issued a combined nominal and inflation rate table to incorporate the two elements, as included within DoH circular HSC(F) 38-2022.

The discount rate to be applied for employee early departure obligations is 4.15% for 2022-23.

A discount rate is applied by courts to a lump-sum award of damages for future financial loss in a personal injury case, to take account of the return that can be earned from investment. The rate is currently -1.5% as set (with effect from 22 March 2022) by the Government Actuary under the Damages Act 1996 as amended by the Damages (Return on Investment) Act (Northern Ireland) 2022.

The Trust has also disclosed the carrying amount at the beginning and end of the period, additional provisions made, amounts used during the period, unused amounts reversed during the period and increases in the discounted amount arising from the passage of time and the affect of any change in the discount rate.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursements will be received and the amount of the receivable can be measured reliably.

Present obligations arising under onerous contracts are recognised and measured as a provision. An onerous contract is considered to exist where the Trust has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

A restructuring provision is recognised when the Trust has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it.

The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with ongoing activities of the entity.

# 1.19 Contingent Liabilities / Assets

In addition to contingent liabilities disclosed in accordance with IAS37, the Trust discloses for Assembly reporting and accountability purposes certain statutory and non-statutory contingent liabilities where the likelihood of a transfer of economic benefit is remote, but which have been reported to the Assembly in accordance with the requirements of Managing Public Money Northern Ireland.

Where the time value of money is material, contingent liabilities, which are required to be disclosed under IAS37, are stated at discounted amounts and the amount reported to the Assembly separately noted. Contingent liabilities that are not required to be disclosed by IAS37 are stated at the amounts reported to the Assembly.

Under IAS37, the Trust discloses contingent liabilities where there is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Trust, or a present obligation that is not recognised because it is not probable that a payment will be required to settle the obligation or the amount of the obligation cannot be measured sufficiently reliably. A contingent liability is disclosed unless the possibility of a payment is remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed by the occurrence or non-occurrence of one or more

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

uncertain future events not wholly within the control of the Trust. A contingent asset is disclosed where an inflow of economic benefits is probable.

# 1.20 Employee Benefits

### **Short-term Employee Benefits**

Under the requirements of IAS 19 Employee Benefits, staff costs must be recorded as an expense as soon as the organisation is obligated to pay them. This includes the cost of any untaken leave (including untaken flexi leave) that has been earned at the year-end. This cost has been calculated using actual staff numbers and costs applied to the actual untaken leave balance as at 31 March 2023. It is not anticipated that the level of untaken leave will vary significantly from year to year.

### **Retirement Benefit Costs**

The Trust participates in the HSC Pension Schemes. Under these multiemployer defined benefit schemes both the Trust and employees pay specified percentages of pay into the schemes and the liability to pay benefit falls to the DoH. The Trust is unable to identify its share of the underlying assets and liabilities in the schemes on a consistent and reliable basis.

The costs of early retirements are met by the Trust and charged to the Statement of Comprehensive Net Expenditure at the time the Trust commits itself to the retirement.

As per the requirements of IAS 19, full actuarial valuations by a professionally qualified actuary are required with sufficient regularity that the amounts recognised in the financial statements do not differ materially from those determined at the reporting period date. This has been interpreted in the FReM to mean that the period between formal actuarial valuations shall be four years.

The actuary reviews the most recent actuarial valuation at the statement of financial position date and updates it to reflect current conditions. The scheme valuation data provided for the 2020 actuarial valuation that is currently underway will be used in the 2022-23 accounts. Financial assumptions are updated to reflect recent financial conditions. Demographic assumptions are updated to reflect an analysis of experience that is being carried out as part of the 2020 valuation. Whilst the 2016 valuation remains the most recently completed valuation, the 2020 valuation is sufficiently progressed to use for setting the demographics assumptions.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

### 1.21 Reserves

### **Statement of Comprehensive Net Expenditure Reserve**

Accumulated surpluses are accounted for in the Statement of Comprehensive Net Expenditure Reserve.

### **Revaluation Reserve**

The Revaluation Reserve reflects the unrealised balance of cumulative indexation and revaluation adjustments to assets other than donated assets.

### **Charitable Fund Reserve**

The Charitable Fund Reserve reflects the total value of charitable donations received by the Trust which have yet to be utilised.

### 1.22 Value Added Tax

Where output VAT is charged or input VAT is recoverable, the amounts are stated net of VAT. Irrecoverable VAT is charged to the relevant expenditure category or included in the capitalised purchase cost of fixed assets.

### 1.23 Third Party Assets

Assets belonging to third parties (such as money held on behalf of patients) are not recognised in the accounts since the Trust has no beneficial interest in them. Details of third party assets are given in Note 23 to the accounts.

### 1.24 Government Grants

The note to the financial statements distinguishes between grants from the UK government entities and grants from the European Union.

### 1.25 Losses and Special Payments

Losses and special payments are items that the Northern Ireland Assembly would not have contemplated when it agreed funds for the health service or passed legislation. By their nature they are items that ideally should not arise. They are therefore subject to special control procedures compared with the generality of payments. They are divided into different categories, which govern the way that individual cases are handled.

Losses and special payments are charged to the relevant functional headings in expenditure on an accruals basis, including losses which would have been made good through insurance cover had HSC Trusts not been bearing their

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

own risks (with insurance premiums then being included as normal revenue expenditure). However, the note on losses and special payments in the Assembly Accountability section of the Annual Report is compiled directly from the losses and compensations register which reports amounts on an accruals basis with the exception of provisions for future losses.

### 1.26 Charitable Trust Account Consolidation

HSC organisations are required to consolidate the accounts of controlled charitable organisations and funds held on trust into their financial statements. As a result the financial performance and funds have been consolidated. The Trust has accounted for these transfers using merger accounting as required by FReM. However the distinction between public funding and the other monies donated by private individuals still exists.

The Board of the Northern Ireland Ambulance Service HSC Trust as corporate trustee has delegated responsibility to manage the internal disbursements of Charitable Trust Funds to the Director of Finance. The Director ensures that charitable donations received by the Trust are appropriately managed, invested, expended and controlled, in a manner that is consistent with the purposes for which they were given and with the Trust's Standing Financial Instructions, Departmental guidance and legislation.

All such funds are allocated to the area specified by the benefactor and are not used for any other purpose than that intended by the benefactor.

# 1.27 Accounting Standards that have been Issued but have not yet been Adopted

The International Accounting Standards Board (IASB) have issued the following new standards but which are either not yet effective or adopted. Under IAS 8 there is a requirement to disclose these standards together with an assessment of their initial impact on application.

### IFRS 17 Insurance Contracts:

IFRS 17 Insurance Contracts will replace IFRS 4 Insurance Contracts and is effective for accounting periods beginning on or after 1 January 2023. In line with the requirements of the FReM, IFRS 17 will be implemented, as interpreted and adapted for the public sector, with effect from 1 April 2023. Management currently assess that there will be minimal impact on application to the Trust's consolidated financial statements.

Management consider that any other new accounting policies issued but not yet adopted are unlikely to have a significant impact on the accounts in the period of the initial application.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 1 STATEMENT OF ACCOUNTING POLICIES**

### 1.28 Prior Year restatement

# Holiday pay liability

On instruction from DoH, it was agreed that the holiday pay liability accrued within prior year accounts should be treated as a provision for the 2022-23 accounts. This change in accounting treatment resulted from an increased level of uncertainty around the timing of the settlement of the liability. Given the materiality of the liability, NIAS management have complied with the requirements of IAS 8 and restated the prior year accounts.

The holiday pay liability accrued and shown in staff costs was £3,968k in 2020-21 and £2,013k in 2021-22. The amounts now included under provisions in note 15 for this liability are £4,369k in 2020-21 and £6,616k in 2021-22, these amounts take account of discount factors.

This change in accounting treatment is reflected in the restated comparative figures for 2020-21 and 2021-22 in line with IAS 8. Refer to Statement of Financial Position, Statement of Comprehensive Net Expenditure and notes 3, 14, 15, 22 and 24.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 2 SEGMENTAL ANALYSIS**

### 2.1 Analysis of Net Expenditure by Segment

For operational purposes, the services provided by the Northern Ireland Ambulance Service are broadly divided into emergency and non-emergency services. The Executive Directors along with Non Executive Directors, Chairman and Chief Executive form the Trust Board which co-ordinates the activities of the Trust and is considered to be the Chief Operating Decision Maker. As the Trust Board of the Northern Ireland Ambulance Service in its capacity as the 'Chief Operating Decision Maker' receives financial information for the Trust as a whole and makes decisions based on the provision of an ambulance service for the whole of Northern Ireland, it is appropriate that the Trust reports on a one operational segment basis.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### NOTE 3 STAFF COSTS AND OPERATING EXPENSES

### 3.1 Staff Costs and Operating Expenses

3.1 Start Costs and Operating Expenses	2023		Restated 2022

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 7 FINANCIAL INSTRUMENTS**

#### 7.1 Financial Instruments

As the cash requirements of the Northern Ireland Ambulance Service HSC Trust are met through Grant-in-Aid provided by the Department of Health, financial instruments play a more limited role in creating and managing risk than would apply to a non-public sector body. The majority of financial instruments relate to contracts to buy non-financial items in line with the Trust's expected purchase and usage requirements and the Trust is therefore exposed to little credit, liquidity or market risk.

The Trust did not have any financial instruments as at 31 March 2023. (2022: £nil)

### **NOTE 8 INVESTMENTS**

#### 8.1 Investments

The Trust's Charitable Trust Funds are invested in the NIHPSS Common Investment Fund. The net market value of funds invested with the investment fund at 31 March 2023 was £457k. The investments saw a loss of £24k in 2022-23 compared to a gain of £24k in the prior year.

At 31 March	8,722	3,695	
Carrying Amount at 31 March	1	0	

Non current assets held for sale comprise non current assets that are held for resale rather than for continuing use within the business.

At 31 March 2023 non current assets held for resale comprise A&E Ambulances and other support vehicles.

Due to the specification of ambulance vehicles, their age and high mileage, the resale market is uncertain and most vehicles are sold through an auction house.

During the year ended 31 March 2023, vehicles with a fair value (less costs to sell) of £nil (2022: £nil) were sold.

The assets are valued at the lower of their carrying value (representing net book value) and fair value (less costs to sell).

The amounts shown for 2021-22 and 2020-21 as Payroll Creditors have been restated to reflect a provision for Holiday Pay shortfall liability previously treated as an accrual in 2021-22 and 2020-21 as outlined in more detail in Note 1.28 and Note 15.1.

Amounts shown under Trade capital payables, Trade revenue payables and Accruals for 2020-21 and 2021-22 have been reclassified to aid comparability. There has been no change in the overall total amount reported in these categories for these years.

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### NOTE 15 PROVISIONS FOR LIABILITIES AND CHARGES

#### 15.1 Provisions for Liabilities and Charges - 2023

	Pensions Relating to Former Directors £000s	Pensions Relating to Other Staff £000s	Clinical Negligence £000s	Other £000s	2023 £000s
Balance at 1 April 2022 (Restated)	0	0	2,092	11,798	13,890
Provided in year	0	0	1,211	1,737	2,948
(Provisions not required written back)	0	0	(22)	(1,791)	(1,813)
(Provisions utilised in the year)	0	0	(38)	(289)	(327)
Cost of borrowing (unwinding of discount)	0	0	(46)	(173)	(219)
At 31 March 2023	0	0	3,197	11,282	14,479

Provisions have been made for 5 types of potential liability: Clinical Negligence, Employer's and Occupier's Liability, Injury Benefit, Employment Law and Holiday Pay. The provision for Injury Benefit relates to the future liabilities for the Trust based on information provided by the HSC Pension Branch. For Clinical Negligence, Employer's and Occupier's claims and Employment Law the Trust has estimated an appropriate level of provision, for each individual case, based on professional legal advice with PPO calculations based on estimated life expectancy data provided by professional legal advisors. For Holiday Pay the Trust has estimated an appropriate level of provision on the basis of the duration of the claims and the application of a regionally agreed estimated payment percentage of the total expenditure incurred on affected allowances.

Clinical Negligence - Discount rate for special damages awards in personal injury cases

A discount rate is applied by courts to a lump-sum award of damages for future financial loss in a personal injury case, to take account of the return that can be earned from investment. The rate is currently -1.5% as set (with effect from 22 March 2022) by the Government Actuary under the Damages Act 1996 as amended by the Damages (Return on Investment) Act (Northern Ireland) 2022.

### Legal Claims

This represents public liability, employer liability, contract and compensation claims and dilapidations as advised by the business areas within the Trust.

Public liability claims include personal injury claims. Employer liability claims include legal costs that will have to be borne by the Trust and relate to accidents or injury caused due to faults in the fabric of a Trust building and other damages including fair employment and industrial tribunal cases.

Contract claims are associated with claims made by contractors for unforeseen delays in the completion of projects or cost over-runs, which are outside of their control. The provisions details are based on evaluations made by qualified professional and technical personnel employed by the Trust.

#### Holiday Pay Liability

The Court of Appeal (CoA) judgment from 17 June 2019 (PSNI v Agnew) determined that claims for Holiday Pay shortfall can extend as far back as 1998. The PSNI has appealed the CoA judgment to the Supreme Court and while the hearing concluded on 15 December 2022, the date has not yet been set for the hand down of the judgement.

The HSC working group considering resolution of the liability has indicated that any interim solution is likely to be at least 4 years away as it will require system change. In light of industrial action, there is also no indication of when Trade Unions discussions re settlement of the historic liability can be conducted and in the absence of a Minister, agreeing a settlement may also be delayed.

As a result of this the level of uncertainty around the timing of the liability has increased and it has been treated as a provision at 31 March 2023. The best estimate of the value of the liability is based on the position in the NHS in England, Scotland and Wales. Due to the materiality of the liability,the figures for 2021-22 and 2020-21 have been restated to reflect a provision for Holiday Pay shortfall liability previously treated as an accrual in 2021-22 and 2020-21 as outlined in more detail in Note 1.28.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 15 PROVISIONS FOR LIABILITIES AND CHARGES**

# 15.2 Comprehensive Net Expenditure Account Charges

	2023 £000s	Restated 2022 £'000
Arising during the year	2,948	6,440
Reversed unused	(1,813)	(35)
Cost of borrowing (unwinding of discount)	(219)	(224)
Total Charge within Operating Expenses	916	6,181

# 15.3 Analysis of Expected Timing of Discounted Flows - 2023

Later than 5 years	0	0	0	3,906	3,906
At 31 March 2022	0	0	628	13,262	13,890

The provision in respect of other liabilities and charges comprises: £2,025k for Employer's and Occupier's Liability, £4,621k for Injury Benefit and £6,616k Holiday Pay Provision restated.

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 16 CAPITAL COMMITMENTS**

# 16.1 Contracted Capital Commitments at 31 March not otherwise included in these Financial Statements

Catomonio	2023 £000s	2022 £000s
Property, plant & equipment	110	317
	110	317

These contracted capital commitments largely relate to partially completed capital schemes recorded as assets under construction at 31 March 2023. £69k relates to Labour for conversion of 15 PCS vehicles. £10k for wearing solutions for the Body cameras and £31k for Specific ICT schemes, REACH, Encompass EPIC Interface and CAD, to be completed in 23/24.

#### **NOTE 16.2 Other Financial Commitments**

The Trust did not have any other financial commitments at either 31 March 2023 or 31 March 2022.

#### **NOTE 17 LEASES**

IFRS16 was implemented within the Trust with effect from 1 April 2022. There are therefore no 2021-22 comparatives reported in this the first year of implementation. Leases held as Right to Use assets

#### 17.1 Quantitative disclosures around right of use assets

	2023	
	(excluding	
	dwellings)	Total
Right of Use Assets	£000s	£000s
Upon Implementation of standard	539	539
Additions	248	248

#### 17.3 Quantitative disclosures around elements in the Statement of Comprehensive Net Expenditure

Expense related to short-term leases	2023 £000s
47.40	6
17.4 Quantitative disclosures around cash outflow for leases	
	2023 £000s
Total cash outflow for lease	200
	200

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### NOTE 18 COMMITMENTS UNDER PFI CONTRACTS AND OTHER SERVICE CONCESSION ARRANGEMENTS

#### 18.1 PFI Contracts

The Northern Ireland Ambulance Service HSC Trust has not entered into any PFI contracts during the year ending 31 March 2023. (2022: nil)

#### 18.2 Other Financial Commitments

The Northern Ireland Ambulance Service HSC Trust has not entered into any non cancellable contracts (which are not leases or PFI and other service concession arrangements contracts) during the year ending 31 March 2023. (2022: nil)

#### **NOTE 19 CONTINGENT LIABILITIES**

#### 19.1 Contingent Liabilities

Material contingent liabilities are noted in the table below, where there is a 50% or less probability that a payment will be required to settle any possible obligations. The amounts or timing of any outflow will depend on the merits of each case.

	2023 £000s	2022 £000s
Clinical negligence	74	55
Public liability	0	10
Employers' liability	43	47
Other	0	0
Total	117	112

#### **Backdated Holiday Pay**

The Court of Appeal (CoA) judgment from 17 June 2019 (PSNI v Agnew) determined that claims for Holiday Pay shortfall can be taken back to 1998. However, the PSNI has appealed the CoA judgment to the Supreme Court. The Supreme Court hearing was scheduled for the 23rd and 24th June 2021 but this has subsequently been adjourned. Based on the position in the NHS in England, Scotland and Wales, an accrual at 31 March 2023 has been calculated by HSC management for the liability and is included in these accounts. However, the extent to which the liability may exceed this amount remains uncertain as the calculation has not been agreed with Trade Unions. The potential additional financial effect of this is unquantifiable at present.

#### **Public Sector Pensions - Injury to Feelings Claims**

The Department of Finance (DoF) is a named Respondent in a class action affecting employers across the public sector and is managing claims on behalf of the Northern Ireland Civil Service (NICS) Departments. This is an extremely complex case and may have significant implications for the NICS and wider public sector. However the cases are at a very early stage of proceedings and until there is further clarity on potential scope and impact, a reliable estimate of liability cannot be provided.

#### 19.2 Financial Guarantees, Indemnities and Letters of Comfort

The Northern Ireland Ambulance Service HSC Trust has not entered into any of the following: quantifiable guarantees, indemnities or provided letters of comfort during the year ending 31 March 2023. (2022: nil)

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 20 RELATED PARTY TRANSACTIONS**

#### 20.1 Related Party Transactions

The Trust is required to disclose details of transactions with individuals who are regarded as related parties consistent with the requirements of IAS24 - Related Party Transactions. This disclosure is recorded in the Trust's Register of Interests which is maintained by the Office of the Director of Finance and ICT and is available for inspection by members of the public.

The Chief Executive, Mr M Bloomfield holds the position of Chair of the NI Confederation, which is a branch of the NHS Confederation. During the year the Trust had transactions with NHS Confederation to the value of £13,927. (2022: £5,390)

The Director of Finance, Mr P Nicholson is a committee member of the NI branch of the Healthcare Financial Management Association (HFMA). During the year the Trust had transactions with HFMA to the value of £nil. (2022: £nil)

During the year, none of the other board members, members of the key management staff or other related parties has undertaken any material transactions with the Northern Ireland Ambulance Service HSC Trust.

The Northern Ireland Ambulance Service HSC Trust is an arms length body of the Department of Health and as such the Department is a related party and the ultimate controlling parent with which the Trust has had various material transactions during the year. During the year the Northern Ireland Ambulance Service HSC Trust has had a number of material transactions with other entities for which the Department is regarded as the ultimate controlling parent. These entities include the Health and Social Care Board, the other five HSC Trusts, the Regulation and Quality Improvement Authority and the Business Services Organisation.

#### **NOTE 21 THIRD PARTY ASSETS**

### 21.1 Third Party Assets

The Trust held £nil cash at bank and in hand at 31 March 2023 which relates to monies held by the Trust on behalf of patients. (2022: £nil) The Trust does not hold any monies on behalf of patients due to the nature of the service provided.

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 22 FINANCIAL PERFORMANCE TARGETS**

Organisations are allocated a Revenue Resource Limit (RRL) and a Capital Resource Limit (CRL) and must contain spending within these limits.

The resource limits for a body may be a combination of agreed funding allocated by commissioners, the Department of Health, other Departmental bodies or other departments.

Bodies are required to report on any variance from the limit as set which is a financial target to be achieved and not part of the accounting system.

#### 22.1 Revenue Resource Limit (RRL)

The Revenue Resource Limit (RRL) for the Northern Ireland Ambulance Service HSC Trust is calculated as follows:

Revenue Resource Limit (RRL)         2023         2022           DoH (SPPC)         116,094         119,151           DoH (Other)         0         0           PHA         117         117           Other - SUMDE & NIMDTA         10         0           Total         116,211         119,268           Less RRL Issued To:         116,211         119,268           Cryanisation (Specify)         8         116,211         119,268           RRL to be Accounted For         116,211         119,268           Revenue Resource Limit Expenditure         8         129,923         129,196           Net Expenditure per SoCNE         129,923         129,196         129,196           Adjustments         0         0         0           Capital Grants         0         0         0           Research and Development under ESA 10         (7,296)         (5,877)           Impairments         375         0           Notional Charges         (35)         (31)           Prior Period Adjustment         (5,981)         2,013           Movements in Provisions         (910)         (6,181)           Adjustment for income received re Donations / Government grant / Lottery funding for non current			Restated

<sup>\*</sup> As a result of the changes to non-cash RRL Profit/Loss on disposal of assets is excluded from Note 22.1 from 2022/23, however, has been included within 2021/22 as a one off adjustment.

#### **Materiality Test:**

The Trust is required to ensure that it breaks even on an annual basis by containing its net expenditure to within

	2023	023 2022	
	%	%	
Break Even in year position as % of RRL	0.09%	0.04%	
	·		
Break Even cumulative position as % of RRL	0.94%	0.82%	

The Department recognises a material surplus or deficit as 0.25% of RRL. The in year break even position is therefore not considered material for any of the last 5 years. The cumulative position at 31 March 2023 is £1,090k (0.94% of total revenue), which is considered material. This amount is the cumulative effect of non material surpluses building each year since the inception of the Trust.

Following the implementation of Review of Financial Process, the format of Note 22.1 has changed as the Department of Health has introduced budget control limits for depreciation, impairments, and provisions, which an Arm's Length Body cannot exceed. The Northern Ireland Ambulance Service HSC Trust has remained within the budget control limit it was issued. From 2022-23 onwards, the materiality threshold limit excludes non-cash RRL.

### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

### **NOTE 22 FINANCIAL PERFORMANCE TARGETS**

### 22.2 Capital Resource Limit

The Trust is given a Capital Resource Limit (CRL) which it is not permitted to overspend.

	2023 £000s	2022 £000s
Gross capital expenditure	6,912	9,278
Less charitable trust fund capital expenditure	(100)	0
(Receipts from sales of fixed assets)	0	0
Net Capital Expenditure	6,812	9,278
Capital Resource Limit	6,889	9,455
Adjustment for Research and Development under ESA10	(75)	0
Overspend / (Underspend) against CRL	(2)	(177)

### **NOTE 23 POST BALANCE SHEET EVENTS**

### 23.1 Post Balance Sheet Events

There are no post balance sheet events after the reporting period having a material effect on the accounts.

### **Date Authorised for Issue**

The Accounting Officer authorised these financial statements for issue on 7 July 2023

#### NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 2023

#### **NOTE 24 CORRESPONDING AMOUNTS**

#### Change in Accounting treatment - Holiday pay

On instruction from DoH, it was agreed that the holiday pay liability accrued within prior year accounts should be treated as a provision for the 2022-23 accounts. This change in accounting treatment resulted from an increased level of uncertainty around the timing of the settlement of the liability.

This change in accounting treatment is reflected in the comparative figures for 2020-21 and 2021-22 and has resulted in retrospective restatement in line with IAS 8.

#### Reclassification of Holiday pay liability

The holiday pay liability shown in staff costs was £3,968k in 2020-21 and £2,013k in 2021-22. The amounts now included under provisions in note 15 for this liability are £4,369k in 2020-21 and £6,616k in 2021-22 after factoring in relevant discount factors.

The impact of the above adjustments on corresponding amounts in the 2020-21 and 2021-22 are summarised in the tables below;
